- Perennials bloom once a season & should come back every year

**BEE ATTRACTANTS:** Bees are attracted to blue, white, purple, & yellow flowers. Single-petal flowers are better than multiple petal flowers.

- **(D) Deer Dislike:** These plants are the least likely to be eaten by deer, but if a deer is hungry enough, they will eat any plant.

- **(W) Water Wise Plants :** Establishing new plants will initially require more water and need to be watered very frequently. Once the water-wise plant is established (2 yrs), will need to be watered at least every 2 weeks.

- **(N) Native to Rocky Mountain area**

- **(G) Groundcover Space 6"-12" apart**

- **Trim:** all varieties trim as needed to shape or remove old blossoms.

- **Trim once Dormant:** all varieties of perennials to 2" above ground level.

- **Fertilize** use all-purpose fertilizer once a month from Mar-Sept. Follow Label. Water in after application.

- **For Green Leaves** apply Ferriplus iron once a year.

- **Mulch:** topdress each spring to replenish nutrients. When planting MIX in mulch with existing soil.

- **Water** Plants in full sun may require more water. also in winter water once a month so roots do not dry out.

- **Bloom Time:** Perennials Bloom at different times so plant a variety to get blooms throughout the year.

**To identify** plants and bugs a free phone app (android or apple) Google Lens does a good job.
