Intelligent Automation Stack

Connecting the Physical World to Digital Intelligence, and Turning Insights into Automated Action.

SENSE. UNDERSTAND. REASON. ACT.
A COMPLETE STACK FOR END-TO-END
INTELLIGENT AUTOMATION.

1 SENSE
Capture the Real World

- **RFID** — Track & Identify Assets
- **IoT** — Connect Devices & Sensors
- **AI Vision** — See & Recognize
- **Biometrics** — Verify People & Access

2 UNDERSTAND
Turn Data into Knowledge

- **AI & Machine Learning** — Analyze & Extract Insights
- **RAG** — Access Enterprise Knowledge
- **Document Intelligence** — Read, Classify & Validate
- **Knowledge Agents** — Learn from Structured & Unstructured Data

3 REASON
Make Decisions with AI

- **Agentic AI** — Plan, Reason & Decide
- **Rules & Policy Engine** — Apply Business Rules
- **Decision Intelligence** — Evaluate Options & Recommend
- **AI Agents** — Specialized Agents for Business Skills

4 ACT
Automate End-to-End

- **RPA** — Execute Tasks Across Systems
- **Workflow Automation** — Orchestrate End-to-End Processes
- **ERP / API Integration** — Connect with Enterprise Systems
- **Human-in-the-Loop** — Escalate, Validate & Improve

boteye™

AGENTIC AI | AUTOMATION | COMPLIANCE | REAL BUSINESS IMPACT

See It. Understand It. Act on It.

Connecting your physical operations with your digital systems using RFID and Agentic AI.

Physical + Digital Automation

From Physical Event to Digital Action

RFID captures what happens in the real world. BOTeye understands it, applies business rules, and takes action across your systems.

1 RFID Detects Physical Event

- RFID tag on pallet/bag/asset is read automatically
- Captures location, time and asset identity
- Works at gates, conveyors, warehouses and production lines

PHYSICAL EVENT CAPTURED

2 BOTeye Identifies Inventory Event

- BOTeye receives RFID data
- Identifies event type (e.g. gate-in, move, dispatch)
- Enriches with master data (item, batch, supplier, order)

EVENT IDENTIFIED

3 AI Agent Evaluates Business Rule

- AI Agent applies business, compliance and risk rules
- Checks for exceptions (e.g. wrong item, wrong location, unauthorized movement)
- Can use historical data, demand plans and other context

RULES APPLIED (EXCEPTIONS CHECKED)

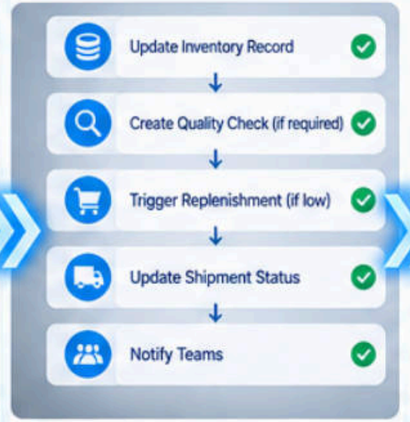

4 ERP / WMS Updated

- Inventory, location and status updated in ERP/WMS in real time
- Reduces manual data entry
- Keeps physical and digital records always in sync

SYSTEM UPDATED

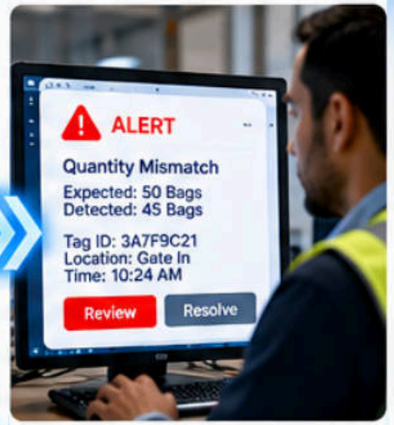

5 Workflow Initiated

- BOTeye triggers downstream workflows automatically
- Can create tasks, approvals, notifications or integration actions
- Works across ERP, WMS, MES, email and other systems

WORKFLOW EXECUTED

6 Human Notified Only When Required

- Humans are notified only when exceptions, approvals or decisions are required
- Reduces manual workload
- Enables faster, more focused decision making

EXCEPTION HANDLED BY HUMAN

KEY BENEFITS

Real-time visibility
Know exactly where

Faster operations
Reduce manual

Lower operational cost
Fewer manual

Higher accuracy
Eliminate human

Stronger compliance
Automated audit

Better decisions
Data-driven insights

Scalable solution
Works across sites,

boteye™

AGENTIC AI | AUTOMATION | COMPLIANCE | REAL BUSINESS IMPACT

RFID & Intelligent Operations

Real-Time Visibility

Track • Locate • Verify • Trace • Automate

Warehouse Inventory

- Real-time stock visibility
- Track by location, batch and expiry
- Reduce stockouts and overstock

WIP Tracking

- Track WIP across production stages
- Monitor line movement and cycle time
- Improve production planning

Manufacturing

- Track raw materials, components and tools
- Monitor machine utilization
- Improve operational efficiency

Finished Goods

- Track finished goods by pallet, batch and order
- Faster dispatch and order fulfillment
- Ensure product traceability

Pallet & Container Tracking

- Track pallets and containers
- Monitor movement and location
- Tamper-proof tracking with RFID seals

Asset Tracking

- Track forklifts, tools, MHE and equipment
- Monitor usage and location
- Improve asset utilization and maintenance

Logistics

- Track shipments in real time
- Monitor route and ETA
- Improve supply chain visibility

Ports & Customs

- Track containers and cargo
- Automate gate verification
- Support customs compliance and audit trails

Airline Baggage

- Track bags through every checkpoint
- Reduce mishandling and lost baggage
- Improve passenger experience

Supply Chain Visibility

- End-to-end traceability
- Real-time multi-site visibility
- Better planning, lower risk
- Support sustainability and compliance

1 RFID EVENT (Physical World)

- Pallet detected at gate
- Item scanned on line
- Container arrives at port
- Asset moves location
- Baggage passes checkpoint

2 BOTeye AGENT (Understand & Reason)

- Reads and validates RFID data
- Combines with enterprise data (ERP/WMS/MES)
- Applies business rules and compliance checks
- Detects exceptions and anomalies
- Determines next best action

3 BUSINESS ACTION (Digital World)

- Update ERP
- Update WMS
- Create Work Order
- Trigger Workflow
- Send Notification
- Escalate Exception

Human Notified Only When Required

KEY BENEFITS

Real-time visibility
Know where your assets

Higher efficiency
Faster processes

Lower operational cost
Less shrinkage

Improved accuracy
Eliminate human

Better decisions
Data-driven insights

Enhanced compliance
Complete audit trails

Human-in-the-loop when needed
Focus people on

Scalable across operations
Works across sites,

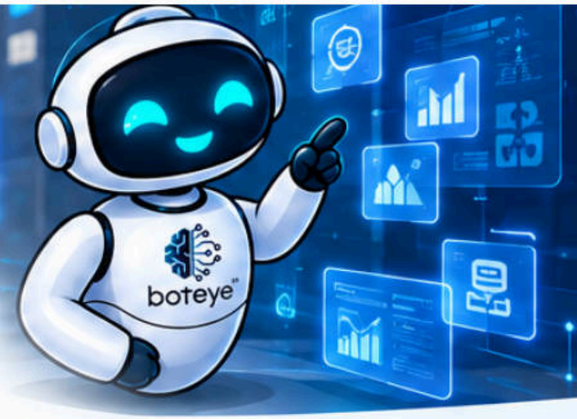

boteye™

AGENTIC AI | AUTOMATION | COMPLIANCE | REAL BUSINESS IMPACT

BOTeye

The Agentic Automation Platform

AI Agents that understand, reason, decide and act.

From **Information to Intelligent Action.**

Connect your data. Deploy AI Agents. Automate work. Achieve real outcomes.

1 ENTERPRISE DATA

Connect all your information sources

- **Documents** — PDF, images, scanned files
- **Emails** — Inbox, shared mailboxes
- **ERP** — SAP, Oracle, Microsoft, etc.
- **CRM** — Salesforce, Dynamics, etc.
- **Web** — Web portals and external sources
- **WhatsApp** — Customer and operational messages
- **Voice** — Calls, voice notes, recordings
- **Knowledge Base** — Policies, SOPs, manuals, internal data

2 BOTeye

AI Agents + Agentic Workflows + RAG + Governance

boteye™

THE AGENTIC AUTOMATION PLATFORM

- **AI Agents** — Specialized agents for different tasks
- **Agentic Workflows** — Plan, orchestrate and execute multi-step tasks
- **RAG (Knowledge)** — Use your enterprise knowledge
- **Governance** — Security, Compliance, Observability, Human-in-the-loop

Document Agent | Compliance Agent | Data Agent | Operations Agent | Customer Agent | Reporting Agent

Supervisor Agent

Understands goals | Assigns tasks | Monitors progress | Ensures governance

3 BUSINESS ACTIONS

Automate work across your systems

- **ERP** — Create, update and synchronize records
- **CRM** — Update customer data and interactions
- **Email** — Send responses, notifications and reports
- **Workflow** — Trigger and execute business processes
- **Notifications** — Alert teams via email, SMS, WhatsApp, etc.
- **Approvals** — Route for review and capture decisions
- **Reports** — Generate and distribute reports

KEY BENEFITS

- **Higher productivity** — Automate repetitive work and manual tasks
- **Faster turnaround** — Reduce cycle times from days to minutes
- **Lower operational cost** — Do more with the same team
- **Greater accuracy** — Reduce human errors
- **End-to-end visibility** — Track work, status and outcomes
- **Stronger compliance** — Built-in governance, audit and control
- **Scalable growth** — Handle higher volumes without increasing headcount

boteye™

AGENTIC AI | AUTOMATION | COMPLIANCE | REAL BUSINESS IMPACT

BOTeye Platform

Four powerful modules. *One integrated platform.*

From data to decisions, BOTeye helps you automate, streamline and scale your business.

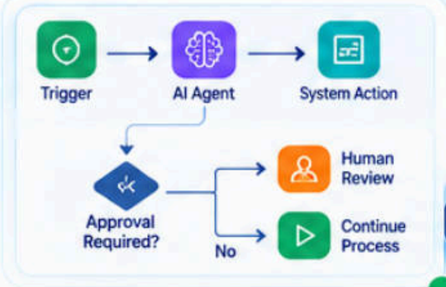

Turn Information Into Action.

- Understand your business
- Automate complex work
- Make better decisions
- Drive real outcomes

01 Agentic Workflows

Orchestrate end-to-end business processes.

- Design complex, multi-step workflows
- Orchestrate AI agents, RPA and human tasks
- Integrate with ERP, CRM and other systems
- Built-in approvals, rules and exception handling
- End-to-end visibility and audit trail

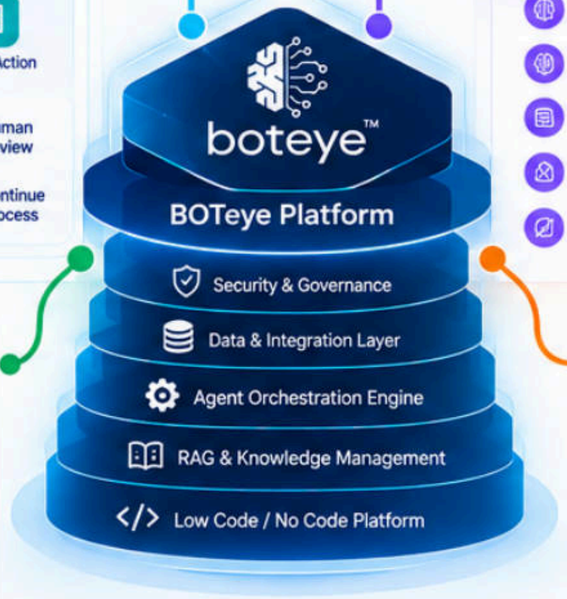

02 AI Agents

Specialized agents for specific business skills.

- Domain-specific AI agents (e.g. KYC, Finance, HR)
- Understand, reason, decide and act
- Work with enterprise data and tools
- Collaborate in an agentic swarm
- Continuously learn from feedback

KYC Agent · Compliance Agent · Finance Agent · Procurement Agent

HR Agent · Customer Service Agent · Trade Compliance Agent · Knowledge Agent

03 Intelligent Document Processing

Capture → Understand → Validate → Decide → Act.

- Process structured and unstructured documents
- Extract, classify and validate data
- Cross-document and cross-system checks
- Apply business rules and compliance policies
- Trigger next action in the workflow

Capture → Understand → Validate → Decide → Act

04 AI Applications

Industry-specific applications built on the BOTeye platform.

- Pre-built AI applications for key industries
- Faster deployment with proven use cases
- Configurable to your business needs
- Integrates with your existing systems
- Scalable and continuously evolving

Banking & Financial Services · Insurance · Logistics & Ports · Manufacturing

Retail & FMCG · Government & Public Sector · Healthcare · Real Estate

KEY BUSINESS BENEFITS

Higher productivity
Automate repetitive and complex work

Lower operational cost
Do more with the same team

Faster turnaround time
From days to minutes

Greater accuracy
Reduce human errors

End-to-end visibility
Track work, status and outcomes

Stronger compliance
Built-in governance, audit and control

Scalable growth
Handle higher volumes without increasing headcount

boteye™

AGENTIC AI | AUTOMATION | COMPLIANCE | REAL BUSINESS IMPACT

Different Industries. Real Outcomes.

Industry Solutions

Purpose-built for your industry. Powered by Agentic Ai.

Combine RFID, Intelligent Document Processing, AI Agents and Automation to solve real business problems.

Banking & Financial Services

Compliant. Efficient. Secure.

KEY USE CASES

- KYC & Customer Onboarding
- AML Transaction Monitoring
- Trade Finance Document Processing
- Reconciliation & Matching

KEY OUTCOMES

- Faster onboarding
- Lower compliance risk
- Improved operational efficiency
- Better customer experience

Insurance

Faster Claims. Better Service.

KEY USE CASES

- Claims Processing
- Underwriting Automation
- FNOL (First Notice of Loss)
- Document Processing & Validation

KEY OUTCOMES

- Reduced claims cycle time
- Improved accuracy
- Lower operational costs
- Enhanced customer satisfaction

Manufacturing

Visible. Efficient. Connected.

KEY USE CASES

- WIP Tracking
- Inventory Management
- Quality Inspection
- Asset & Equipment Tracking

KEY OUTCOMES

- Real-time production visibility
- Lower inventory costs
- Improved product quality
- Reduced equipment downtime

Logistics & Ports

Track. Clear. Deliver.

KEY USE CASES

- Container & Shipment Tracking
- Customs Documentation
- Freight Management
- Warehouse Operations

KEY OUTCOMES

- Real-time shipment visibility
- Faster customs clearance
- Reduced manual processing
- Improved supply chain efficiency

Government

Efficient Services. Greater Trust.

KEY USE CASES

- Citizen Services Automation
- Compliance & Regulatory Monitoring
- Revenue Collection & Processing
- Document Processing & Archival

KEY OUTCOMES

- Faster citizen service delivery
- Improved compliance
- Increased revenue efficiency
- Greater transparency

Real Estate

Smarter Operations. Better Experiences.

KEY USE CASES

- Document Management
- Property Operations
- Customer Service Automation

KEY OUTCOMES

- Faster document processing
- Better property management
- Improved customer experience
- Reduced operational costs

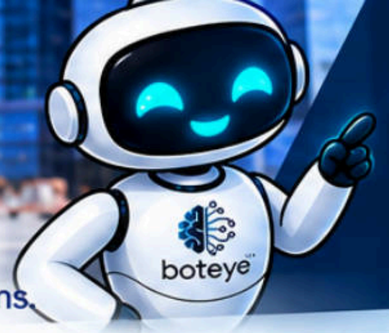

Higher Productivity | Lower Operational Cost | Improved Accuracy | Faster Turnaround Time | Stronger Compliance | Better Decision Making | Enhanced Customer Experience | Scalable Across Industries

boteye™

AGENTIC AI | AUTOMATION | COMPLIANCE | REAL BUSINESS IMPACT

Selected Solutions / Use Cases

Industry-ready solutions built on the BOTeye platform to solve real business problems.

Real Solutions. Real Impact.

Pre-built, configurable and scalable solutions for faster business value.

BOTeye TradeGuard AI

Trade compliance & HS classification

- AI-powered HS code classification
- Trade compliance and regulatory screening (sanctions, restricted items)
- Document validation (invoices, packing lists, certificates)
- Risk scoring for TBML and fraud
- Automated customs declaration support

KEY BENEFITS

- Faster clearance and reduced delays
- Higher classification accuracy
- Lower compliance risk
- Reduced manual effort

BOTeye Insure360

End-to-end insurance automation

- FNOL capture (email, web, app, WhatsApp, voice)
- Document processing and validation
- Claims assessment and triage
- Underwriting support
- Automated workflow and stakeholder coordination

KEY BENEFITS

- Faster claims processing
- Improved accuracy and fraud detection
- Better customer experience
- Lower operational costs

BOTeye Intelligent Document Processing

Capture → Understand → Validate → Decide → Act

- Multi-format document ingestion (PDF, images, emails, scans)
- AI-powered data extraction and classification
- Cross-document validation and consistency checks
- Business rule application and decisioning
- Trigger workflows and system updates

KEY BENEFITS

- Eliminate manual data entry
- Higher accuracy and consistency
- Faster processing and turnaround
- Scalable across document types

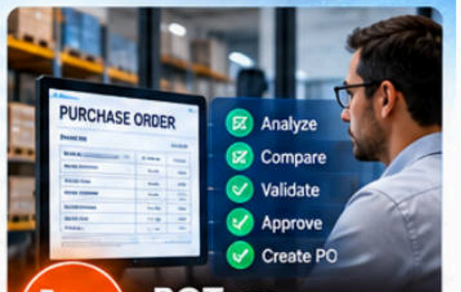

BOTeye KYC & Onboarding

Faster, safer and compliant customer onboarding

- Identity verification and document processing
- AML, sanctions and PEP screening
- Risk assessment and scoring
- Customer data validation and deduplication
- Automated onboarding workflows with approvals

KEY BENEFITS

- Faster customer onboarding
- Stronger compliance and lower risk
- Reduced manual checks
- Better customer experience

BOTeye Procurement

Smarter, faster and more compliant procurement

- Vendor onboarding and due diligence
- Purchase request and approval automation
- PO processing and 3-way matching (PO, GRN, Invoice)
- Contract and spend compliance
- Supplier performance monitoring

KEY BENEFITS

- Reduced procurement cycle time
- Better spend control and compliance
- Fewer errors and fraud risk
- Improved supplier management

OVERALL BUSINESS IMPACT

- Higher productivity
- Lower operational cost
- Faster turnaround time
- Stronger compliance
- Improved accuracy
- Better customer experience
- Scalable across industries

RFID Use Cases in Supply Chain & Warehousing

Real-Time Visibility | Accurate Inventory | Faster Operations | Lower Costs

BOTeye
TRACE • THINK • ACT

- **Real-Time Asset Visibility**
- **Accurate Inventory**
- **Faster Receiving & Dispatch**
- **Reduced Losses and Errors**
- **Higher Operational Efficiency**
- **Better Traceability & Compliance**

1 Inbound & Receiving

- Automatic identification of incoming goods and pallets
- Faster receiving and put-away
- Verification against purchase orders
- Eliminates manual barcode scanning

2 Inventory Tracking

- Real-time location of stock
- Accurate stock counts
- Track by item, carton, pallet or case
- Identify slow-moving and overstock

3 Warehouse Operations

- Automated pick, pack and ship
- Guided picking with RFID readers
- Track work-in-progress (WIP)
- Reduced picking errors
- Improved labor productivity

4 Asset & Equipment Tracking

- Track forklifts, tools, pallets and returnable containers
- Prevent loss and misplacement
- Monitor utilization and location
- Support maintenance scheduling

5 Shipping & Dispatch

- Automatic verification of outgoing goods
- Ensure correct items and quantities
- Faster loading and dispatch
- Audit trail for shipments

6 Returns & Reverse Logistics

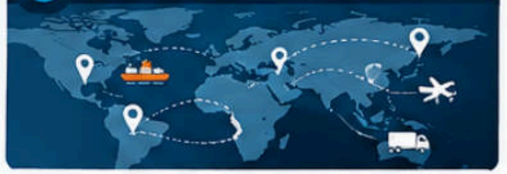

- Quick identification of returned items
- Validate condition and product details
- Faster restocking or repair process
- Reduce fraud and unauthorized returns

7 Traceability & Compliance

- End-to-end tracking across the supply chain
- Batch and serial number traceability
- Support for recalls and regulatory compliance
- Enhanced food, pharma and high-value goods safety

8 Supply Chain Visibility

- Track goods across suppliers, warehouses and distribution centers
- Real-time status and location
- Integrated view with ERP, WMS and TMS
- Better planning and customer service

REAL SOLUTIONS. REAL OPERATIONS. MEASURABLE IMPACT.

Proven in Real-World Operations

From Customs and Manufacturing to Aviation and Enterprise Deployments, ICILtek's RFID and BOTeye solutions have been implemented in mission-critical environments.

boTeye™

Pakistan Customs

3-State RFID Container Tracking

Nationwide RFID-based container tracking solution with centralized monitoring.

3 States Tracked
Port Entry | In-Transit | Port Exit

Centralized Monitoring
Real-time visibility across locations

Enhanced Security
Reduced manual intervention and improved compliance

Toyota

WIP / Inventory / Finished Goods Tracking

RFID tracking for Work-in-Progress, inventory and finished goods across the manufacturing plant.

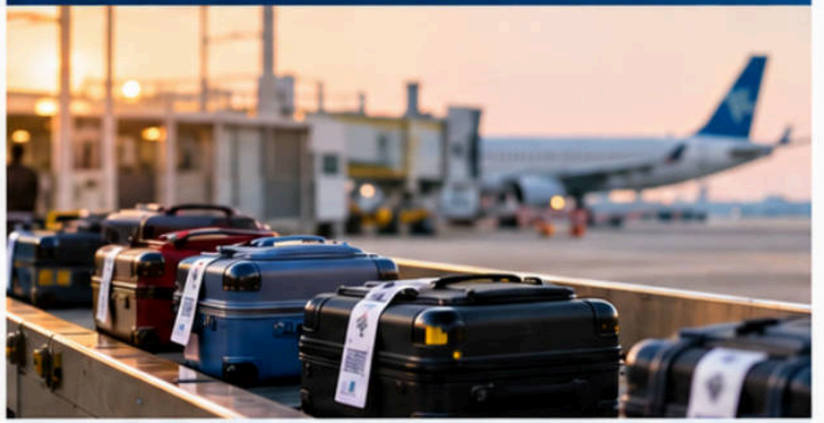

Real-Time Visibility
WIP, inventory and finished goods

Improved Operational Efficiency
Streamlined production and inventory control

Accurate Asset Tracking
Reduced manual errors and better traceability

Airline Logistics

RFID-enabled Baggage Visibility

RFID solution for baggage tracking and visibility in airline operations.

End-to-End Visibility
Track baggage from check-in to loading

Operational Efficiency
Faster handling and reduced misrouting

Improved Customer Experience
Greater accuracy and reliability in baggage tracking

RFID Solutions
Asset, Peoplend Inventory Tracking

Enterprise Software / Integration
ERP, WMS, MES and Custom Systems

Biometric Deployments
Identity and Access Management

Industry Solutions
Customised for Government, Manufacturing, Logistics, Aviation and more

REAL EXPERIENCE. REAL ASSETS. REAL AUTOMATION.

Why ICILtek?

A unique combination of domain experience, physical and digital automation, and industry-focused solutions to deliver measurable business outcomes.

boteye™

01 20+ Years Technology Experience

- 20+ years of technology delivery experience
- Proven track record across multiple industries
- Deep understanding of enterprise operations and automation

02 ICIL Group Heritage

- Established group since 1998
- Strong track record in business information, background screening, debt collection and AML solutions
- Trusted by enterprises and government institutions

03 Physical + Digital Automation

- Automation of physical assets and processes
- End-to-end visibility from physical to digital
- Combines RFID, IoT and AI with enterprise workflows

04 RFID + AI + Agentic Automation

- RFID for real-time asset tracking
- AI and Agentic AI for intelligent decision making
- Automation that senses, understands, reasons and acts

05 Enterprise Integration Capability

- Integration with ERP, WMS, MES and custom systems
- API and enterprise system connectivity
- End-to-end workflow automation across applications and locations

06 Regional Presence

- Presence in Pakistan, UAE (Dubai) and Canada (Toronto)
- Deep understanding of GCC and Middle East markets
- Local partnerships and on-ground support

07 Industry-Specific Solutions

- Proven solutions for Customs, Manufacturing, Aviation, Logistics and more
- Deep domain knowledge and ready-to-deploy use cases
- Configurable for industry-specific requirements

08 Human + AI Governance

- Responsible and secure AI adoption
- Human-in-the-loop processes
- Governance, observability and compliance controls
- Aligned with enterprise risk and regulatory standards

1998

FLEXIBLE ENGAGEMENT. MEASURABLE OUTCOMES.

How We Engage

Flexible engagement models to meet your business needs — from complete solution deployment to managed services, strategic partnerships and specialized resources.

boTeye™

01 Solution Deployment

Complete solution implementation tailored to your business needs.

- End-to-end implementation
- Configuration and integration
- Data migration and testing
- User training and change management
- Ongoing support and optimization

02 Automation-as-a-Service

Managed automation capability with predictable costs.

- Managed RPA and Agentic AI services
- Monitoring and continuous improvement
- Scalable automation capacity
- SLA-driven support
- Periodic reporting and business value measurement

03 Technology Partnership

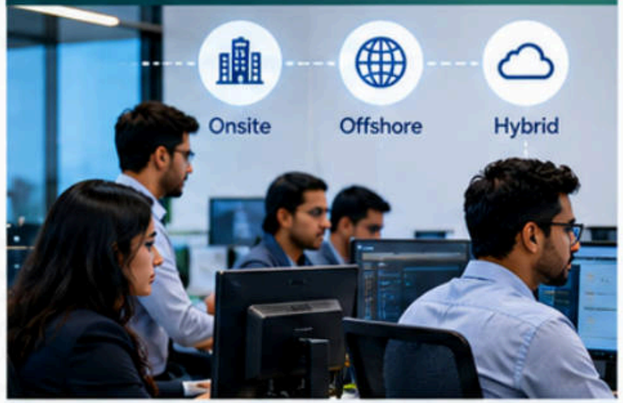

Joint GTM, channel and implementation partnerships.

- Joint go-to-market initiatives
- Channel and referral partnerships
- Co-implementation for strategic customers
- Industry-specific solutions
- Long-term collaboration and growth opportunities

04 Resource Augmentation

Skilled experts to extend your team.

- Onsite experts at your location
- Offshore delivery from our centers
- Hybrid engagement models
- Domain and technical specialists
- Flexible scaling based on project needs

Faster Time to Value | **Scalable Engagements** | **Domain and Technical Expertise** | **Regional Delivery and Support** | **Secure and Governed Delivery**
