

Aerial Work Platform Operator Certification

(with Fall Arrest)

This course prepares the operator of an **Aerial Work Platform (AWP)** to work safely in a variety of settings, and to ensure their own personal safety, in addition to the wellbeing of fellow workers and bystanders.

Topics include; visual and operational daily inspection, principles of safe operation, stability of the aerial platform, platform capacities, safe fuelling procedures, shutdown, security, proper fitting and use of a fall arrest harness and shock-absorbing lanyard, hazard recognition, accident avoidance, orthostatic intolerance and rescue planning options.

Note: The fall protection module is customized for **Aerial Work Platform** users.

Course Length: 8 Hours

Learning Outcomes:

Upon successful completion of this course, participants will be able to:

1. Understand boom and scissor AWP and applications
2. Conduct an effective inspection and properly record the results
3. Identify AWP controls and demonstrate safe use
4. Identify proper methods of raising and extending the device
5. Identify hazards associated with the operation of an AWP and suggest effective hazard controls
6. Identify different fuel sources and approved safety protocols and best practises for each
7. Demonstrate proper inspection, fitting and use of personal fall arrest equipment; and
8. Identify and demonstrate proper emergency procedures

Evaluation:

- Written quiz
- **Practical Skills Evaluation** demonstrating safe operation of an AWP
- **Minimum grade of 80%** is required to pass this course
- Graduates receive a three-year Wallet Card Certification.

Aerial Work Platform Operator Certification

Who Should / Must Attend This Course:

- All Supervisory personnel who are responsible for workers who operate AWP
- All operators of AWP

Additional Information About This Course:

- AWP Operators must furnish a wallet card to Ministry of Labour inspectors upon request, proving training was completed
- Fall arrest certification is required to operate an AWP. The second half of this course introduces participants to fall arrest as it relates to AWP
- Clients may opt-out of this section, and provide proof of certification for each participant prior to attempting the PSE. (Please discuss with your account representative at the time of booking)
- The employer must provide fall arrest harnesses and shock absorbing lanyards for classroom training
