Countertop Estimate

You can email, fax, or stop by for a countertop estimate. You will need to measure your space and draw a diagram of your kitchen. If you stop in we can give you an estimate in as little as 10 minutes.

1. Draw (by hand) a top view diagram/layout of the shape of your kitchen ("L" shaped, "U" shaped, galley, etc.)
2. Please show appliance locations (stove, fridge, dishwasher).
3. Please show which sides are up against a wall, and which sides are open - where the finished edges are.
