

UPT S.P.R.C. STABILATOR PIN REMOVAL CLAMP

The SPRC tool was specifically designed to efficiently remove stabilator assembly bolts on UH and HH-60 aircraft with folding stabilators

- ✓ Reduces hour long maintenance task to a few minutes
- ✓ Reduces unnecessary and expensive airframe damage during removal
- ✓ Integrates seamlessly into existing maintenance schedules
- ✓ Minimal personnel training required
- ✓ Designed for maintenance-free operation

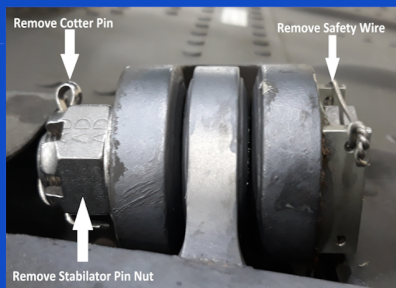

United Protective Technologies research and development division works to provide effective engineering solutions that have shown proven performance in commercial and military applications. We seek to uphold this standard with the production of the S.P.R.C.
