

SPRAYMART

FLOOR CARE AND PRESSURE WASH SUPPLY

FLOOR CARE AFTERMARKET PARTS

2023 CATALOG

FLOOR CARE AFTERMARKET PARTS

This catalog contains a complete listing of Spraymart parts by product category. You will find detailed descriptions, dimensions, recommended usages, and images of Spraymart items.

For your convenience there are three features in this section to enable you to find the correct part. First, we have classified the listings under certain categories according to OEM and OEM part number. Second, many categories contain OEM machine reference charts that let you search for parts based on a specific machine. You will find this helpful in locating items such as batteries, battery chargers or vacuum motors. Finally, we have included alphabetical part listings with detailed descriptions and photo indexes.

At Spraymart, we're very excited about this new catalog and look forward to your comments and suggestions on how to better serve you!

POLICIES

PAYMENT TERMS

Approved accounts - Net 30 days from date of invoice.

PAYMENT METHODS

Visa, MasterCard, AMEX, or Open Account with approved credit.

RETURNED CHECKS

There will be a service charge of \$25.00 on each returned check.

FREIGHT

All orders are F.O.B. Blackwood, NJ or Fayetteville, Arkansas. Part orders under \$400 are subject to a \$12.95 handling fee or standard freight billed - whichever is higher. Parts orders exceeding \$400 (excluding batteries, engines) will be shipped freight-free within the continental U.S. and Canada. Carrier selection is at the discretion of Spraymart. (Blue label or red label charges are not included in free freight offer). All other shipments will incur the appropriate freight and handling charges.

- The freight program only applies to orders shipped via standard ground/truck service.
- Freight program applies to shipping destinations in the U.S. lower 48 states and Canada only.
- Qualifying international orders (delivery outside of the continental U.S. or Canada) ship pre-paid freight to any port embarkation in the continental U.S. The pre-paid freight applies only to shipments to any continental North American location (excludes AK and HI).
- Spraymart chooses the ground carrier based on prompt service and affordable price.
- Orders must have one shipping destination for the freight program to be applied. Multiple destinations will be treated as separate orders when determining freight program thresholds.
- Expedited, air freight, express courier (next day, 2nd day) or special delivery are excluded and will be billed freight with minimum of \$12.95.
- Freight determination is on the total order value. One order may have shipments - deliveries from more than one KNA location.

Transportation companies are responsible for any shipment damages or discrepancies once shipment has left the Spraymart warehouse. Carefully inspect all packages before accepting from carrier. Truck shipments require a claim to be submitted directly to the carrier or the claim may not be honored. U.P.S.

shipment damage requires inspection of the package by a U.P.S. Inspector. Any concealed damage must be claimed to the carrier within 10 days of receipt. Original shipping container must be kept until claim is reconciled. Please notify Spraymart of any shortages.

BACK ORDERS

Parts temporarily out of stock will be automatically shipped and invoiced when available unless order indicates "do not ship back order". Appropriate shipping charges will be added to the invoice.

PRICING: All prices are subject to availability, and may change without notice. Please verify at time of order.

WARRANTY

Spraymart parts are warranted for 90 days from date of purchase to be free of defects in materials and workmanship, excluding batteries, battery chargers, motors and pumps which carry their own 1 year manufacturer's warranty. Items damaged due to abuse, accidental damage, improper use or lack of care are not covered by warranty. Normal wear parts including cords, rubber items, hoses, and brushes are excluded from warranty. All warranties must have prior authorization by Spraymart to qualify for reimbursement. All warranty inquiries should be directed to your Customer Service Representative. The foregoing is in lieu of all other warranties, expressed or implied, and constitute Spraymart's only obligation with respect to parts. Spraymart assumes no liability for individual or consequential damages.

RETURNS

No return of parts will be accepted without prior approval by Spraymart. A complete Return Goods Authorization must accompany all returns and can be obtained by contacting your Customer Service Representative. All returned merchandise will be charged a 20% restocking fee unless covered by warranty or shipped in error. Merchandise for return must be filed within 30 days of receipt. Issued returns are only valid for 30 days. After 30 days return authorizations will be voided. Freight charges on all product(s) returned including warranted parts are the responsibility of the customer. All returned merchandise must be sent pre-paid by UPS or FEDEX Ground only. No COD shipments will be accepted.

BATTERIES - FLOODED VS AGM

Spraymart is proud to offer AGM batteries in addition to our Flooded line. Below are the features of each type, so no matter what the need, you'll find the right battery for you.

FLOODED BATTERY

- Most common lead-acid battery in use today with years of proven success.
- Provides massive amounts of reserve power.
- Great life expectancy with proper maintenance.
- Lowest manufacturing cost.
- Dependable against harsh conditions.
- Low tolerance for heat (for every 15° F above 80° F, they will lose half of their service life)
- High self discharge rate
- Must be installed upright
- Not suitable for high vibration

SEALED LEAD ACID (AGM) BATTERY

- Increased surface area of the plate helps retard corrosion and extends the life of the grid.
- The use of thicker grids gives more corrosion resistance.
- Plates are never subjected to destructive ultra-deep discharges due to their "acid-starved" nature.
- AGM batteries have the best balance between capacity utilization and recombination efficiency by containing separators at the ideal compression and saturation. These dual insulating separators also prevent separator misalignment as well as shorting at the bottom and sides of the plates.
- Excels in high current, high power applications and in extremely cold environments.

SPRAYMART HELPS YOU SAVE TIME AND MONEY WITH OUR INDUSTRIAL BRUSH LINE.

CYLINDRICAL SWEEPING BRUSHES (MAIN BROOMS)

Our main brooms are designed for maximum performance. Built with the highest quality bristle materials, staple set to heavy duty precision extruded cores.

A variety of bristle materials and patterns are available to meet different sweeping conditions.

6 AND 8 DOUBLE ROW (LOW DENSITY) – ARE BEST FOR GENERAL PURPOSE SWEEPING. SPACING BETWEEN THE ROWS ALLOW FOR THE PICK UP OF BULKIER LITTER.

- Nylon – 6 or 8 row design – a great choice for most litter and surface conditions. Longest lasting and good hopper loading – medium dust conditions – OK for high temperatures – not for wet conditions.
- Polypropylene – 6 or 8 row design – a good economical selection for most litter and surface conditions. Good brush life – for medium dust conditions – retains stiffness when wet – not for higher temperature debris.
- Polypropylene and Wire – 6 or 8 row design – stiff poly bristles for loading debris and wire to loosen encrusted dirt – for light dust conditions – retains stiffness when wet – not for higher temperature debris.
- Crinkle Wire – 6 or 8 row design – used when aggressively sweeping heavy compacted dirt. Recommended for dry, low dust sweeping – OK for high temperatures.
- Fiber and Wire – 6 or 8 row design – combines fiber for light to moderate dust conditions with wire for loosening lightly compacted dirt and better hopper loading.
- Nylon Patrol design – excellent brush life – the “V” shaped pattern is for sweeping large area at high speeds – superior hopper loading – not for wet sweeping.
- Proex – 6 or 8 row design – this blended polypropylene brush is an excellent choice for all purpose sweeping. Retains stiffness in wet conditions – not for high temperature sweeping – good for picking up paper, sand, gravel and lighter less bulky litter.
- Proex and Wire – 6 or 8 row design – more aggressive sweeping than Proex – with wire added for loosening compacted dirt and loading of heavier debris.
- Union Mix (Natural Fiber) – 6 or 8 row design – this natural fiber material is used for dust and smaller light debris. Not recommend for wet applications.
- Polypropylene Sand Wedge design – this intense zigzag wedge pattern is for picking up fine debris. Poly remains stiff in wet conditions.

18 AND 24 SINGLE ROW (HIGH DENSITY – FULL FILL) – THE CHOICE FOR FINE HEAVY DUST CONDITIONS, INCLUDING SAND AND MINIMAL LIGHT DEBRIS.

- Nylon – 18 or 24 Single Row – long lasting nylon – excellent choice for severe dry dust conditions – ideal for rough surfaces – not for wet sweeping.
- Fiber and Wire – 18 or 24 Single Row – dense natural fiber for heavy dust conditions – with wire added for loosening light compacted dirt.

EXTENDING MAIN BROOM LIFE & MAXIMIZING PERFORMANCE

To lengthen brush life, rotate the main broom, end to end, after 20 hours of operation. This prevents the bristles from becoming set or worn in one direction. Only operate the brush in the full down or floating position on very uneven floors. Doing so leads to premature bristle wear.

For even bristle wear and proper performance, periodically test the brush pattern for proper adjustment.

This is done by making or burning a pattern on the floor or pavement. With the machine stopped, lower the rotating main broom for about 30 seconds. Without moving the machine, raise the brush and move the machine. When properly adjusted the pattern should be rectangular and 2”-2.5” wide.

A thinner pattern doesn’t allow enough bristle contact for flicking debris into the hopper and uneven surfaces. A wider pattern leads to premature bristle wear.

Properly Adjusted Main Broom

Improper Main Broom Pattern

SIDE SWEEPING BRUSHES

Made in a variety of diameters to meet OEM specifications, our side brooms are made using long lasting quality materials.

- Polypropylene - most commonly used economical material for general purpose sweeping. Retains its stiffness when wet - not for high temperature debris.
- Nylon - same sweeping characteristics as poly - longer lasting - not for wet sweeping.
- Flat Wire - for outdoor heavy duty sweeping of high temperature debris, wet mud and compacted materials.

EXTENDING SIDE BRUSH LIFE & MAXIMIZING PERFORMANCE

The purpose of side brush is to move debris away from a curb, wall or structure, so it can be picked up by the main broom. To prevent debris from being moved away from the machine and premature brush wear, the side brush should be properly adjusted.

Ideal brush angle for proper contact with the floor

CYLINDRICAL SCRUB BRUSHES/ROTARY SCRUB BRUSHES

Spraymart cylindrical and circular rotary brushes were designed to meet or exceed the specifications of the OEM, for fit and performance. We offer a wide spectrum of bristle materials, suited for light duty through heavy aggressive scrubbing requirements. The number of rows (12, 14, 18, 20, and 24) vary by brush and OEM standards.

Our top quality rotary brushes come with clutch plates or mounting hardware. Full fill pattern offers contact on uneven floors.

- Polypropylene - economical choice for general purpose light to medium duty aggression.
- Stiff Polypropylene - a more aggressive alternative to poly.
- Nylon - longer lasting than poly, a good choice for general purpose light to moderate scrubbing.
- Prolene - polypropylene material for medium-duty scrubbing. Used on concrete, terrazzo and vinyl tile.
- Grit - silicone carbide particles impregnated in each bristle for mild to very aggressive scrubbing - long lasting.
 - 46 Grit for the most aggressive scrubbing of concrete, terrazzo.
 - 80 Grit for moderate to aggressive scrubbing of concrete, terrazzo, and quarry tile.
 - 180 Grit for lighter to moderate scrubbing of concrete, terrazzo, quarry tile, vinyl.
 - 240 Grit for general cleaning of concrete, terrazzo, and quarry tile.
 - 500 Grit very light scrubbing of terrazzo, quarry tile, marble, vinyl tile, rubber floors.
- Polyester - very long lasting high quality brush for general duty scrubbing - suitable for painted or epoxy coated floors.

EXTENDING CYLINDRICAL BRUSH LIFE & MAXIMIZING PERFORMANCE

For even bristle wear and proper performance, periodically test the brush pattern for proper adjustment. This is done by making or burning a pattern on the floor or pavement. With the machine stopped, lower the rotating scrub brushes for about 30 seconds. Without moving the machine, raise the brushes and move the machine. If the pattern is even across the brush width, the brushes are adjusted properly.

When rotating cylindrical scrub brushes, rotate the front brush to the rear. They can be flipped end to end as well.

SHORT-TRIM PAD DRIVERS

Our short-trim pad drivers are made with shower feed molded plastic blocks and stiff poly bristle fill. Staggered bristle length grips the pad, while center-lock pad holders are included, for excellent pad gripping performance.

Q.C. SOCKETS & PLUGS - LEGACY - BRASS & STEEL

Brass Couplers, designed for 4000 PSI and extended durability. Affordable and rugged all in one.

- PSI Max: 4000
- Precision Brass Design
- Stainless-Steel Band for Increased Durability (Except 1/2")
- Unrestricted Free-Flow

PART NO.	DESCRIPTION
9.802-164.0	1/4" FPT Brass Socket
9.802-166.0	3/8" FPT Brass Socket
8.707-166.0	1/2" FPT Brass Socket
9.802-165.0	1/4" MPT Brass Socket
9.802-169.0	3/8" MPT Brass Socket
8.707-167.0	1/2" MPT Brass Socket

Steel Nipples, hardened steel combined with zinc yellow chromate plating holds up to the harshest environments.

- PSI Max: 4000
- Zinc-Plated
- Hardened Steel

PART NO.	DESCRIPTION
8.707-136.0	1/4" FPT Steel Plug
9.802-170.0	3/8" FPT Steel Plug
8.707-165.0	1/2" FPT Steel Plug
8.707-139.0	1/4" MPT Steel Plug
9.802-171.0	3/8" MPT Steel Plug
8.707-164.0	1/2" MPT Steel Plug

Q.C. SOCKETS & PLUGS - LEGACY - STAINLESS-STEEL

- PSI: 6000
- 303 Stainless-Steel
- Chemical-Resistant

PART NO.	DESCRIPTION
8.707-110.0	1/4" MPT Stainless-steel Socket
8.707-135.0	3/8" MPT Stainless-steel Socket
8.707-140.0	1/4" MPT Stainless-steel Plug
8.707-152.0	3/8" MPT Stainless-steel Plug
8.707-103.0	1/4" FPT Stainless-steel Socket
8.707-125.0	3/8" FPT Stainless-steel Socket
8.707-138.0	1/4" FPT Stainless-steel Plug
8.707-144.0	3/8" FPT Stainless-steel Plug

O-RINGS

O-Rings for Legacy, AP, Hansen, Foster, Parker and quick-coupler brands.

Q.C. SOCKETS & PLUGS - MM22 - TWIST SEAL

Allows U.S. standard hose to connect to 22 mm European fittings.

Not Threaded

- PSI Max: 3600
- GPM: 7.8
- Temperature Max: 302°F
- Internal O-Ring Seal
- Machined-brass Body
- High-Impact Plastic Knob
- Not Threaded

PART NO.	DESCRIPTION	TYPE
8.709-522.0	1/4" FPT	Machined-brass Body
8.709-530.0	3/8" FPT	Machined-brass Body
9.802-173.0	1/4" MPT	Machined-brass Body
8.709-526.0	3/8" MPT	Machined-brass Body
8.709-601.0	3/8" QD Plug	Machined-brass Body
8.709-554.0	3/8" QD Plug	Machined-brass Body

Plugs are made of heavy-duty machined-brass for a safe and leak-free connection.

O-Rings, Viton

PART NO.	DESCRIPTION	TYPE
8.709-540.0	1/4" FPT	Machined-brass Body
8.709-546.0	3/8" FPT	Machined-brass Body
8.709-536.0	1/4" MPT	Machined-brass Body
8.707-185.0	3/8" MPT	Machined-brass Body

PART NO.	DESCRIPTION
8.756-782.0	O-rings (Viton)

Q.C. SOCKETS & PLUGS - EXTENDED TWIST SEAL

- PSI: 3600
- GPM: 11
- Temperature: 300°F
- Double O-Ring Seal
- Machined-Brass Body
- High-Impact Plastic Knob

PART NO.	DESCRIPTION	PSI MAX
8.709-535.0	1/4" FPT x 22 mm, Female, Coupler	3600
8.709-555.0	1/4" FPT x 22 mm, Male, Plug	3600

Q.C. SOCKETS & PLUGS - MM22 - TWIST SEAL

Couples U.S. standard pipe threads to 22 mm European fittings found on imported pressure washers.

Sockets

- PSI Max: 4000, GPM: 7.8
- Temperature Max: 302°F
- 3.9 to 4.2 Oz. Weight
- Internal O-ring with back ring seal assures no-leak operation
- Oversized High-Impact Plastic Knob
- Machined-Brass Body

PART NO.	DESCRIPTION	TYPE
8.709-524.0	1/4" FPT	Machined-brass Body
8.709-531.0	3/8" FPT	Machined-brass Body

HOSE BARBS - BRASS CHECK BARBS

- 1/4" MPT x 1/4" Barb
- Brass Body
- Buna or Viton Check Ball

PART NO.	DESCRIPTION	TYPE
8.904-389.0	Check Hose Barb - Viton	Brass Body
8.904-390.0	Check Hose Barb - Buna	Brass Body

HOSE BARBS - SWIVEL - LOW PRESSURE

Swivels easily at low pressure to eliminate twists and tangles in chemical or water lines.

- PSI Max: 300
- Temperature: 210°F
- Brass MPT base with steel hose barb

PART NO.	DESCRIPTION	TYPE
8.705-050.0	1/4" x 1/4"	Brass MPT, Steel Hose Barb
8.705-052.0	3/8" x 3/8"	Brass MPT, Steel Hose Barb
8.705-053.0	1/2" x 1/2"	Brass MPT, Steel Hose Barb

HOSE BARBS - ORIFICED

Inexpensive way to create suction on inlet side of pump

- 3/8" MPT x 5/8" Barb
- Used in-line from float tank to pump
- One-Piece, Machined-Brass
- Standard orifice 5/32" - drill up to 3/8" to fit your need

PART NO.	DESCRIPTION	TYPE
8.705-093.0	Orificed Hose Barb	Machined Brass

DRAIN COCKS

PART NO.	DESCRIPTION
8.705-060.0	1/4" Fuel Drain with Tee Handle
8.705-061.0	1/4" Fuel Drain with Barb and Tee Handle

HOSE BARBS - BRASS

90° Barb x MPT

- 90° Barb x MPT, Barb x MPT, & Barb x FPT

Barb x MPT

PART NO.	DESCRIPTION	TYPE
90° Barb x MPT		
9.802-142.0	1/4" x 1/8"	Brass
9.802-143.0	1/4" x 1/4"	Brass

FILTERS - CHEMICAL - "THE BIG ONE"

Larger, heavier, and with more filtering area than competitors' filters.

- Corrosion-resistant Plastic
- Stepped 1/4" & 3/8" Hose Barb
- Weighted to Hold onto Bottom of Tank

PART NO.	DESCRIPTION
8.709-938.0	with Check Valve
8.709-939.0	without Check Valve

FILTERS - CHEMICAL - LEGACY BRASS

50-mesh, stainless-steel screen. Removable mesh for easy cleaning. Heavy-duty, one-piece brass body holds the filter on the bottom of tank.

- 1/4" Hose Barb
- Stainless-Steel Check Ball

PART NO.	DESCRIPTION
9.803-672.0	with Check Valve
8.709-934.0	without Check Valve

FILTERS - CHEMICAL - BRASS / PLASTIC

Polypropylene and brass construction.

- 7 mm Hose Barb

PART NO.	DESCRIPTION
8.709-935.0	with Check Valve
9.802-160.0	without Check Valve

FILTERS - CHEMICAL LINES WITH FILTER

- 6-Foot Long, 1/4" Clear Vinyl Tubing

PART NO.	DESCRIPTION	PSI
8.903-991.0	Chemical Line, Filter with Check Valve	Brass Filter
8.903-993.0	Chemical Line, Filter with Check Valve	Plastic Filter
8.903-996.0	Chemical Line, Filter without Check Valve	Plastic Filter

FILTERS - IN-LINE - HEAVY-DUTY

- PSI Max: 145
- GPM Max: 8
- Temperature Max: 140°F
- 1/2" Female x Male
- 50-Mesh Screen
- Unbreakable Reinforced Nylon Cap

PART NO.	DESCRIPTION	PSI
8.709-974.0	Filter	145
8.709-975.0	Filter with Auxiliary Bypass Port	145
8.704-172.0	Replacement Filter	145

FILTERS - IN-LINE - ALL METAL

Diecast aluminum body & cover with a black anodized finish.

- PSI Max: 580
- GPM Max: 6.6
- Temperature Max: 195°F
- 38-Mesh Screen
- 1/2" Female x Male

PART NO.	DESCRIPTION	PSI
8.709-976.0	All Metal In-Line Filter	170

FILTERS - IN-LINE - GREEN-CAP

The original Green-Cap!

- PSI Max: 145
- GPM Max: 6
- 50-Mesh Stainless Screen
- Aluminum Housing with a Plastic Cap
- 1/2" FPT Inlet
- 1/2" MPT Outlet
- Two 1/2" MPT Bypass Ports

VITAL OXIDE® DISINFECTANT

Vital Oxide® is an EPA registered disinfectant cleaner, mold killer and super effective odor eliminator. Ready to use with no mixing required, just spray, wipe or fog right from the bottle. Non-irritating to the skin and non-corrosive to treated articles.

- Disinfectant for use against SARS-CoV-2, the cause of COVID-19.
- No rinse sanitizer for food contact surfaces (D2).
- Kills harmful bacteria, mold and mildew, deodorizes and eliminates allergens.
- Leaves HVAC systems and air ducts free of microbial contamination from bacteria, mold, mildew and other fungi, while ensuring air quality.
- Registered as a carpet disinfectant and recognized by CRI to be safe on carpets. EPA Reg. No. 82972-1 EPA Est. No. 85804-NC-1 EPA Est. No. 29909-CA-1.

DISINFECTANT FOR USE AGAINST SARS-COV-2, THE CAUSE OF COVID-19
