

LUFTECH™

Maximizes Glyphosate Tank Mixes

LUFTECH™ is a low use rate, activator adjuvant blend designed to maximize the performance of glyphosate, and its tank mix partners, on hard-to-control weed species. LUFTECH effectively replaces the need for ammonium sulfate with glyphosate and glyphosate tank mixes by sequestering antagonistic hard water ions, maximizing cuticle penetration of both water-soluble and oil-soluble herbicides, and protonating weak acid herbicides for rapid absorption and transportation.

Product Information

Functions and Benefits:

- Unique formulation of water conditioning agents, surfactants and paraffinic oil
- Protects glyphosate from antagonistic metal ions that reduce performance
- Contains surfactant and sulfate ions to accelerate glyphosate uptake
- Paraffin based oils to improve uptake of oil-soluble tankmix partners used for resistant weed control
- Ideal for use with clethodim and a wide range of glyphosate tank mixes
- Convenient, low use rates means less product to handle and store

Use Rate:

- 1-3 qts per 100 gals

Packaging:

- 2 x 2.5 gallons per case
- 275 gallon mini bulks
