

Three Way Filter water faucet mixer Installation Instructions

Tools and Materials

Names of Component

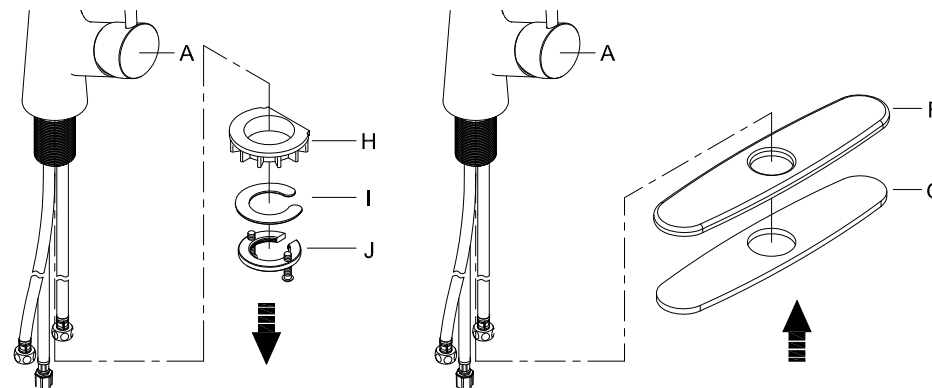

NO	Name
A	Kitchen Faucet
B	Supply Hose Hot (Red)
C	Supply Hose Cold (Blue)
D	Outlet Hose (Filtered Water Connect In)
D1	Plastic Nut
E	Desk Gasket
F	Deck Plate
G	Deck Plate Gasket
H	Mounted Washer
I	Stainless Steel Washer
J	Fixing nut
K	Screw

Installation Instruction

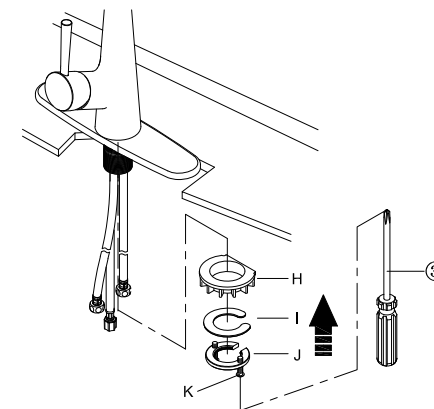

Step(1) :

Disassemble parts H, I, and J from faucet body A. Then insert F and G into faucet body A.

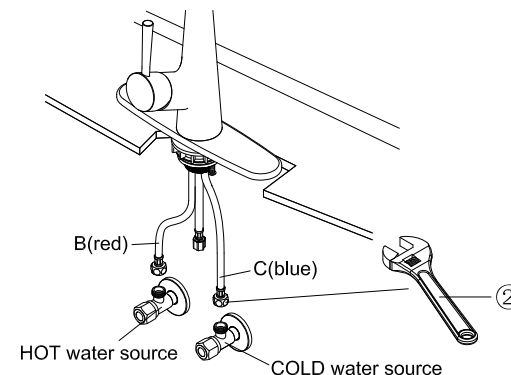

Step(2) :

Place faucet body A into the mounting hole on the countertop, and then reinstall H, I, and J in order. Use tool 3 to lock K. (If the countertop is too thick to install J, please remove H.)

Step(3) :

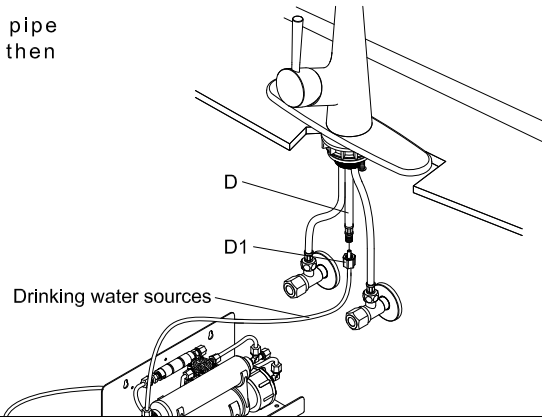

Connect B to the HOT water source, connect C to the COLD water source, and use tool No. 2 to tighten.

Installation Instruction

Step(4) :

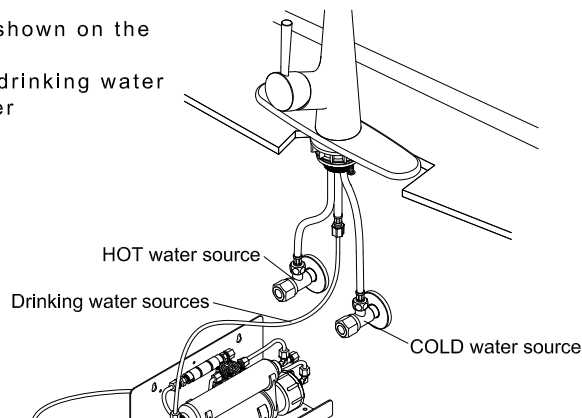

Pass the drinking water source pipe through D1, attach it to D, and then lock D1 onto D.

Step(5) :

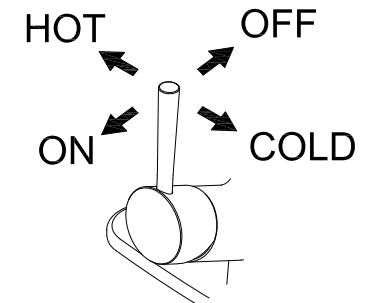

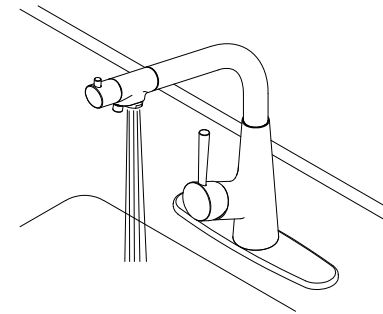

Installation completed (as shown on the right).

Turn on the hot, cold, and drinking water supplies, and test for proper functionality.

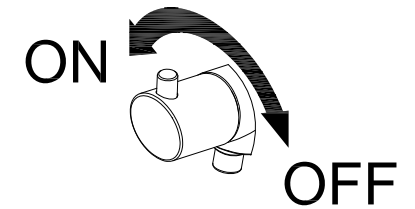

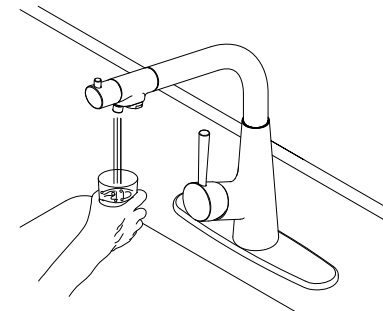

Instructions for Use

● Tap Water

● Drinking Water

Daily and Regular Maintenance

1. For daily cleaning, use a neutral detergent with a soft-bristled brush, and rinse with water. (Do not use acidic or alkaline cleaners.)
2. Please remove and clean the bubbler at the water outlet regularly to avoid filter clogging and reduced water output.
