

\$100k Cowgirl Cashout

OFFICIAL RULES

One selected contestant. One four-digit guess. A chance to win \$100,000.

Maximum of 13 total game attempts and one \$100,000 prize across the entire promotion. A prize is not guaranteed.

1. Sponsor and promotion period

Sponsored by Curlytop LLC (the “Sponsor”). Questions: Alek@22ava.com. The promotion runs at designated participating Kylie Morgan shows within September 23-November 20, 2026, subject to the attempt and prize limits below. Sponsor will post the entry window and drawing time at each participating venue before entries open. All event times are local. Not every tour date is necessarily a participating event.

2. Who may participate

Open to legal residents of the 50 United States and District of Columbia who are at least 18 and the age of majority in their state of residence. Current or former employees, family members, agents, successors or assignees of Sponsor or any agency involved with this promotion are ineligible. Anyone with advance knowledge of the winning combination is ineligible. Identification and eligibility verification are required before play. Void where prohibited.

3. How to enter the drawing

Eligible attendees receive one numbered raffle-style drawing ticket at no separate charge when entering the venue during the posted entry window. Staff place the matching stub in the drawing container. Keep your ticket; it is required to claim selection. Limit one drawing entry per person per participating event. Tickets cannot be purchased, sold or transferred. Re-entry, additional admission tickets, merchandise purchases and donations do not earn additional entries.

4. How the contestant is selected

One ticket is drawn at random from all valid entries received for that event. The number is announced at the venue. The holder must be present and report to designated staff with the matching ticket within three minutes of the announcement. If the holder is absent, declines, cannot produce the ticket or is ineligible, another ticket is drawn. Replacement drawings occur only before a game attempt begins. Being selected does not mean the contestant has won the cash prize.

OFFICIAL RULES • CONTINUED

5. How to play

After verification and a rules briefing, the selected contestant receives one opportunity to enter a four-digit number combination into the official “Crack the Vault” website supplied by Interactive Promotions Group (“IP Group”). The submitted four digits must exactly match the predetermined winning combination, in the correct order. No practice submissions, additional guesses or changes after submission are allowed. Only an authorized, supervised attempt counts; direct or unscheduled online submissions are not permitted.

There may be no more than 13 total game attempts during the entire promotion, with no more than one attempt per selected contestant. Drawing tickets are entries into the selection drawing, not additional game attempts. Once an authorized attempt is completed at an event, an unsuccessful result does not lead to another contestant or another guess at that event.

6. Prize and odds

One cash grand prize of \$100,000 is available for the entire promotion, not \$100,000 per show. The promotion ends when the one grand prize is verified, 13 total attempts have been used, or the promotion period ends, whichever occurs first. Further play will be paused immediately after an apparent winning attempt pending verification. If no eligible contestant makes a verified winning attempt, no grand prize is awarded.

The chance of being selected depends on the number of valid drawing entries at that event. The game has 10,000 possible four-digit combinations; the stated chance of a winning game attempt is 1 in 10,000. Overall chances also depend on being selected and satisfying eligibility requirements. The winner is responsible for applicable taxes; required tax reporting or withholding may apply.

7. Winning result and verification

A potential winning attempt must match the official predetermined combination and produce the official open-vault “You Won” result. A display alone is not final proof of a win. All potential wins are subject to eligibility checks, software-log review and verification by IP Group. A result caused by human error, software error, equipment malfunction or tampering is not a valid winning play.

The potential winner must promptly provide their legal name, address, telephone number, identification and the combination entered, and complete the winner affidavit, required tax documents and other reasonable claim-verification documents. IP Group may investigate the claim and may require the winner or promotion official to undergo a polygraph examination where warranted by the facts and permitted by law. No cash is paid onstage; payment follows completed verification and claim processing.

8. Fair play and technical problems

Tampering, false information, duplicate drawing entries and attempts to alter the game or improve its normal odds may result in disqualification. No person may obtain or disclose the winning combination in advance. If a connection or equipment problem occurs, play stops while officials consult IP Group. An error does not automatically authorize a retry or establish a win. Any permitted remedy must comply with the overall 13-attempt limit and provider instructions. No substitute game may be used.

9. Administration and information

Sponsor administers the drawing and eligibility process and will apply these rules consistently, subject to applicable law. If an event cannot proceed fairly or securely, Sponsor may pause the activity and coordinate any rescheduling or cancellation with IP Group. Material changes must be announced; no change may increase the contracted attempts or prize limit without written provider approval. Participant information is used to administer and verify the promotion and shared with IP Group as needed. Questions about the handling of participant information may be directed to Sponsor at the email address above. Entry does not by itself enroll anyone in marketing communications.
