

44" x 44"

Fabric Supplies

- 1 panel or 1/2 yard fabric
- 2 1/2 yards background (black)
- 1/4 yard sash fabric
- 3/8 yard binding
- 1 1/4 yard backing

Optional: red and white rick rack
15" square ruler

Cutting

Cut 9 panel designs apart leaving a 1/4" seam allowance around each design. It doesn't matter if the designs are all the same size. In fact it's better if they're not.

Cut several 6" strips of the background fabric.

Add a 6" background strip around all 4 sides of each design. Cut two piece slightly longer than the width of the block. Add one to the top and bottom. Trim even with the side edges of the block. Cut two pieces longer than the length of the block. Add one to each side of the block and trim even.

15" square Ruler

Take your 15" ruler (or cut a 15" square of template plastic), lay it on a block and "twist" it so the picture is tilted off center. Cut off the excess background fabric. Repeat for all 9 blocks. Tip: cut some blocks tilted to the right and some tilted to the left for a tossed look.

The panel design will now be twisted at an angle when the block is turned straight.

Sew the blocks together with a 1" (cut 1 1/2") sashing. We added red and white rick rack and quilted with variegated thread for extra embellishment.
