ROBBINS ACCESSORY SERVICE, INC.

INSPECTION/CONTROL OF PURCHASED MATERIAL

- Supplier qualification system in place; approved supplier list maintained
- Receiving and final inspections are documented and retained
- Incoming materials inspected before use; inspection system established
- Certificates of Conformity, FAA 8130-3, JAA forms, or other required traceability documents are retained
- Materials are matched to purchase orders and certifications
- Records show acceptance/rejection status and quantities
- Rejected materials are segregated; suppliers notified of nonconformance
- Corrective action requests issued for discrepant materials

MATERIAL CONTROL

- Material storage is secured to prevent unauthorized access
- Customer assets are identified, segregated, and protected from damage
- Shelf life program is documented and actively maintained
- Shelf life items are labeled with expiration dates and monitored
- Materials are handled to prevent contamination, damage, weather exposure, loss, or deterioration

MATERIAL PACKAGING, STORAGE, AND HANDLING

- Material Packaging, Storage, and Handling:
- Storage facilities are sufficient and maintained to preserve product quality from receipt to shipment
- Packaging controls ensure materials are protected from damage during handling and transit
- Parts are stored in original manufacturer packaging when possible, retaining all original markings
- Repackaged products meet or exceed applicable industry standards
