

AUDIO GUEST BOOK

White Retro Audio Guestbook

HOW IT WORKS

1. Pick up the receiver and your greeting will be heard.
2. After the BEEP, the recording begins.
3. Return the receiver back to its cradle and the message is saved.

Why an Audio Guest Book?

1. An Audio Guestbook is a unique feature offered at events such as weddings, milestone birthdays and anniversaries, Celebration of Life ceremonies, graduations, and other special occasions. It allows guests to leave a heartfelt and emotional message of congratulations or remembrance for the guest(s) of honor on their special day.
2. Unlike traditional guestbooks, which usually consist of handwritten notes, Audio Guestbooks offer a more personalized and memorable experience by preserving the voice, emotion, and moment of each guest's message.
3. During the event, guests can use a retro phone on display to listen to a pre-recorded introductory message and record their own message. After the event, the guest of honor or event host is provided with an audio file that includes all the recorded messages, allowing them to relive and cherish the memories of their special day.
4. Our Audio Guest Books allow you to capture the real voices of your wedding. The Mother that leaves the sentimental, heartfelt message. The cousin that re-tells that "had to be there" moment from 10 years ago. The drunken groomsman saying something he'll probably regret tomorrow (but has now immortalized forever). Like wedding photos and fine wine.. these voicemails will get better and better with time..
