

Epax® Product List

Marine Omega-3 Concentrates

Epax® specializes in high-quality, ultra-pure Omega-3 concentrates. All our products meet, or exceed, known regulatory standards on purity.

Our TGN range represents a premium form of TG oils with min. 90% triglycerides (the natural form of lipids in fish), thereby minimizing the content of other glycerides, and residues of ethyl esters. In addition, our TGN range is deodorized for the best possible organoleptic profile.

Epax® uses IP certified antioxidant solutions in order to guarantee that our products are 100% GMO-free.

Our facility is cGMP-certified, US FDA inspected for manufacture of Pharmaceutical Intermediates, and approved by the Norwegian Medicines Agency for manufacture of Active Pharmaceutical Ingredients (APIs).

In addition to the standard products featured on this list, we offer a wide range of customer-specific formulas.

PRODUCT GROUP	PRODUCT NAME	EPA mg/g minimum values	DHA mg/g minimum values
