Work Summary:

Forward-thinking javascript full stack developer with 8 years of experience specializing in working effectively in dynamic environments. Proficient in backend services and object-oriented programming languages essential for web application development. a proud team player focused on achieving project objectives with speed and accuracy.

Work History:

Lead Technology
October 2022 - Present

Synechron Technology

- Collaborating closely with clients to maintain and upgrade existing systems, ensuring optimal performance and meeting evolving business needs.
- Leading technology initiatives, providing guidance and mentorship to team members, fostering a culture of continuous improvement and innovation.
- Implementing best practices for scalability, supportability, ease of maintenance, and system performance, resulting in improved efficiency and reduced downtime.
- Staying updated with the latest technologies and industry trends, continuously enhancing technical skills and knowledge.

System Analyst
November 2020 - September 2022

Cybage Software

- Collaborated closely with clients to maintain and upgrade existing systems, ensuring seamless functionality and optimal performance.
- Demonstrated strong communication skills, effectively conveying complex technical concepts to both technical and non-technical stakeholders.
- Played a key role as a backend developer, specializing in the development and maintenance of serverless applications using Node.js and TypeScript.
- Designed and Developed file processors, event processors to generate reports and efficient data processing, enhancing data analysis capabilities, system performance and accuracy.
- Utilized AWS services and frameworks to enhance scalability, security, and reliability of the Loyalty Points and Engage Application.

Software Engineer
March 2019 - November 2020

QuEST Global

- Collaborated with clients to gather requirements and establish specifications for software systems, ensuring alignment with their needs and objectives.
- Designed and developed databases, data entry systems, web forms, and other applications, leveraging expertise in programming languages and frameworks.
- Proactively identified and resolved software errors, enhancing system performance and user experience.
- Utilized Amazon Web Services (AWS), specifically EC2, S3, and Elastic Load Balancer, to deploy applications and ensure reliable and efficient hosting.
- Actively participated in code reviews and provided constructive feedback to improve code quality and maintainability.

Junior Software Engineer

September 2016 - February 2019

Splendornet Technology

- Collaborated closely with cross-functional teams, including development teams and infrastructure specialists, to deliver high availability solutions for mission-critical applications, ensuring seamless operations and minimizing downtime.
- Utilized Agile software development methods to increase team efficiency, resulting in improved productivity and timely delivery of projects.
- Recognized as the Spotlight Award Winner in 2017 at Splendornet Technology, highlighting exceptional performance and contributions to the organization.

Intern

Bliss Technology Labs

- Collaborated with a team of five individuals to develop a hybrid mobile application for property management.
- Acquired valuable knowledge and skills in mobile application development and property management.
- Successfully completed internship responsibilities within the designated timeframe.

Skills:

Web Technologies:

Nodejs, Typescript, Serverless, Relational database, Non-relational database, Amazon Web Services (Lambda, Dynamo, S3, SQS, Cloudwatch), Jest, Reactjs, Python

Project Experience:

Insurance Fraud Detection and Risk Analysis

October 2022 - Present

Synechron Technologies

- Implement best practices and industry standards to enhance the functionality and efficiency of software applications.
- Identify and rectify errors in existing software, improving performance and user experience.
- Develop and implement fraud detection applications using Python, contributing to the prevention of internal fraud.
- Stay updated with the latest programming platforms, frameworks, and libraries such as Node.js, TypeScript, React.js, AWS, and Python.
- Maintain clear and concise documentation, facilitating ease of understanding and seamless knowledge transfer.

Education

BE Computer Science

2011 - 2014

Deogiri Institute of engineering and management studies, Aurangabad.

Completed Bachelor in Computer Science and Engineering **(62%).**

Diploma In Computer Technology

2008 - 2011

MIT Aurangabad

Completed Diploma in Computer Technology **(74.76 %).**

SSC

2007 - 2008

Raje Sambhaji Bhosle Military School, Aurangabad

Completed 10th std with **72.15 %.**
