

The South Coast Orchid Club of SA Inc.

Gazette

September
2014

PRESIDENT: Geoff Spear

PATRON: Sydney Monkhouse

AT A GLANCE

The next meeting of the South Coast Orchid Club will be held at 8pm on Wednesday 3rd September 2014 at St. Bernadette's Church Hall corner of Walsh Avenue and South Road, St. Marys. Our guest speaker will be Kevin Gurney whose subject will be 'Orchids of Northern Thailand'.

BEGINNERS' GROUP: Before main meeting 7.20p.m.

DAYTIME CHAPTER

The next meeting will be held at Lou Kesting Hall, off Broadway, South Brighton on Thursday 11th September 2014 at 2pm. Our guest speaker Brian Lyttle will talk on Phalaenopsis.

SOUTHERN REGION GROUP

The next meeting will be held at 2pm on Sunday 21st September 2014 in Carrickalinga House, 17-19 Torrens Street, Victor Harbor. Guest speaker, Chris Heyesen will speak on 'My Life's Journey with Orchids'.

NEW MEMBERS: Welcome to Coral Tillsmanns and Trudie Beare.

BIRTHDAY CONGRATULATIONS

D. Carassai, Peter Flavel, Oui Ju, Marie Lutz, Rod McRedmond, Joan McMahon, Helen McIntosh, Eileen Pinnock, John Robinson, Thelma Reglar, Richard Wilson, Michael Willoughby, Sue Zerbe.

BIRTHDAY DRAW

See Heather Wright to put your name in the Birthday Book.

LUCKY NAME BADGE

Make sure you wear your name badge. You may win a prize.

PUBLIC LIABILITY:

Under Insurance Guidelines all members and Committee attending any function or meeting held by the Club must sign and print your name on an attendance sheet.

CELEBRATING GOLDEN ANNIVERSARY

At each meeting and all 3 Shows any yellow genera orchid benched up to July 2015 will be awarded points as part of our Golden Anniversary celebrations. The yellow plant with the highest points will win a prize generously donated by Bev and John Gay. Thanks John and Bev for this great idea.

COMMITTEE 2014

FIRST DIVISION:

Leader- John Gay, Wendy Lodge, **Recorder:** Rowan Crowhurst

SECOND DIVISION:

Leader- Graham Zerbe, Judy McRedmond, **Recorder** Peter Haltis

PRESIDENT'S REPORT

Last meeting I was amazed at the quality plants benched. The weather had been so dreadful. How did you do it? I see I still have a lot to learn.

The Winter Show was spectacular. Possibly one of the largest Winter Shows we have had. You did the Club proud and at the same time made the general public very happy. We had so many favourable comments. Central Management congratulated all who supported the display. Thank you to Committee and all members for making this Show a success.

For the Spring Show, we have been allocated the same place as last year, the large area near Wendy's. Swapping the sites for the Spring Show means that we can show off all your wonderful large Dendrobiums etc. This will be an exciting Show.

Probably you have noticed in the Orchid Calendar that we have a display at the Unley Library coming up. Come along and have a look. Thank you to you all.
Good growing and showing,
Geoff.

DAYTIME CHAPTER

Hi Everyone,

Our guest speaker today was Mr. Noel Oliver who now lives in Victor Harbor. Noel came to give us a talk on Australian Natives and brought quite a few flowering plants with him. Our newer members really appreciated being able to see how lovely this genera of orchids really is. Noel explained in detail about potting mixes, fertilising and positions of advantage for better growing the plants. The mounted plants he brought along were all flowering and growing quite happily mounted on slabs and pieces of tree. Something that doesn't shed its bark is best. It was still a bit early in the season to have any *speciosum* plants or flowers available. The newer members were very happy with the talk and said they had learnt heaps. It was a talk that we all enjoyed and we appreciated having this genera explained a bit more in detail as we are all still learning. So thanks Noel, well done and much appreciated.

Apologies today from Mrs Geraldine Flavel. Hope to see you again very soon.

We also had a visitor today, Mrs Coral Tillmanns, who was invited to come along by Lucy. Coral brought along two lovely cymbidium plants. Both very well grown with huge flowers. Well done Coral.

Geoff took the Beginners' Group today prior to the main meeting which our new members really enjoyed. Thank you Geoff.

Noel did the plant commentary and naturally did a great job. It was a pity there were not more plants benched to be talked about. With the weather being so cold the buds aren't opening. As with quite a few of my plants the flower buds just drop off which is a bit disappointing. Mr. Bill Clark's Cymbidium Sarah Jean 'Helen', a well grown and presented plant, with lovely small red flowers, was voted best on the day. Congratulations Bill. Well done.

Coral has now joined our Club, so welcome Coral. Great to have your company and friendship.

The meeting closed after another great afternoon. Thanking all in attendance.

Bye, Dorothy.
8277-1793.

Noel Oliver at his most eloquent conducting his plant commentary.

Bill Clarke with his plant of the day
Cym. Sarah Jean 'Helen'

BUS TRIP 10th August 2014

Rain was forecast, but there was only one small shower when we arrived at Belair Country Club for lunch.

Things did not get off to a good start because on arrival at Dover Square, Lee told us that Corsten Coaches had phoned and told him our coach had broken down on the way. Grant's Coach Lines arrived to pick us all up about half an hour after our designated departure time. Terry was our Coach Captain.

At 9.15 we were on our way to Wendy Lodge's at Hope Valley. Thank you Wendy and Michael for allowing us to visit your home. How very nice to see how you have your orchid houses built and seeing so many genera growing. Our next visit was to Helen and Kevin Western's. Thank you Kevin and Helen for allowing members to wander through your shade houses looking at your great collection of orchids. Kevin opened up his laboratory so that a few interested members could see the workings of his Lab. This is where he clones hundreds of flasks.

Next port of call was the home of Anne and Brian Lyttle. Anne had afternoon tea all prepared. While half the group enjoyed a cuppa, the other half viewed Brian's Orchids. I am sure most members bought orchid plants and had a great time. Thank you to all of our hosts and hostesses for sharing your valuable time and orchids with the Club members.

We arrived back at Dover Square at 5.00p.m. Thank you to Grant's Coach Lines.

From the AOC Secretary

The Publications Committee has been looking at the cost of *Orchids Australia* as the numbers of subscribers fall and the cost of postage continues to rise and has sought advice from some printing firms.

This resulted in us seeking prices from a number of printers and after much thought we put forward a recommendation that "We change the format of *Orchids Australia* to a finished size of an A5 magazine".

The reason behind this recommendation is that at present the magazine is not a standard size and by changing the size to A5 we would be using paper that is of normal sizing resulting in a massive saving. This means that we would not have to increase the subscription rate to *Orchids Australia* and we would stop the drain on the Council's finances and in fact put money back into the Council.

Further to this recommendation the magazine would be still be printed the same way which means that there would no loss of quality in the images or the colour of those images.

It may be necessary to increase the number of pages so that there is the same amounts of content in the magazine but at this stage on doing a mockup of the magazine in the slightly smaller size the articles do not take up very much extra space.

The saving to the AOC would be in the vicinity of \$25000 per year. This would be sufficient to make the magazine not only cost effective but also viable for foreseeable future keeping the subscription and advertising rates the same.

Thea Shaughnessy
AOC Secretary.

SOUTHERN REGION GROUP MEETING SUNDAY 17th AUGUST

Beginners' Group: 1.30p.m. Des Betcher gave a very informative talk on how to look after our Cymbidiums together with some very useful information on fertilization.

Meeting: The President opened the meeting at 2.00p.m. He then welcomed Des Betcher. After discussing the Winter Show, he told us that he and Lucy would be unable to attend the September meeting as they had the Main Spring Show to put in at Colonnades. He gave us a few tips for our Show at the end of the month and wished Graham Zerbe a happy Birthday.

Apologies: Jan Saxon and Keith and Rus Sutton.

New Member: Trudy Beare

Lucky Name Badge: Joy Ward

Birthday draw winner: Lorna Zerbe celebrating her 97th birthday. Congratulations.

Guest Speaker: Des Betcher gave a comprehensive talk on the Zygopetalum alliance and finished with some great cymbidium photos.

Next meeting: 21st September when Chris Heysen will speak on 'His Life's Journey with Orchids'.

Judges: Graham Zerbe, Noel Oliver and John Gay.

Plant of the Day and Popular Vote: Cym. Tom Thumb 'Caliope' benched by Eileen Pinnock.

August Plant Commentary

FLOWER OF FIRST DIVISION AND FLOWER OF THE NIGHT: (There were 35 plants benched in first division.) *Dendrobium* Hewitt Glow was grown by Michael Willoughby & Oui Ju. What cheeky little flowers of yellow, white labellum and finely dotted in burgandy. This Plant boasted having 33 inflorescences with at least fourteen flowers each, Michael & Oui what a credit to you both.

FLOWER OF OPEN DIVISION: : (There were 14 plants in open division.)

Dendrobium Victorian Bride 'Genesis' was grown by Lesley & Robert Gunn. This plant carried 2 tall and 2 smaller inflorescences flowers white, petals thickly edged in purple with a scattering of fine dots of the same colour. These lovely little flowers really stood up and looked at you. Thank you Lesley & Robert for sharing this lovely plant with us.

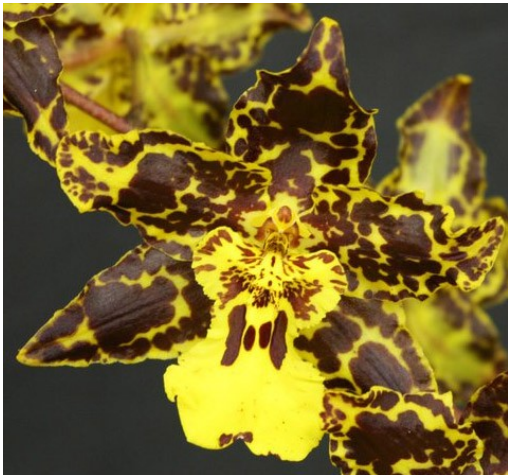

August Plant Commentary (cont.)

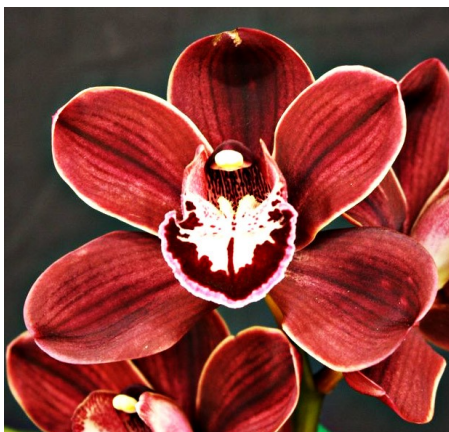

FLOWER OF SECOND DIVISION: (There were 26 plants benched in second division). *Cymbidium* Wallamurra 'Ninja' .was grown by Paul & Donja Hayes, this plant possessed one inflorescence, 7 incredible flowers brown/red in colour, all petals were feathered around the edges, white labellum heavily patterned in burgundy with a flush of yellow. Paul & Donja what a lovely orchid.

POPULAR VOTE WINNER: *Wilsonara* Pai Chin 'Flying Tiger' was grown by Daniel & Andrew Lutz. This orchid had one very tall inflorescence with seven flowers, the colour being a beautiful yellow very heavily patterned in a really dark brown with the yellow showing through in patches and to set this all off was a yellow labellum also having markings in a lighter brown. Daniel & Andrew you have a really eye catching orchid.

SEEDLING OF THE NIGHT: *Cymbidium* (Dorothea Page x Yowie Pepper) grown by Des & Hazel Allsop. One inflorescence with four large flowers. The colour of burgundy/brown with self striping on the petals, and to set it off of a thickly edging of burgundy around the labellum and lightly dotted and a smudge of pale pink/brown. Des & Hazel congratulations on this lovely seedling.

WINTER SHOW 26/7/14 TO 2/8/14

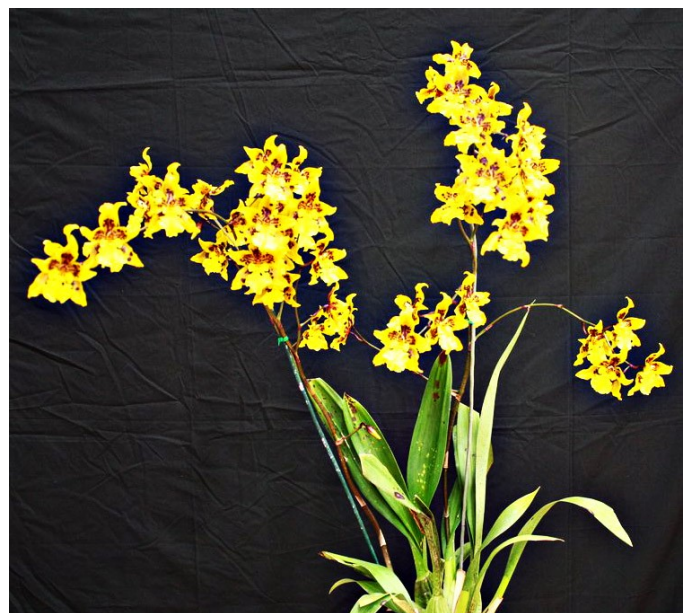

The Judging of the Winter Show took place on a cold winter's day at the Hamilton School Basketball Stadium. We had 105 high quality orchids with a good range of genus and a great variety of colour which made a wonderful display for everyone to come and enjoy. There were many comments from the public wishing they could walk out their back door and have an array of colour like this to greet them. I would like to take this opportunity to congratulate those members whose orchids were prize winners as well as all of the members who supported the Show with their orchids and their help, because without your support there would not be a show.

GRAND CHAMPION, CHAMPION SECOND DIVISION CHAMPION OTHER GENERA NOT OTHERWISE LISTED and CHAMPION SPECIES:

Well what a wonderful addition this orchid was to our Winter Show. *Coelogyne. Mooreana.* var. Brockhurst was grown by Paul & Donja Hayes. This delightful orchid had two gently arching inflorescences; one with eleven flowers other with seven flowers. The flower shape was typical of this species, a colour of pearl white petals and a deep gold labellum. Congratulations Paul & Donja, this orchid has served you well.

CHAMPION OPEN DIVISION: Grown by John & Bev Gay *Odontocidium.* Tiger Crow 'Golden Girl' which had two very tall branching inflorescences with 28 plus flowers on each, a deep brown patterned up to a lovely gold tips of the petals and a solid gold labellum. A really eye orchid John & Bev.

Winter Show Plant Commentary (cont.)

CHAMPION AUSTRALIAN NATIVE, BILL MURDOCH TROPHY NOMINATION and LES NESBIT TROPHY AWARD: *Dendrobium teretifolium* was grown by Noel Oliver. A great display of 100 plus spidery little flowers with green sepals. A really charming orchid Noel.

IRA BUTLER TROPHY NOMINATION and REG SHOOTER TROPHY AWARD (HYBRIDS) was *Dendrobium* Alick Dockrill grown by John & Bev Gay. This orchid boasted 17 inflorescences, flowers a pale yellow with thin petals white labellum with a burgundy blush around the throat. A very showy plant John & Bev.

CHAMPION ZYGOPETALUM: *Zygopetalum* Titanic with attractive dappled petals and a stand out purple striped labellum grown by John & Bev Gay. Congratulations to you both.

CHAMPION LAELIINAE: *Laelia Cattelya* Roman Bouquet was grown by Ron & Irene Parish. Flowers a pink/purple clusters. A very attractive orchid.

CHAMPION SPECIMEN: *Dendrobium* Jesmond Sparkler 'Greg Hall'. This amazing specimen was grown by John & Bev Gay. Beautiful green flowers and the labellum both heavily edged in burgundy. A pleasure for everyone to enjoy.

CHAMPION PAPHIOPEDILUM: *Paphiopedilum* British Bulldog 'Personality Peter' grown by Bill Jayne. Well done on your win.

CHAMPION FIRST DIVISION and CHAMPION CYMBIDIUM under 60mm: *Cymbidium* One Tree Hill 'Doris'

CHAMPION CYMBIDIUM 60– 90mm: *Cymbidium erythraeum* 'Paradise'

CHAMPION CYMBIDIUM over 90mm: *Cymbidium* Lancashire Khan 'Evie'

The 3 previous plants were all grown by Oui Ju & Michael Willoughby. Congratulations Oui & Michael. What an incredible win for you both.

CHAMPION SEEDLING: *Cymbidium* Cadel Evans grown by Oui Ju & Michael Willoughby. Another beautiful plant from the unstoppable duo. This seedling had eight lovely shape flowers, a deep brown.

Sue Zerbe
Registrar of Judges

The Display at the Arndale Winter Show

Orchid Culture Notes for September

Spring at last! This winter gone was a cold one. It was great for the fruit trees but not that flash for humans and orchids alike. The extra warmth in the sun and the ever increasing fine days remind us that the busiest time of the year is now upon us. We have the spring shows, we have lots of flowers and of course it will soon be time for the important maintenance of our collection. Question, where to start! Whilst it is nice to view the spring flush it is also the time of year that we need to plan for the year ahead. What plants will we cull? pot on or divide. Pest problems also build up as do fungal problems. I still sit back and wonder why subject myself to all of this. When I sit down in the shade house after a hard week of work surrounded by a heap of flowers and all the wonderful fragrances it is not that hard a question to answer.

September weather is quite changeable, and this gets worse over the next two months as the seasons change. It can range from freezing cold to stinking hot in a short space of time, even this early in the season.

There will be many plants that did not flower so questions must be asked. Where did I go wrong? What made plant this plant flower well yet the other one did not. Was it the season? Here I was early in the year suggesting that this year would be a great one for the natives, how wrong I was, but good to know I was not alone. I suppose the relentless heatwaves of summer past had something to do with it.

September will see more and more plants emerge out of dormancy. There will be new growth starting to show and new green tips emerging from white roots that sealed off some time ago. Don't be in a big rush to hit them with gallons of water and fertiliser. Changes of seasons happen gradually and not overnight. This is so easy to do when you hit that first warm day. Gradually increase the water and feeding as they grow and the seasons change. Try and water late morning or early afternoon at the warmest part of the day with plant to give the plants dry by nightfall. Tap water is still very cold and you can still get frosts for at least another month yet.

Damping off of new growths is common this time of year and water is usually the culprit. If you can, try and water the pot, not the plant. This is easy with a small collection and very hard with large collection. If you do get water into a new growth, try to dry it. Blowing thru a straw or using tissue paper whist fiddly, may save a growth. By month's end the sun will be on the south side of the equator and with the closeness comes the intensity and heat. Plants in full sunlight over winter will be moved under 50% shade, those hung high in the shade house are lowered and those that prefer shade are moved accordingly. The sun will rise in a more easterly aspect and set in the west and soon rise in the SE and set in the SW. The change in aspect will also mean plants in winter shade can be exposed to spring and summer sun and this will burn them.

Pests will abound overnight. New crops of caterpillars and aphids are lining up for the new seasons growth. Slugs and snails continue to feast so they can fatten up before summer dormancy. This year botrytis has been bad, a week of cloud and drizzle in July setting up a bad infestation. Soon rust will be on the increase, whilst not a huge problem with orchids, it can cause problems. Scale will start their breeding season. The juvenile nymphs are quite mobile and are looking for new growths. They suck out the goodness from the plants leaves and leave marks. Any marks on the new growths will be exaggerated as they grow larger.

Summer weeds will soon increase, its oxalis time! Pull these out when small and when re potting or dividing make sure all weeds are removed.

Start dividing your plants soon after flowering. I would wait until later in the month when the warmer weather has arrived, but if potting on, you can do this anytime as the plants root system suffers little from the disturbance. Remove flower spikes from weak plants or those you intend to bust up. Weak plants need all the help they can get and maintaining a flower produced in a stress related situation will not help them recover. With plants you will divide I work on the theory of the longer growing season they have the better they will be, so why leave a spike on for ages when that extra time may give them a good chance to establish to flowering size next year.

Native epiphytes have had another strange year with many plants in active growth all year. They are now in flowering mode and those that grow *Sarcophilus* should have spikes lengthening. I don't think this year will be a good one for sarcs. Not if my collection is any indication. Even now, I still have leaf drop from January's heatwaves. At the same time I have single growth plants that have lost the main growth throwing out numerous side shoots. Some of these plants can be quite shy at doing this and removing a primary growing tip is a practice recommended for the experienced or the brave but when nature dishes this treatment out you take your chances. I'll get a few specimens out of this! Watering is when they need it and generally subject to the weather for plants in the open and those under cover are watered and fed weekly. If it remains dry then give them a drink, but if the weather remains wet, then they won't need any additional water.

Natives respond well to a drink of limewater this month at the rate of 1 gram per litre for those grown in bark. Fungicides sprayed on the new growths help stop spotting and damping off due to botrytis. Watering for plants that were dormant should be gradual over this month. Look for signs of movement such as new growths and roots. A few pellets of rapid raiser or blood and bone on the surface of the natives works well. Don't overdo as they will break down and form sludge in the mix that accelerates breakdown.

Orchid Culture Notes for September (cont.)

Keep feeding *Zygopetalums* with high nitrogen feed until the new growths bulb up and observe for any papery marks on the leaves that will have a looper caterpillar chewing away happily underneath! Cut off old flower spikes and try and finish any division this month. *Oncidiums* and *cattleyas* will show new root growth and growth nodes. Gradually increase watering and start feeding when the roots show growth tips. At the moment I am just misting the roots. These two species will sprout roots from the tips of the old roots, the sides of the old roots as well as the old and new growths. Try and hang all *oncidiums* above the *cymbidiums* as they love stronger light and air movement. It is still a bit early to attempt any division of these two genera.

For those who grow terrestrials September and October are peak months. Keep moist and give them a weak feed with an organic feed. Two spotted mites have been bad this year so if your flowers are slightly distorted or the leaves looking a bit brown on the edges, there is a good chance that the mites have found them. Once they have finished flowering you can slowly dry off the plants.. Keep an eye out for rot in the leaves caused by being too wet. Remove them and spray with a fungicide. If the rot gets into the tubers it usually spells the end of the plant..

Next month is October and is a very busy month as we strive to finish re potting and division so to give our plants to settle down before the heat of summer. We will spend some time here with some useful tips on how to re pot, divide and how we look after them.
