

FOR THOSE ON THE RISE, SOME AFFORDABLE SOLUTION IN VERTICAL MOBILITY

FOR THOSE ON THE RISE, SOME AFFORDABLE SOLUTION IN VERTICAL MOBILITY

AEGIS ELEVATORS

Focusing on the problems caused by old and ageing lifts, Aegis Elevators specializes in modernization of old lifts using latest technology in vertical mobility.

Aegis has been transforming old and problematic lifts into new age elevators that come with stainless steel car, gear and gearless machine, rewiring and lop-cop touch. Also the latest technology reduces the electricity bills by 40% to 70% thus helping you to recover the renovation costs in a few years and thereafter savings on electricity bill for life. While new technology enhances the performance, the modern aesthetics enhances the look; thus transforming entire lift from old to gold.

Aegis Advantage

- ☑ Total transformation in 5-30 days
- ☑ Smooth and flawless operations
- ☑ Technologically advanced
- ☑ Aesthetically rich
- ☑ High efficiency
- ☑ Power saving
- ☑ Reduced incidences of break down

Aegis USPs

- ☑ Modernisation increases longevity of the lifts
- ☑ Enhances Safety and Reliability
- ☑ Excellent after Sales and Service

Transform
to new technology

THE CHOICE TO RISE, IS YOURS

THE CHOICE TO RISE, IS YOURS

THE CHOICE TO RISE, IS YOURS

ALL THAT IS OLD IS NOT GOLD

And when it's that old problematic elevator in question, it certainly isn't anything close to gold. Rather, it's a threat to the lives of people using it day in and day out.

More often than not, the old elevators in most buildings - be it residential or commercial, turn into a headache with its recurring problems that never seem to subside. Under the circumstances, modernization of malfunctioning lifts using latest technology is the most viable solution to transform them into advanced contemporary elevators that promise flawless and smooth vertical mobility.

PROBLEMS A Reality No One Can Deny

When lifts age, they show up through a number of impediments that affect the performance of the lift at the cost of residents/users. How often have you or any of your loved ones been stuck up in your apartment lift, giving you goose bumps out of fear and tension until rescued safely? How irritating it is to find that 'Out Of Order' board frequently hanging at the door of your office lift, especially when you are in a hurry to make it for the video conference meeting with the client?

Getting stuck in the middle of nowhere and frequent break downs are just some of the many common problems that old lifts cause due to wear and tear leading to the suffering of the users.

COMMON PROBLEMS WITH OLD LIFTS

- Frequent Break Down
- High Risk of Accidents
- Dysfunctional Door (door remains open)
- Reduced Speed
- Maintenance Issues (lift doesn't stop at certain destination)
- Deteriorated Aesthetic Look
- Huge Electricity Bill
