

TEACUPPUPPY4SALE.COM  
CONTRACT & GUARANTEE

Your puppy comes with a health certificate and health guarantee and a current vet check examination , vaccinations and deworming schedule .

Teacuppuppy4sale offers a one-year guarantee on all of our puppies starting from the day the puppy is born. This warranty covers any and all life-threatening genetic disorders the puppy is born with that can KILL IT . In order for this guaranteed to be effective your puppy must;

Be given a full examination by a licensed veterinarian within 48 hours working days, from the time of pick up. With the exception of weekends and holidays which do not count as a working day.

A licensed veterinarian must examine your puppy within 48 hours of delivery. If there is a problem our veterinarian will interpret the report and if he concurs a credit will be given which can be use on your next puppy from us.

If you fail to have your puppy check by a licensed veterinarian within the 48 hours of delivery we the seller assumes no further responsibility.

The Warranty will be void and null if the vet visit has exceeded the time limit no exceptions.

It is NOT necessary to send us a copy of your vet visit or your vet bill as we only require the vet records if your new pet should be diagnosed with a life-threatening genetic defect. Your new puppy should be put on a full schedule of parasite preventive care immediately for example ; fleas ,ticks ,lice ,Mites heart worms etc.

Buyer agrees to keep shots and Deworming up to date. Failure to do so can be fatal to your puppy.

We do not cover or have any control over imperfections such as and not limited to : hernias, imperfect bites, or multiple retained deciduous incisors ,crypt orchids, demedex , or any skin conditions. Coccidia, Giardia, and all parasites (or worms of all types), kennel cough, hernia (umbilical, inguinal and diaphragmatic), minor heart murmurs, Luxating patellae , conjunctivitis, steno tic nares , Open fontanel /soft spot and testicles that do not descend .

Some issues are common and animals and are not life-threatening so we do not cover under the warranty. Certain disorders caused by environmental factors for example; allergies, thyroid dysfunction, démodé tic mange, and other autoimmune disorders that are not covered by the guarantee. Any physical problem which is or could be the result of injury is not covered under the warranty as well as the final size , or color or markings, or behavior, or size of any puppy.

Puppies that are shipped are at risk for coccidia in kennel cough which is common in puppies that are shipped and usually caused by bacterias. Kennel cough is self-limiting and like the common cold, it must run its course, full recovery is expected and kennel cough on its own it's not life-threatening, we do not guarantee against hypoglycemia this is out of our control and can happen, especially in tikka puppies. So if you plan to have your puppy shipped instead of picking it up you have to be aware of this. We must be notified at once at the onset of a problem, in writing, with a report from the vet . The puppy must be returned to us in good condition.

Buyer is responsible for transportation cost to and from us.If the puppy is proved to have a life threatening congenital defect within one year and is returned to us all shipping charges are the responsibility of the purchaser.

Guarantee is not valid in case of accidental death or injury unless the lifetime guarantee was purchased at the time of purchase at the cost of \$500 . Lifetime guarantee purchase must be shown at the time of accidental injury death.

All the vet charges incurred by the purchaser are the sole responsibility of the purchaser and under no circumstances will be paid by us at anytime after the puppy has been purchased and in the care of its new owner .

We recommend that your new puppy be kept away from all other animals until your vet says it is safe. Usually two weeks after final puppy shot. Also we do not cover infectious diseases such as Pavo corona and distemper as these

viruses are very contagious and can be caught easily anywhere and everywhere especially at your veterinarians office make sure that they disinfect the surfaces at all times and do not allow your pet to be on the floors of your vet or expose them to public places such as parks , exposing them to other dogs , until all shots are given . this is very important.

Also do not let them miss a meal so that they do not become hypoglycemic, we are not responsible of injury or death occurs due to hypoglycemia within 48 hours or throughout its life.
