Our Vision

Build a safe and open community of creatives, art collectors & technical explorers who feel engaged, rewarded and integral to our journey of discovery into Blockchain as a medium for art

Reward our supporters and incentivise long term holding with exclusive access to unreleased and prototype artwork, new collection whitelisting, community rewards and more..

Eternal Chaos

Holders Club

Holding an Eternal Chaos piece comes with some serious long term benefits!

Automatic NFT drops as community rewards

We are allocating a percentage of all future projects to be rewarded to the EC holders!

By holding an EC piece you have a chance to be airdropped brand new art pieces from new collections during every sale.

This will be demonstrated during Eternal Chaos drop 3 on the 18th February with a brand new prototype project,

Don't worry if you don't have an EC piece yet, our system is dynamic, upon purchase during Drop 3 you will be added to the list of EC holders and will be included in every reward selection from that point

Whitelisting / Pre-sales access

You will be automatically eligible for whitelisting or pre-sales activities on future projects

Eternal Chaos

Holder's Club

continued...

Community Rewards fund

5% of all profits will go into our Community Fund to be given back to EC holders

Charity Fund

5% of all profits will be put aside for charity.
EC holders will help to decide which Charities get the donations

Holder's club discord channels

Access to special discord channels where you get the latest info before anyone else! Details of future projects, new initiatives, collaborations etc

AMA sessions with the team:

We'll be hosting regular sessions with our holders to answer your questions, take your feedback and build an even better and stronger community.

Meet the team

Charles Machin

Visual effects artist / technical art programmer
with over 20 years in the games industry.
Lover of nature and generative art
