

ENDURO WATER CANNON

- 2 inch schedule 10 all 304/316 stainless steel construction to last a life time
- Long life greaseable bearings and seals on both axis (5 to 10 years with a grease routine)
- High pressure high flow (up to 2000 l/min 145 psi jet dependent)
- Dynamic variable speed control
- Reversible top motor with the flick of a switch
- Adjustable top axis travel stops
- 500 degree bottom axis rotation
- Robotic operation on demand - Easy train and run routine with dynamic drag and speed
- Water control is on the joystick centre button
- Self-locking on both axis
- Easy bearing, seal and motor replacement
- 2 inch BSP outlet and 2 inch BSP inlet (table D flange mount available on request)
- 24 or 12 volt operation (it is slower on 12v)
- Simple plug and play wiring (all M12 IP67)
- Brushless motors to increase reliability
- Reverse voltage protected
- 12 month warranty on parts and workmanship

Enduro Swivel sprays

- Same material and construction as the water cannon with a few exceptions...
- Brushed DC self-locking motors (12 or 24 volt)
- Single switch operation for forward/reverse
- Jets can be rotated to any angle
- 45 degree intermediate pipe for delivery height preset
- Use an elbow to convert from horizontal to vertical axis
- A range of jets from 40 degree to 120 degree course or fine droplet size
- Comes with 1 jet of choice from the range
- Aluminium BSM spanner is available.

Enduro Flat jets

- Stainless steel 304
- Flat even spray
- High efficiency
- BSM O ring swivel mounted (loosen and turn)
- From 40 to 120 degree spray widths and 3mm to 5mm wide outlets
- Will last a lifetime
- 120 degree 3.5mm jet pictured-note the spray pattern
