# What is Rhino?

Rhino panels are a leading brand of premium quality, designer wall panels.

We use the latest innovative technology for a truly realistic tile-look panel with an etched grout line. These panels visually imitate the beauty of real tiles without high installation costs and allow hassle free maintenance.

Rhino panels boast the use of cutting edge technology to provide high definition panels for all rooms in your home including hallways, living rooms, bathrooms and kitchens.

Rhino panels are designed in state of the art facilities and then crafted using quality raw materials to give you a first class product. Rhino panels come in various colours and designs to suit all tastes.

# Styling Rhino

Rhino panels are unique as they enable you to mix and match different designs and colours together. This means you can choose from different collections and amalgamate these panels together to create a desired and unique look.

Rhino panels give you the flexibility to allow you to join two different panels from two different ranges together without the use of trims.

Rhino allows you to eliminate H-joint trims to create a natural look. Rhino offers four different finishes in profile trims to give you a minimalist appearance (Please see p22 for more details on profile trims.)

Carrera Ice (Tile Effect) - Solar Collection  
Blue Cappuccino Marble - Urban Collection

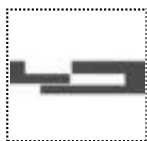

# SATURN Metro Tile

Shown above is Metro LightStone - Saturn Collection

Metro collection is based on the classic subway tile measuring 30cm x 10cm. This wall panel is manufactured using cutting-edge technology to create the appearance of a fully tiled wall with etched grout lines. The overall effect looks and feels more realistic than ever.

Our subway tile effect panels add a modern designer finish to any room and can be used in either vertical or landscape orientation to achieve the desired look.

# SOLAR Tile Collection

Shown above is Light California with Dark California (Dark Panel) - Solar Collection

The Solar collection is based on the classic tile measuring 300mm x 600mm, being stacked vertically to give a 2.7m high panel. This wall panel is manufactured using cutting-edge technology to create the appearance of a fully tiled wall.

2.7m

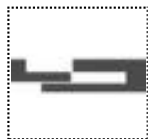

We have taken highly desirable designs found in nature and incorporated them into panels. The final effect is an amazing tile effect panel which is mistaken by many as real tiles. The overall effect looks and feels more realistic than ever.

# URBAN Timeless Collection

Shown above is Brushed Silver complemented with Volcanic Marble - Urban Collection

The Urban Collection comprises of a 1m x 2.4m panel. The larger format allows for fewer joins and easier installation due to its sheer size. The larger format also allows you to take advantage of its bigger pattern block.

In both ranges, the tongue and groove system allows different styles of panels to be interlocked to create a stunning look. This wall panel is manufactured using cutting-edge technology to create a High Definition appearance allowing you to create a unique look.

# BENEFITS OF RHINO

Rhino wall panels are the latest trend in designer panels, adding both style and luxury to any room.

Our designs are incredibly realistic and inspired by nature.

They offer the following benefits:

## TONGUE AND GROOVE

locking mechanism to allow a quick and easy installation

## HIGHLY REALISTIC DESIGNS

the natural appearance of tiles and stone but without the maintenance and cost

## WATERPROOF

made of pvc and won't swell, crack or bubble

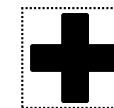

## LOW MAINTENANCE

clear easily with a damp cloth.  
no bleaches or cleaning products needed

## QUICK AND EASY TO INSTALL

using our tongue and groove locking mechanism installation could not be easier.

## HYGIENIC

unlike tiles, our panels don't hold dirt or other allergens.

## COST EFFECTIVE

no need for grouts spacers or other tiling materials

**\*Please note due to printing limitations colours may vary\***
