

Integrity Roof System®

A complete approach
to long-lasting beauty
and performance

The System Works

Benefits of the CertainTeed Integrity Roof System®

Products shown above are for illustrative purposes only. For complete list of CertainTeed products in each category, please visit certainteed.com.

Insist upon the Integrity Roof System® and get the ultimate in roof performance!

With as much care as you take in selecting the right contractor, choosing the right roof system is equally as important. A CertainTeed Integrity Roof System® combines key elements that help ensure you have a well-built roof for long-lasting performance.

It all starts with CertainTeed's broad line of shingles, featuring brilliant color blends, dramatic styles and shadow lines, and the strongest warranties in the industry. The right shingle can mean the difference between an average, everyday look or a beautiful roof that's the talk of the neighborhood.

Shingles are just the beginning — to keep your new roof performing and looking great for years to come it takes a complete CertainTeed Integrity Roof System approach.

- 1. Waterproofing Underlayment**
The first step in your defense against the elements. Self-adhering underlayment is installed at vulnerable areas of your roof to help prevent leaks from wind-driven rain and ice dams.*
- 2. Water-Resistant Underlayment**
Provides a protective layer over the roof deck and acts as a secondary barrier against leaks.
- 3. Shingle Starter**
Designed to work in tandem with the roof shingles above for optimal shingle sealing and performance.
- 4. Shingles**
Choose from a variety of Good-Better-Best styles to complement any roof design and fit your budget.
- 5. Ventilation**
A roof that breathes is shown to perform better and last longer. Ridge Vents, in combination with CertainTeed Intake Vents or Soffit Vents, allow air to flow on the underside of your roof deck, keeping the attic cooler in the summer and drier in the winter.
- 6. Hip & Ridge**
Available in numerous profiles, these accessories are used on the roof's hip and ridge lines for a distinctive finishing touch to your new roof.

Low-Slope Sections

CertainTeed Flintlastic® and SMARTCOAT™ roofing products are also available for low-slope roof areas.

* Waterproofing Underlayment is not typically applied at the eaves in climate areas not prone to snow and ice.

Insist upon the

Integrity Roof System[®]
