Smart Infrastructure: The Road to COP28

International Digital Ecosystem Architecture (IDEA)

What Do We Mean By Smart?

Todays Dumb Reality

Fragmented data from multiple sources in the ecosystem that lacks data consistency.

Data has limited value outside the silo

Tomorrows Smart Objective

Consistent data that allows aggregation, administration and analytics of data across industry segments, public or private, domestic or international.

Data is very valuable outside any silo

Smart Meter

An individual digital meter that tracks and distributes energy consumption and provides a data report to stakeholders

Smart Grid

A digital electrical distribution structure that integrates data for energy supply and demand management.

Smart Contract

A digital contract that integrates construction activity data to execution of contract obligations, like progress payments at predetermined benchmarks.

Smart Project

A project where all the contractors and stakeholders are aligned with a digital ecosystem the covers every contract for the entire project.

Smart Infrastructure

A digital distribution structure that integrates data for building and operating all types of infrastructure, from general construction of roads and buildings to agriculture.

Smart Cities

A digital distribution structure that integrates data for all types of physical assets in a community to streamline operations, align public and private data, increase efficiency and improve the quality of life.

Smart Meter

An individual digital meter that tracks and distributes energy consumption and provides a data report to stakeholders

Requires consistent data elements by all participating shareholders

Smart Grid

A digital electrical distribution structure that integrates data for energy supply and demand management.

Requires consistent data elements by all participating shareholders

Smart Contract

A digital contract that integrates construction activity data to execution of contract obligations, like progress payments at predetermined benchmarks.

Requires consistent data elements by all participating shareholders

Smart Project

A project where all the contractors and stakeholders are aligned with a digital ecosystem the covers every contract for the entire project.

Requires consistent data elements by all participating shareholders

Smart Infrastructure

A digital distribution structure that integrates data for building and operating all types of infrastructure, from general construction of roads and buildings to agriculture.

Requires consistent data elements by all participating shareholders

Smart Cities

A digital distribution structure that integrates data for all types of physical assets in a community to streamline operations, align public and private data, increase efficiency and improve the quality of life.

Requires consistent data elements by all participating shareholders

Digital Ecosystems utilize consistent data elements ***to enable the Smart in Smart***

International Digital Ecosystem Architecture (IDEA)

AGENDA
THURSDAY
OCTOBER 26, 2000

4th Annual Construction Financial Management Conference
Sponsored by AGC and CFMA
October 26–27, 2000 ♣ Las Vegas, Nevada

7:00–8:00 am: Continental Breakfast

7:45 am: Welcoming Remarks
William Palmer, Conference Coordinator
Ernst & Young, LLP
San Francisco, CA

1 — 8:00–8:50 am: General Session #1
The Dynamics of Construction Dispute Avoidance and Resolution (SK)
Robert S. Peckar, Esq., Sr. Partner
Peckar & Abramson, River Ridge, NJ
Avoiding disputes and solving the unavoidable disputes goes to the heart of the financial bottom line • Learn about methods that work • Understand how to apply those methods in your firm for your clients

8:50–9:00 am: Break

9:00–10:15am: Concurrent Sessions (Select One)

2 — Construction Risk Management Defined for the CFO or Controller (M)
Robert Heuer, Senior Vice President
Willis, Southfield, MI
Patrick Monea, Vice President/CFO
Granger Construction, Lansing, MI
Review the various elements of strategic company construction risk management • Learn effective in-house handling of an insurance and surety program • Identify which factors enhance value with both internal and external "partners" • Understand how effective risk management can be a competitive edge

3 — Federal Tax Update (T)
Neil Wiley, Tax Partner
Moss Adams LLP, San Francisco, CA
John Armour,
Brockman Armour and Co., Denver, CO
Review of federal tax law changes and recent tax court decisions • Update on IRS audit activity and proposed regulations • Tax planning strategies

4 — Recognizing and Responding to Harassment Issues (M)
Lisa Heller, Partner
Robins, Kaplan, Miller & Ciresi
What is harassment • Who should be trained in recognizing & responding • How to perform investigation • Creating a policy that protects your company

5 — Job Cost Accounting (A)
John Metz, Partner,
Sikich, Gardner & Co., LLP – Aurora, IL
Basics of job costing • Various components of costs • Methodologies of costing • Reporting: What should the system give you? • How to use the system to your company's benefit

10:15–10:30 am: Break

10:30–11:45 am: Concurrent Sessions

6 — Project Risk Management and Management of the Insurance Program (M)
Robert Heuer and Patrick Monea
Learn, in detail, the considerations necessary to mitigate risk from a project viewpoint • Recognize how to manage your "insurance year" • Review a sample "life cycle" approach for your insurance year with detailed timelines, plotting specific actions

7 — Federal Tax Update (repeat of Session #3)

8 — Recognizing and Responding to Harassment Issues (repeat of Session #4)

9 — Job Cost Accounting (repeat of Session #5)

11:45 –12:45 pm: Lunch

10 — 12:50–1:40 pm: General Session #2
Outlook for the Economy and Capital Markets (SK)
James E. Landau, President
Berkeley Capital Management
San Francisco, CA
Where is the economy headed? • The outlook for interest rates • How healthy is the consumer? • The implications for stocks

1:45–3:00 pm: Concurrent Sessions (Select One)

11 — Transfer of Ownership (SK)
Gene Harder, CPA
Pam DeCounter, MA
Moss Adams LLP – Spokane, WA
Understand your options • Review personal and emotional considerations • Identify business strategies to maximize value • Consider real life examples of what does and doesn't work

12 — Technology Impact on Surety (SK)
K. Dixon Wright, President
North Coast Surety Insurance Services
Novato, CA
How is the surety industry responding to the internet • How will contractors communicate with their surety • How will the surety integrate with other ASPs • Status of automated delivery of surety bonds, and electronic bonds with digital signatures

13 — Profitable Growth Strategies (SK)
Lanny Harer, Managing Director
FMI Corporation – Raleigh, NC
Why grow? – A case for and against growth • Four fundamental growth strategies • Planning to create greater value • Avoiding the classic mistakes

14 — eBusiness – The Net Effect (SK)
Paul S. Thomas, Partner
Crowe Chizek – Indianapolis, IN
Emerging new business models affecting the construction industry • Supply chain evolution – Marketplaces and portals • Collaboration of the internet – Getting close to customers and subcontractors • Internet impact on HR benefits, recruiting and retention

3:15 – 4:30 pm: Concurrent Sessions (Select One)

15 — Transfer of Ownership (repeat of Session #11)

16 — Technology and Surety (repeat of Session #12)

17 — Profitable Growth Strategies (repeat of Session #13)

18 — eBusiness – The Net Effect (repeat of Session #14)

19 — 4:35 – 5:50 pm: General Session #3
New Approaches to Improving Construction Productivity (A, M)
Dr. Jim Adrian, President
Adrian International – Peoria, IL
Benefits of defect cost codes • Controls for the vital versus useful many • Measuring production risk for improvement • New technology for improved productivity information

6:30 – 8:00 pm: Reception

Note that sessions are designated for CPE credit in one of the following fields: Accounting (A), Consulting (C), Management (M), Personal Development (PD), Specialized Knowledge (SK), or Tax (T). CPE field designations are listed in parentheses next to each session's title.

Active Engagement with DOE FOA Collaboration Opportunities

2014

CONTROL NUMBER: 1167-1552

CSUC / XBRL-CET / SGIP PAP25 - University Interoperability Research Facility
Buildings University Innovators And Leaders Development DE – FOA – 0001167

Topic Area Number : DE-FOA-0001167
Project Title : **University Interoperability Research Facility**.
- Big Energy and Small Business
- Examining the Potential of Interoperability for building the Nation's Energy Infrastructure and Energy Efficient Buildings by "knitting together' various data standards.

Lead Organization : California State University Chico
Supported by XBRL-CET and SGIP PAP25
Organization Type : Consortium
Principal Investigator : Surety Resource Connection, Inc.
Team Members and Key Participants : XBRL US, SGIP, PwC, Intuit, GALLINA, Solar Nexus (IEP XML) Abbreviation Guide

Anticipated Project Budget

Component	DOE	Consortium	Total
SGIP PAP25 and XBRL-CET alignment with BEDES	$200,000	$50,000	$250,000
IEP XML Alignment with BEDES, XBRL and SGIP	$200,000	$50,000	$250,000
agcXML Alignment with BEDES, XBRL and SGIP	$200,000	$50,000	$250,000
NASBP/SFAA alignment with BEDES, XBRL SGIP	$200,000	$50,000	$250,000
Manufacturing with BAPVC, BEDES, XBRL, SGIP	$200,000	$50,000	$250,000
	$1,000,000	$250,000	$1,250,000

Abstract

DOE funded Smart Grid Interoperability Panel, Energy Star, G… Exchange Specification, NASEO and IEP XML with the … "knitting together" data standards for interoperability. Potenti… construction/financial services collaborate, supported by a ***university based sustainable Interoperability R&D Facility***, which is the premise of this DOE-FOA response by CSUC and XBRL-CET/SGIP-PAP25.

SGIP-Priority Action Plan 25 , is a collaboration with XBRL US to extend the public FASB USGAAP taxonomy to include energy specific data fields, particularly for building the nation's energy infrastructure, streamlining the interconnection process and enabling DATA Act compliance for energy related projects that have federal funding.

Data standardization enables interoperability across disparate systems and will enable better quality data, data analytics, mandated reporting compliance, investment analysis, significant cost savings and improved access to capital and financial services for all stakeholders, including small business.

This CSUC/XBRL-CET/SGIP-PAP25 will explore how current DOE efforts like BEDES can "knit together" the BEDES Dictionary, IEPXML, NASEO data matrix and the proposed XBRL-CET Data sets to align with the objectives of the DOE to promote more efficiency in energy development, help small business, and create a financially sustainable university based Interoperability R&D Facility.

Formula Grants to States and Indian Tribes for Preventing Outages and Enhancing the Resilience of the Electric Grid

3. November 18, 2022
Response to DOE Request for Information
Cost and value of acquiring, accessing, and sharing solar photovoltaic system performance data.
Addendum - Proposal for Model Digital Ecosystem for Community Resiliency
On November 18th we submitted our response to the DOE RFI regarding performance data, and on the 18th the DOE issued a new funding opportunity, Smart Grid Grants, that ties directly to our request for funding.

2014 DATA Act

Public Law 113–101
113th Congress

An Act

May 9, 2014
[S. 994]

To expand the Federal Funding Accountability and Transparency Act of 2006 to increase accountability and transparency in Federal spending, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

Digital Accountability and Transparency Act of 2014.
31 USC 6101 note.

SECTION 1. SHORT TITLE.

This Act may be cited as the "Digital Accountability and Transparency Act of 2014" or the "DATA Act".

SEC. 2. PURPOSES.

The purposes of this Act are to—

(1) expand the Federal Funding Accountability and Transparency Act of 2006 (31 U.S.C. 6101 note) by disclosing direct Federal agency expenditures and linking Federal contract, loan, and grant spending information to programs of Federal agencies to enable taxpayers and policy makers to track Federal spending more effectively;

(2) establish Government-wide data standards for financial data and provide consistent, reliable, and searchable Government-wide spending data that is displayed accurately for taxpayers and policy makers on USASpending.gov (or a successor system that displays the data);

(3) simplify reporting for entities receiving Federal funds by streamlining reporting requirements and reducing compliance costs while improving transparency;

(4) improve the quality of data submitted to USASpending.gov by holding Federal agencies accountable for the completeness and accuracy of the data submitted; and

(5) apply approaches developed by the Recovery Accountability and Transparency Board to spending across the Federal Government.

The Blue Button represents a national movement that enables consumers to have easy access to their own health information in a format that they can use.

The Blue Button logo signifies that a consumer can download a single electronic file that contains their available health data.

Website

The Green Button provides utility customers with easy and secure access to their energy usage information in a consumer-friendly and computer-friendly format.

Customers are able to securely download their own detailed energy usage with a simple click of a literal "Green Button" on electric utilities' websites.

Website

Orange Button targets a reduction in soft costs by streamlining the collection, security, management, exchange, and monetizing of solar datasets across the value chain of solar.

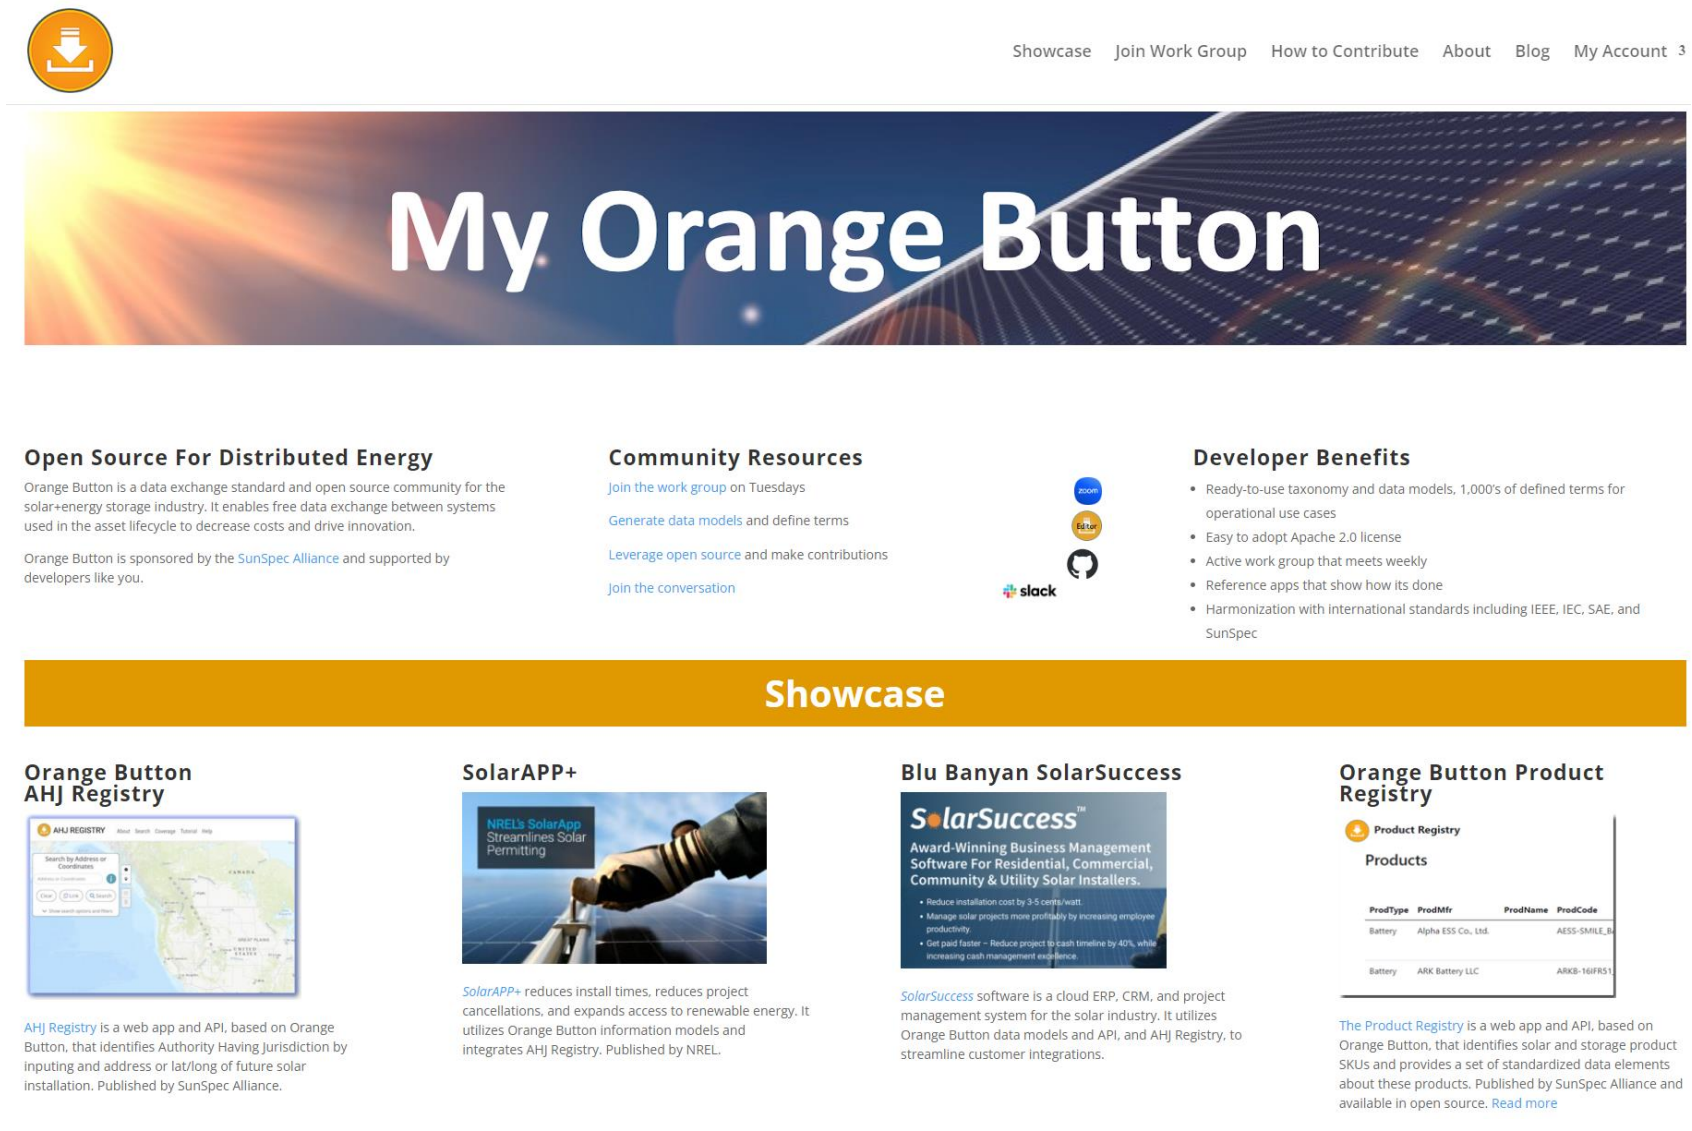
Creating an industry-driven standardized data landscape will facilitate the growth and expansion of distributed solar.

Website

The Orange Button Initiative started as a public/private partnership funded by the U.S. Department of Energy, the SunSpec Alliance and more than 350 companies that contributed to its development.

Orange Button leverages the idea that solar companies will share data with each other to reduce friction and achieve operational efficiency.

The SunSpec Alliance is the original the developer of the technology and the licensee of the Orange Button trademark.



U.S. Small Business Administration

SUBJECT: Option for Prior Approval Sureties to Submit the "Work in Process" Information Required by SBA Form 994F through eXtensible Business Reporting Language (XBRL)

SBA Procedural Notice

TO: All SBA Employees and SBA Prior Approval Surety Partners
SUBJECT: Option for Prior Approval Sureties to Submit the "Work in Process" Information Required by SBA Form 994F through eXtensible Business Reporting Language (XBRL)

CONTROL NO.: 5000-834330

EFFECTIVE: June 29, 2022

The purpose of this Notice is to inform Prior Approval Surety Companies and their Surety Agents participating in SBA's Surety Bond Guarantee (SBG) Program (referred to collectively hereafter as Surety Partners) and SBA employees that, effective immediately, Surety Partners and small business concerns will have the option to submit the information required by SBA Form 994F, "Schedule of Work in Process", through eXtensible Business Reporting Language (XBRL) (referred to as XBRL WIP reports). Under the current process, small business concerns provide the "Work in Process" (WIP) information to Surety Partners, and then Surety Partners must manually enter individual WIP information into CAFS. With XBRL WIP reports, Surety Partners will have the option to send a batch transmittal of the WIP information to CAFS electronically. SBA is issuing this Notice to provide Surety Partners with procedures to properly submit XBRL WIP reports through the Capital Access Financial System (CAFS).

What is XBRL?
XBRL is an open technology standard that enables business and financial data electronic communication. XBRL-formatted documents create computer-readable data and enable greater efficiency, improved accuracy, reliability, and cost savings to those who supply and use financial and business data.

The XBRL WIP report is an alternative to manual CAFS entry of SBA Form 994F information. All the information contained in the XBRL WIP report is identical to the information contained in the current SBA Form 994F; the only difference between the two forms is the formatting. The XBRL WIP report functions as a computer-readable spreadsheet specifically designed to be translated by CAFS. By using the XBRL WIP report, a Surety Partner will not need to manually enter the information into CAFS.

How are XBRL WIP reports submitted?
To submit the required WIP information through XBRL, a Surety Partner will need to perform the following sequence of steps:

SBA Form 1353.3 (4-93) MS Word Edition; previous editions obsolete
Must be accompanied by SBA Form 58

2023 Financial Transparency Act

Public Law 117–263
117th Congress

An Act

To authorize appropriations for fiscal year 2023 for military activities of the Department of Defense, for military construction, and for defense activities of the Department of Energy, to prescribe military personnel strengths for such fiscal year, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

(a) IN GENERAL.—This Act may be cited as the "James M. Inhofe National Defense Authorization Act for Fiscal Year 2023".

(b) REFERENCES.—Any reference in this or any other Act to the "National Defense Authorization Act for Fiscal Year 2023" shall be deemed to be a reference to the "James M. Inhofe National Defense Authorization Act for Fiscal Year 2023".

TITLE LVIII--FINANCIAL DATA TRANSPARENCY

Sec. 5801. Short title.

Subtitle A--Data Standards for Covered Agencies; Department of the Treasury Rulemaking

Sec. 5811. Data standards.
Sec. 5812. Open data publication by the Department of the Treasury.

Data Standards.--

1) Common identifiers; quality.--The data standards established in the final rules promulgated under subsection (b)(2) shall—

A) include common identifiers for collections of information reported to covered agencies or collected on behalf of the Council, which shall include a common nonproprietary legal entity identifier that is available under an open license for all entities required to report to covered agencies; and

(B) to the extent practicable--

(i) render data fully searchable and machine-readable.
(ii) enable high quality data through schemas, with accompanying metadata documented in machine-readable taxonomy or ontology models, which clearly define the semantic meaning of the data, as defined by the underlying regulatory information collection requirements;
(iii) ensure that a data element or data asset that exists to satisfy an underlying regulatory information collection requirement be consistently identified as such in associated machine-readable metadata;
(iv) be nonproprietary or made available under an open license;
(v) incorporate standards developed and maintained by voluntary consensus standards bodies; and
(vi) use, be consistent with, and implement applicable accounting and reporting principles.

Infrastructure Investment and Jobs Act (IIJA)

Public Law 117–58
117th Congress

An Act

To authorize funds for Federal-aid highways, highway safety programs, and transit programs, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the "Infrastructure Investment and Jobs Act".

"(5) ACCELERATED IMPLEMENTATION AND DEPLOYMENT OF ADVANCED DIGITAL CONSTRUCTION MANAGEMENT SYSTEMS.—

"(A) IN GENERAL.—The Secretary shall establish and implement a program under the technology and innovation deployment program established under paragraph (1) to promote, implement, deploy, demonstrate, showcase, support, and document the application of advanced digital construction management systems, practices, performance, and benefits.

"(B) GOALS.—The goals of the accelerated implementation and deployment of advanced digital construction management systems program established under subparagraph (A) shall include—

"(i) accelerated State adoption of advanced digital construction management systems applied throughout the construction lifecycle (including through the design and engineering, construction, and operations phases) that—

"(I) maximize interoperability with other systems, products, tools, or applications;

"(II) boost productivity;

"(III) manage complexity;

"(IV) reduce project delays and cost overruns; and

"(V) enhance safety and quality;

"(ii) more timely and productive information-sharing among stakeholders through reduced reliance on paper to manage construction processes and deliverables such as blueprints, design drawings,

Smart Infrastructure: The Road to COP28

International Digital Ecosystem Architecture (IDEA)

Unless we act now, the 2030 Agenda will become an epitaph for a world that might have been.

António Guterres
Secretary-General, United Nations

[UN Sustainable Development Goals]

The Americas Business Dialogue (ABD) is one of the most important private-sector initiatives in the Western Hemisphere.

It represents companies and business organizations from all sectors of the economy and all countries in the Americas.

[Inter-Americas Development Bank]
[Americas Business Dialogue]

UNITE. ACT. DELIVER.

We are at a halfway point. It has been 7 years since Paris, with 7 years to go to 2030.

We must respond to the facts. We need to reduce emissions by 43% by 2030 and course correct on adaptation, finance, and loss and damage.

We will deliver a transformational COP of action.

A COP for all.

[COP28 UAE]

UN Sustainable Development Goals

2 - End hunger, achieve food security and improved nutrition and promote sustainable agriculture

7 - Affordable and Clean Energy

- Reduce the administrative costs of permitting and construction
- Increase risk management capabilities to reduce exposure to lenders for better terms.

9 - Industry, Innovation and Infrastructure

- Accelerate the implementation of digital construction management systems, public and private.
- Model utilizes open standards so software developers have no constraints, trademarks or exclusivity to implement data exchange.

11 - Sustainable Cities and Communities

- Model Digital Ecosystem can be easily replicated without changing software platforms.
- SoalrApp is ready to be implemented to help reduce administrative costs and speed up timelines for permitting solar projects

12 - Responsible Consumption and Production

- The demand for energy will put pressure on generation and meeting demand will be a challenge. Enabling the production of clean energy to be more efficient so clean energy can be price competitive to fossil fuels will drive responsible consumption and production.

13 - Climate Action

- Accelerating the construction of all clean energy infrastructure projects that connect to the smart grid is direct climate action.

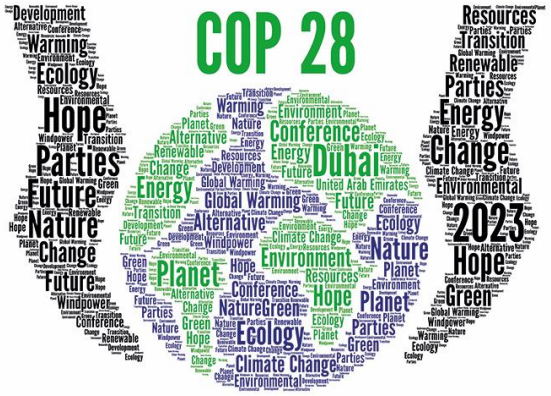
17 - Strengthen the means of implementation and revitalize the Global Partnership for Sustainable Development

- Expansion of the internationally recognized XBRL Taxonomy for infrastructure related data elements will promote and enable global partnerships.
- Engagement with the California-China Climate Institute and XBRL for China financial markets

Inter-Americas Development Bank
Americas Business Dialogue
IX Summit of the Americas

Policy Recommendations
Building a sustainable, resilient, and equitable future

Recommendation 14
Increase interoperability and data sharing between all players in the financial system.



Time is running out and the stakes for the planet are high.

While the historic Paris Agreement united governments around what the world must do to meet the climate challenge, ***COP28 will focus on the 'how'***

The potential is there, but the landscape is fragmented and this is simply slowing us down. What is missing is a holistic, ***unifying ecosystem*** that brings all the key players together and brings everything under one umbrella.

Dr. Sultan Al Jaber
UAE Minister of Industry and Advanced Technology
COP28 President-Designate
May 10, 2023

International Digital Ecosystem Architecture (IDEA)

Construction projects are made up of a series of data elements that are exchanged between stakeholders

Data Stack

- Machine Readable data standard
- No data elements are repeated
- The combination of data sets is flexible and subject to need
- Each induvial system can elect minimum requirements for data sets.

ConsensusDocs - 706 – Subcontract Performance Bond

Constructor, as Obligee, ("Constructor") has entered into a contract with Project Owner, ("Owner") dated GC-Owner Contract Date for GC-Owner Project Name ("Project"). Constructor may also be referenced as the Contractor or General Contractor in the Subcontract Documents.

Constructor and Subcontractor, as Principal, ("Subcontractor") have entered into a Subcontract Agreement ("Subcontract") dated Agreement Date for certain portions of the work in connection with the Project consisting generally of: Agreement Description ("Subcontract Work"). The Subcontract is incorporated by reference into this Performance Bond ("Bond"). Surety represents that its company is lawfully authorized to conduct surety business and has obtained a certificate of authority as an insurer in the jurisdiction of the project.

By virtue of this Performance Bond ("Bond"), Subcontractor as Principal and Surety Company 1 ("Surety"), are bound to Constructor as Obligee in the maximum amount of

Examples of Data Elements

Legal Entity Identifier (LEI)

The Legal Entity Identifier (LEI) is a 20-character, alpha-numeric code based on the ISO 17442 standard developed by the International Organization for Standardization (ISO).

System for Award Management (SAM)

Entities doing business with the federal government use the Unique Entity ID created in SAM.

The Integrated Award Environment (IAE) manages several systems including SAM.gov, FPDS, eSRS, FSRS, CPARS and FAPIIS.

Cybersecurity Maturity Model Certification (CMMC)

The Cybersecurity Maturity Model Certification (CMMC) program is aligned to DoD's information security requirements for Defense Industrial Base partners.
