BUYER REPRESENTATIVE:

Dave Koupal 605-390-0625

MAIL & TELEPHONE ORDER BIDS

Bids will be handled in strict confidence by any of the publication representatives or Red Western representatives.

Current weights and scrotal size will be available sale day.

Catalog produced by: The Cattle Business Weekly • 605-859-2022 • P.O. Box 700 • Philip, SD 57567

HEALTH

All bulls are guaranteed breeders and assured healthy on sale day. They have all passed a semen evaluation by a certified veterinarian.

INSURANCE

Bull Mortality and Infertility Insurance will be available sale day with Martin-Trudeau Insurance.

LIABILITY

All persons who attend the sale do so at their own risk. The hosts assume no liability, legal or otherwise, for any accidents which may occur.

DELIVERY

Pick up your bulls from Crawford Livestock by Sunday evening and receive \$50 per bull discount. We will deliver the bulls free of charge to central locations in Nebraska, South Dakota and Wyoming. Anything outside of this area will be at least cost possible. Please let the office staff know at settlement time what you will be doing with your bulls.

CULL BULL CREDIT

We will offer a \$250 credit for each bull you bring to Crawford on April 19 and replace with a Red Western bull. Bring in a cull bull, purchase a new bull get \$250, haul him home get \$50. That's an extra \$300 per bull in your pocket!

CALVING EASE RECOMMENDATIONS:

- ★★★ Recommended for heifers and cows
- ★★ Recommended for large heifers and cows
- ★ Recommended for cows only

Video of the bulls available at dvauction.com
Sale will be broadcast live on dvauction.com

If you are not able to attend the sale, please be sure to register at DVAuction at least 2 days ahead of the sale.

WELCOME

Welcome to our 20th annual Grill's Red Western Bull Sale. We are thankful for each and every one of you that have shown interest in our program's through the years. Without your trust, we wouldn't be able to continue to do what we love; breeding cattle.

The Red Angus breed continues to gain market share across the industry. Now is as good a time as any to join the progression of the breed or for you that already use Red Angus, the opportunity right now is as good as ever to improve your genetics. We would be honored to be part of your ventures no matter what that may be.

Our focus continues to be cattle that thrive in challenging environments and customers that profit from them. They need to be high volume, low maintenance in the pasture and efficient in the feedlot, to keep more money in your pockets. We continue to evaluate cattle across the country in search of genetics that provide more than just fancy EPDs, but genetics that truly live up to their numbers, so that you can have confidence in your investments.

We hope that you have a chance to evaluate the bulls we have on offer. Videos are available on DVAuction for your convenience and our phones are always close by to answer your questions. If we can be of help today or any time throughout the year, we would love to visit. Once again, we thank you for your interest and wish you the best.

We were very happy the way these Ardmore sons show their explosive growth. Rebel is an example of low birth with great WW and natural thickness His dam was an ET calf that combines great maternal characteristics. Rebel has at least two brothers in top commercial herds.

Has a little extra frame to go with his muscle. If you have a set of cows that need to wean calves with just a little more weight, I would suggest this bull. His dam is a moderate-sized, deep chested cow with a good udder. Ardmore does add some size to this picture.

Heifer Bull! 66 lb BW, -4.6 BW EPD and 17 CED. Dark red, smooth made bull.

LEADING EDGE 2 YR OLD COW

LOT 38'S DAM - GRILL MADDY 98

I haven't been excited with a young bull like this one in a long time. From a young calf to now, he has been impressive from every angle. He has everything I feel is important for a bull of any breed to be at the top of his game. He has great feet and leg structure to go with his impressive thickness and depth. His dam is a super cow with a top notch udder. She is the kind that will stay in great shape on a tough year and always get bred. All this coupled with low birth and a heavy WW makes Card Game an ideal Red Angus specimen.

The only Heavy Medal bull calf this year, but he may be the best one yet! 73 lb BW to wean off at 673 lbs. He's dark red, wide chested with a big flat top. We have loved the Heavy Medal daughters and this guy should carry on the legacy!

Commercial Replacement Heifers

Heifers have had their calf hood, weaning vaccinations and bangs vaccinations. They have also been poured with CleanUp II. They will weigh between 900-1000# sale day.

PROFIT. REPEAT.

Generate repeated profits with the industry's most-favored female.

Independent research from a decade of data collection showed Red Angus-sired heifers commanded \$66/head more than females of other breed types. That's nearly \$5,300 on a single load of replacement heifers to boost profits on your operation.

Visit RedAngus.org for details on the industry's most-favored female.

A large brown Red Angus cow stands in a field, looking towards the camera. She has a yellow ear tag with the number 4141 and the text 'RED ANGUS' on it. Two brown calves are in the foreground, one of which is grazing. The background shows a field of tall grass and some trees under a clear sky.

Red Angus Guide to EPDS and Indexes

ProS... Profitability and Sustainability is an all-purpose index that predicts average economic differences in all segments in the beef supply chain. This index is a combination of the breeding objectives modeled in the HerdBuilder and GridMaster selection indexes. In this index, replacement heifers are retained from within the herd and all remaining progeny are fed out to slaughter and sold on a quality-based grid. Traits included in this index include calving ease, growth, HPG, STAY, Mature Weight, Dry Matter Intake and carcass traits. The resulting index is expressed in dollars per head born (Index/High Value).

HB HerdBuilder is a maternal selection index that predicts the economic differences of animals for traits that are important from conception through weaning. Expressed as dollars per head born, HB is calculated based on the scenario that bulls are mated to heifers and cows, replacement heifers are retained and all remaining progeny are marketed at weaning. Traits included in the HB index include Calving Ease Direct, Calving Ease Maternal, Weaning Weight, Milk, Mature Weight, Heifer Pregnancy and Stayability (Index/High Value).

GM..... GridMaster is a selection index that predicts the average economic difference of non-replacement calves through the post-weaning phase of production. GM places selection pressure on growth, feedyard performance and carcass traits. Expressed as dollars per head born, GM is calculated based on the scenario that progeny are fed out to slaughter and marketed on a quality-based carcass grid. Traits included in GM include Average Daily Gain, Carcass Weight, Dry Matter Intake, Marbling, Back Fat and Rib Eye Area (Index/High Value).

CED Calving Ease Direct predicts differences in the percent of calves born unassisted out of 2-year-old dams. (Percent/High Value)

BW Birth Weight predicts differences in actual birth weight of progeny. (Pounds/Low Value)

WW Weaning Weight predicts differences in 205-day weaning weight. (Pounds/High Value)

YW Yearling Weight predicts differences in 365-day yearling weight. (Pounds/High Value)

ADG Average Daily Gain predicts differences in weight gain between 205 and 365 days of age. (Pounds/High Value)

DMI Dry Matter Intake predicts differences in daily feed intake as measured in a feedlot during the post-weaning period. (Pounds/Low Value)

MILK Milk predicts differences in weaning weight attributed to the milking ability of the animal's daughters. (Pounds/High Value)

ME Maintenance Energy predicts the difference in maintenance energy requirements. (Mcal per Month/Low Value)

HPG Heifer Pregnancy predicts differences in the percent of daughters who are able to conceive and calve at 2 years of age following exposure to breeding. (Percent/High Value)

CEM Calving Ease Maternal predicts differences in the percent of daughters who are able to calve unassisted as 2-year-old heifers. (Percent/High Value)

STAY Stayability predicts differences in the ability of an animals' retained daughters to remain productive in the herd – calve every year – through 6 years of age. (Percent/High Value)

MARB Marbling predicts differences in marbling score – amount of intramuscular fat measured at the 13th rib. (Marbling Score Units/High Value)

YG Yield Grade predicts differences in USDA Yield Grade, which is calculated using CW, REA and Fat. (Yield Grade Units/Low Value)

CW Carcass Weight predicts differences in actual hot carcass weight. (Pounds/High Value)

REA Ribeye Area predicts differences in square inches of ribeye area measured at the 13th rib. (Square Inches/High Value)

FAT Fat predicts differences in the depth of backfat measured between the 12th and 13th ribs. (Inches/Low Value)
