TE

We are building a community of learners that will enjoy an inviting and innovating atmosphere for all.

Learners will be encouraged to discover their ambitions and "SEEC" to educate themselves and support each other in the development of innovative solutions to the coming economy of globalization in a fun and safe environment that fosters learning.

techequation.org

We are developing a framework for outreach to the community, joining local education institutes with local leaders, people who care.

We see local youth as individuals striving for opportunities.

We believe that students should be aided in their advancement of both personal and academic goals and by providing students with resources, mentorships, and venues for project-based learning that meets them at most levels.

Career Technical Education (CTE) Pathway

Class-based

| STEM | Atomic Brain |

Tier 1

Project-based

| TIC: Technology Innovation Center | TOC: Technology Occupation Continuum |

Tier 2

Our purpose
Prepare students for immediate entry into the workforce through performance mentoring in the after-school space.

Club Projects
Our aim is to match student life to our basic formula for progressive learning.
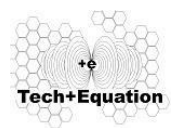

(1) Science Education + Experience + Camaraderie

or

(2) $SE + E + C = SEEC$
