

1) click monitor icon

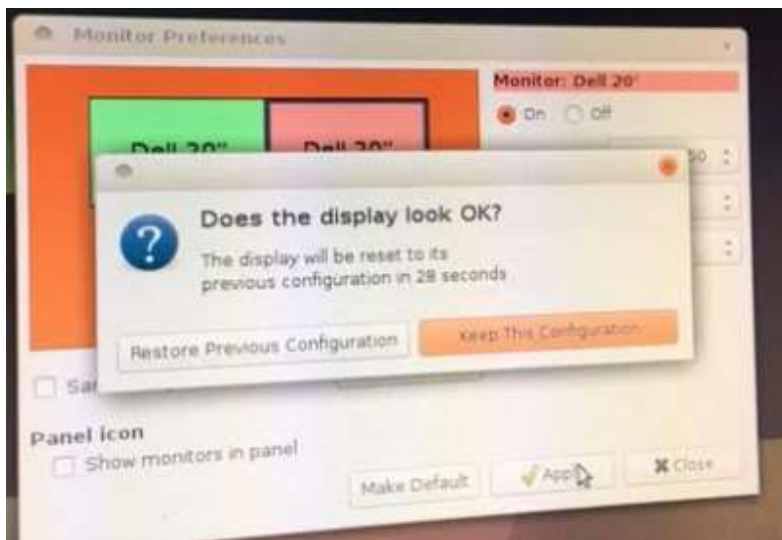

2) Uncheck same screen option

3) Arrange your screen

4) click apply and keep configuration

Navigating the ASD

Configuring Display Settings

By clicking once on "Display" option on the ASD Control Panel, you will be presented with the Display Settings Application.

If you have multiple displays, you will be given the option to control each independently.*

The Display Settings Application will allow you to adjust the resolution of your displays and control rotation.

*Although the ASD Development team strives to bring multiple monitor support to all who wish to use it, the use of multiple monitors is supported on a best effort basis.
