About Our Product

Our core commitment is to deliver top-notch quality, maintained through strict adherence to high standards.

Among our notable offerings are various Indian dry chili varieties, including MAHY (encompassing all strains grown in MP), TEJA (S17), 334 (S10, S4, SANAM), 341, and 5531 (SYNGENTA). MAHY and Teja stand out as high-pungency chilies, boasting over 70,000 SHU, while 334, 341, and 5531 represent the milder segment.

Our range caters to diverse preferences, with options available both with and without stems, and spanning the spectrum from intense to sweet flavors. Embracing both IPM and conventional categories, we offer versatility to suit various preferences.

While the chili world offers a broad array of varieties, we prioritize highlighting those favored by international buyers when sourcing from India.

TEJA / S17

Teja, also known as S17, enjoys popularity among international buyers as a preferred chili variety.

In India, it remains available throughout the year due to significant quantities stored in cold storage by farmers and stockists, although the new crop typically arrives between January and April.

Teja chilies are prized for their impressive SHU value, flavor, color, and cost-effectiveness. They are slender and lightweight, requiring only a small amount to impart spiciness to dishes.

Consequently, there is a strong demand for Teja chili, particularly cultivated in Andhra Pradesh and Telangana, the primary regions for its production in India.

SANNAM / 334 / S4

Sannam chili, predominantly cultivated and processed in Guntur, Andhra Pradesh, flourishes in warm, humid climates.

Renowned for its distinctive attributes, often referred to as S4, it is prized for its spiciness and capsaicin content. Sannam chili boasts a thick skin, garnering recognition both domestically and internationally.

Rich in Vitamin C (185mg/100g) and Protein (11.98g/100g), it offers notable nutritional value.

The peak harvesting season extends from December to May.

Byadgi

This chili variation stands out for its minimal seed content and thick, wrinkled dark red skin.

Known as a premium Guntur chili in India, the Byadgi Chili typically boasts a vibrant red hue. Highly sought-after by international buyers, it's particularly valued for its ability to enhance the flavors of stir-fries, soups, and stews.

These dried red chilies are incredibly versatile, adding both spiciness and vivid color to a wide range of dishes.

Key cultivation regions for Byadgi chili in India include Andhra Pradesh, Maharashtra, Karnataka, Orissa, and Rajasthan, with Guntur serving as the primary market for red chilies.

5531 SYNGENTA

The Syngenta 5531 Chili stands out as a chili type known for its moderate spiciness, positioning it between the intense heat of Teja and the milder profile of 355 Byadgi. One of its distinct features is its vibrant, rosy, bright red color, which greatly enhances its visual appeal and makes it highly coveted.

This chili variety offers a harmonious blend of flavor and heat, making it suitable for a wide range of culinary uses. Additionally, it adds an attractive, vivid red tint to dishes, enhancing their overall presentation.
