

# A new phenomenon in women.

## UTERUS DOES THE GENDER SELECTION

Women have alternating boy-girl conceiving cycles.

To get a boy, conceive in boy cycle.  
To get a girl conceive in a girl cycle.

**GOT MULTIPLE BABIES OF THE SAME GENDER?**  
**Balance your family through Gender Specific Conception.**

Dr. Verma's-GSC Method guides you when to try and when to avoid. Now you can conceive a boy or girl as you wish.

We test two mid-cycle urine samples from women to see from where to start. Thereafter, we keep on guiding you when to try and when to avoid, up to 18 months. When you conceive, we find the gender of baby from day-1. The total package is just \$1045. All tests are done on urine samples mailed to us through couriers. No need to travel. Complete guidance is through confidential emails. We never call unless needed.
