

Intergalactic Alliance

Federation of Worlds

Galactic Confederation

Divine Power

So many different names exist to express this Alliance of Worlds, Stars, and Planets existing throughout our Milky Way galaxy. The term "divine power" seems inappropriate in these names; however, when I experienced all these losses and sufferings in recent years, I thought to myself, "This is too powerful. The dark forces take all forms. Without true Divine Power, it's not possible... Divine Rights are not possible." And authentic Divine Power comes from the Galactic Alliance, which is headed by the Great Central Sun, the source of the divine, the source of our divine spark.

The last text sent, the Dharma of the Robe, reveals different aspects of the dark forces. Even Buddhist monks are part of them and do not follow the Buddha's Dharma, but are inspired by, and driven by, the Kali Yuga system. In recent weeks, I've come to understand that the Divine power I spoke of, the power I hoped for, could be nothing other than the Galactic Alliance. And now, stripped of all my energies, of the Buddha and everything else, I tell myself that nothing good will be accomplished on Earth without the Federation of Worlds.

This is why Earthlings appear as the poor relations, we whose dark forces lead us to believe that there is no life elsewhere than on Earth, which is completely false.

Yes, we are poor beings, cut off from our rich, evolved and luminous galactic family and from the Source of the Divine, whose primary quality is that of Protectors.

Lacking in technology, we are still stuck in a barbaric state, using fuel to run our cars and rockets, relying on pills with serious side effects that distract us from our spirituality, and above all, subject to the reptilians, from whom the greatest part of the dark forces originate.

The Federation of Worlds would provide protection against the dark forces that still surround the planet. We only need to look at my experiences these past few years, where the dark forces have done nothing but attack me. But why?

The dark forces absolutely do not want the astral illusion to fall, they support the cosmic lie at all costs, and they do not want the revelations about the different worlds to show the existing Truth.

The Intergalactic or Galactic Alliance would give Earth, and its inhabitants, the conditions favorable to their spiritual journey and put an end to the daily grind, the rat race and pollution.
End.

The Galactic Alliance possesses all the power to restore the oceans, rid the world of plastics, and possesses all divine healing sciences across all spheres and dimensions. Reptilian-led

governments oppose this, arguing that every man and woman is sovereign in their divine and human rights.

Think of what you desire most on Earth; the Alliance has the capacity to achieve it and would help you realize it with kindness and joy. Co-creation.

The most advanced technologies, working in harmony with Cosmic Laws and undoubtedly with the spiritual and human potential of Earth's men and women, are all available to the Federation of Worlds, and would be available to Earth if an Alliance existed.

Warriors are often depicted in stories about the Galactic Alliance, but this represents only a tiny fraction of what constitutes the Federation of Worlds. After his enlightenment, Shakyamuni Buddha visited all the worlds and universes and understood the importance of the Federation of Worlds, but it was impossible to bring him there to Earth. During his weeks of meditation, he decided he could not teach his science. However, an advanced Being from the Pleiades crowned him and protected him from Mara.

For the Reptilians, their worst enemy is undoubtedly the Federation of Worlds, which protects and elevates the Stars and their inhabitants into the Divine and strives for harmony and the Great Peace among the different worlds and galaxies.

There is an entire hierarchy behind the Federation of Worlds. The Very Ancients come from the Great Central Sun, the one from which all the divine sparks of each inhabitant of Earth originate. We, on Earth, call it God. But in the Galactic Alliance, in the Federation of Worlds, there is no God; there are Ancients, benevolent Beings who work for the Harmony and Protection of all Worlds, of all Universes. And these have reached the highest levels of spiritual realization. Then in the hierarchy there are other Ancients, but less Ancient than the first, who contributed to the Federation of Worlds. And different Councils of Ancients, some for a planet, some for a solar system, for a galaxy, some for a group of stars, some for the Milky Way... And so on. There are the warriors, those who protect the Stars and Planets against dark forces, who use ships and weapons to counter these forces without exception, establishing the primacy of Love and Light over the control and enslavement of worlds.

The Federation of Worlds has always subtly protected Earth and will continue to do so until Earth opens itself to the Alliance of Worlds and becomes a permanent part of it. Then the Reptilians will leave Earth, and humanity will rediscover its original light. The suffering and all sickness will end.

Ultimately, all the difficulties and obstacles I have experienced all these years on Earth stem from dark forces that want to prevent the Galactic Alliance of Worlds from manifesting on Earth.

Earth is ready to make the Great Quantum Leap.

But I couldn't make the Galactic Alliance my doctrine because in Buddhism and elsewhere, the Galactic Alliance has been negatively associated with Earth, condemned by the Dark Forces. Therefore, the Buddha, when speaking to me about it, uses other words like "Twining my Star with the Earth," because he cannot say that my mission is to actualize the Galactic Alliance on Earth, to bring it into being. It is the Buddha who tells me this, because I have none of my memories. But the Buddha reminds me of what is important. I could write more, but what's the point... even though I'm waiting for words and digital files... because where is my crown? My Light, my power, or Divine Truth? And the Robe of Shakyamuni Buddha? But what is important is not Maitreya Buddha, but that an Alliance of Worlds is actualized on Earth. Patience leads to Nirvana, said the Buddha.

But who is compelling me to write about the Galactic Alliance like this?! The Buddha is urging me to do what he so desperately wanted but couldn't. And above all, ensuring this information is on my Divine Server is crucial for raising awareness among all humanity.

END OF ALL DISEASES, liberation of the heart, the third eye, all our chakras, and liberation of our essence. Increase in the strands of our DNA, as our spirituality demands it... Earth will finally take its rightful place as an evolved planet in all the galaxies. For there is great abundance on Earth in all spheres and dimensions, and we are loved. We Are One.

Turning the Wheel of Satya Yuga,

The Buddha Maitreya

Written in my hermitage, August 2026.
