

Canada has joined many other nations around the globe in adopting the new **Globally Harmonized System for the Classification and Labelling of Chemicals (GHS)**. This course demonstrates how to incorporate the necessary changes of the new system (WHMIS 2015) with the old (WHMIS 1988).

**Topics Include:** introduction of the new Hazard Groups (Physical & Health), and the many new hazard classes and categories within each of the groups. The new pictograms and a review of the new Safety Data Sheets, the use of Personal Protective Equipment, how to identify and implement controls, emergency procedures and lastly, recognizing various routes of entry into the body, will all be uncovered.

GHS is being introduced in three phases - the first took place in June 2015 with the end of the 3-year transition period on December 1st, 2018, requiring employees to have training in the new system.

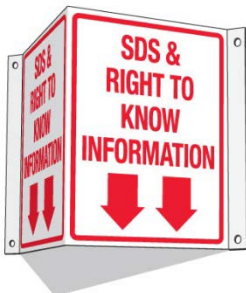

**Course Length:** 4 Hours

## Learning Outcomes:

Upon successful completion of this course, participating supervisors and workers will be able to:

1. Describe the new elements within GHS, compare the two WHMIS systems and explain the changes to the Material Safety Data Sheets
2. Understand various duties of workplace under the WHMIS regulations
3. Identify all GHS hazard groups, classes and categories
4. Demonstrate knowledge of hazard controls in the workplace
5. Understand control of exposure to biological and/or chemical agents
6. Show an understanding of the physical states of chemical and how they contaminate the workplace
7. Identify routes of entry for contamination
8. Identify and correctly use appropriate Personal Protective Equipment
9. Demonstrate knowledge of appropriate emergency and spill actions to take during incidents

## Evaluation:

- Written quiz
- **Minimum grade of 80%** is required to pass this course.
- Successful graduates will receive a three-year Wallet Card Certification.

## Who Should / Must Take This Course:

- Every worker in Ontario who may be exposed to hazardous substances must receive WHMIS/GHS training.
- This includes part-time and seasonal workers as well as volunteers and unpaid co-op students.
- As all workers may potentially be exposed to controlled substances and hazardous products, in a variety of settings, HASCO strongly recommends that you **do not exclude** any worker from receiving this level of training.

## Additional Information About This Course:

- This course satisfies the GHS training requirements for Phase: 1, 2 & 3

## **HASCO Customers of this course were even MORE impressed when they purchased:**

1. Transportation of Dangerous Goods (TDG)
2. "Employee 101" - Worker Health & Safety Awareness
3. Respirator Selection, Use & Care
4. Supervisor's Occupational Health & Safety
5. Workplace Violence, Harassment and Discrimination Awareness
