## **Class Description**

Wouldn't it be nice to create your own neighborhood? It could be funky, colorful, sophisticated, wonky, architectural, or whimsical. Mmm . . . doesn't that sound like fun? Use your fabrics to create houses with varying shapes, colors, and designs. We'll spend time making houses, then combining your creations to create your neighborhood, balancing color, design, and dimension.

If you're wanting something smaller, consider making a table runner or wall hanging with just 3-4 houses.

## **Supplies**

- Basic sewing supplies
- Paper, pencil and a good eraser
- Sewing machine
- Mat
- Ruler
- Square ruler, any size (optional)
- Rotary cutter
- Fusible web (optional)
- Invisible Thread (optional for appliqué)
- Design wall (can use flannel or batting—something you can pin onto and take with you)

## **Fabrics**

Bring 5-10 fat quarters or equivalent of fabrics that you like. Include a mix of light, medium, and dark and a range of near-solids and small prints. You may want green (for grass) and blue (for sky) but this is not a requirement for your neighborhood. And you may want a few fabrics that resemble trees, flowers, or rocks. Geometrics work well for chimneys, walkways, and windows.

If you have any questions about fabric selection, please call or email me.
