

Job Title: Electrical Supervisor (Electrical & Instrument and Communication)

Job Type: Full-Time, on-site, exempt

Job Location: Taylor, TX

Job Description:

UIBS USA is seeking a bilingual (Korean/English) Electrical Supervisor to oversee and coordinate electrical construction activities for a major project in Taylor, TX. This role ensures compliance with electrical codes, safety standards, and project schedules while managing subcontractors and supporting the construction manager. The ideal candidate will combine strong technical knowledge with leadership skills and effective cross-cultural communication.

Your duties will include:

- Coordinate all electrical work, including wiring, panel installation, conduit installation, and testing.
- Monitor electrical construction progress and oversee subcontractors to ensure accuracy, safety, and timely completion.
- Review progress, schedules, and inspection documents with subcontractors; confirm on-site inspection requests.
- Provide feedback on deficiencies or non-compliances with codes, specifications, and regulations;
 ensure corrective actions are taken.
- Give final confirmation before client inspections.
- Conduct quality checks on external shop work and/or procured products.
- Regularly inspect material storage conditions and subcontractor work status.

- Verify quality of incoming materials used by subcontractors.
- Perform other responsibilities as assigned by the Company.

Your qualifications are as follows:

- Must be legally authorized to work in the U.S. (no visa sponsorship available)
- Fluent in Korean and English (written and verbal).
- Bachelor's degree in Electrical Engineering or a related field.
- Minimum 1 year of full-time work experience.
- Ability to read and interpret electrical schematics.
- Strong multitasking skills, responsibility, and ability to meet deadlines.
- Experience working with multiple subcontractors.
- Excellent interpersonal, collaboration, and communication skills.
- Strong compliance with procedures and guidelines.
- Ability to work effectively in a fast-paced, demanding environment (80% outdoors at the site).
- Highly organized with exceptional attention to detail and follow-ups.
- Strong ownership mindset, proactive attitude, and risk management skills.
- Strong analytical thinking with problem-solving ability and solution-oriented mindset.
- Proficiency in Microsoft Office (Word, Excel, PowerPoint) and Adobe PDF.

Desirable/Preferred Skills:

- Knowledge of electrical and control codes/specifications (NEC, OSHA, DWG, etc.).
- At least 2 years of experience in the electrical field in plant construction projects.
- Knowledge of construction contract documents, technical specifications, and drawings.
- Experience as an electrical engineer or supervisor.
- Experience in large-scale construction projects (\$50M+).
- Experience in oil & gas or semiconductor plant projects.
- Experience using Trimble or similar software.
- International and multi-cultural project experience.
- · Ability to commute reliably to/from the field office.
- Willingness to work overtime and weekends if required.
