

Threat detection, identification, assessment, preparedness, and mitigation expertise to secure supply chains, protect R&D investments, ensure technology integrity, and safeguard critical infrastructure

Secure point to point and remote location communications capabilities

C2 Integration

C2 Integration is a Virginia LLC founded in 2018. C2 Integration is a Service-Disabled Veteran-Owned Small Business (SDVOSB) and an Enduring Freedom/ Iraqi Freedom Veteran-Owned Small Business (VOSB).

Highly experienced and cleared retired senior Federal Special Agents and Intelligence Professionals use unique tools and skills to provide specialized threat assessment products to protect: Commercial intellectual property and investments, Public Health supply chains, the US Energy Industrial Base and Energy Grid, the US Defense Industrial Base (DIB), and US National Security Industrial Base (NSIB). Protected critical technologies include information technology (IT), operating technology (OT), and information communications technology (ICT).

Our people are experts in export controls, denied entities, high impact Counter-Proliferation operations, HUMINT/CI, Identity Intelligence, Network Analysis, and Open Source/Publicly Available Information.

Products: C2I Secure Communications (C2ISC) and Remote Universal Communication System (RUCS)

CORE COMPETENCIES: C2 Integration provides unique products and employs specialized processes to detect, identify, locate, assess, mitigate, prevent, disrupt, exploit, and counter illicit threats against our customer's R&D, production, and distribution chains enabling them to retain their technological and scientific edge.

Products and Processes

- Supply Chain Risk Management (SCRM)
- Committee on Foreign Investment in the United States (CFIUS)
- Export-import program threat evaluation/analysis
- Compliance Monitoring
- Supply Chain & Critical Tech threat analysis seminars and courses
- Surveillance, Counter Surveillance, and Tracking courses
- Proliferation/illicit network collection/analysis/production
- Data fusion and Information sharing/tips and leads techniques
- Policy development
- Identity, Biometrics, Object, Open Source, All Source Intelligence
- Sensitive activities support
- Insider threat assessment and detection
- Analysis software (AI/ML-computer vision and language translation)
- Secure Cloud-to-Cloud and Cloud-to-end point communications (C2ISC)
- Remote Universal Communication System (RUCS) portable light weight self-powered satellite and wi-fi system.
