

PARTS MAGAZINE, NOW PLAYING ON: MAGAZINES ADD AUDIO EDITIONS

Revised September 2026

Example thumbnail image shown with an article episode.

Parts Magazine and *Drag Specialties Magazine* are coming to Spotify, giving dealers and LeMans sales reps another convenient way to stay informed about the products, brands and industry news featured in each issue.

The new program officially launches with *Parts Magazine* Issue 12. Each audio edition will feature narrated versions of stories from the print magazine, making it easy to listen in the dealership, on the road or between customer visits. Scan the accompanying QR code for a preview featuring stories from our test edition, *Parts Magazine* Issue 8.

For participating vendors, the audio editions are another benefit included with our advertising programs. There is no additional copy to write or audio to produce—we create the audio stories using the editorial material already prepared for the magazine.

Vendors may supply square artwork for their story's Spotify thumbnail, but it is optional. Artwork should measure at least 1,400 x 1,400 pixels and be submitted as a high-quality JPG or PNG file. If no artwork is provided, we will create the thumbnail using available materials.

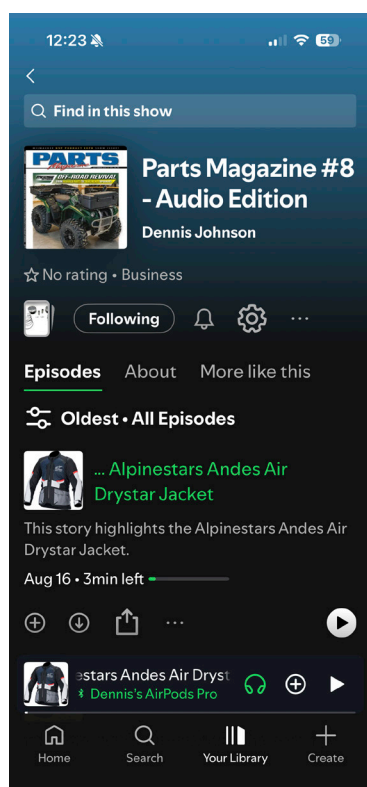

GETTING STARTED WITH SPOTIFY

Spotify is a digital service for listening to music, podcasts and other audio programming on phones, tablets and computers. A Spotify account is not required to listen to our audio editions.

The easiest way to get started is to open the camera on your phone or tablet and point it at the QR code on this page. Tap the link that appears to open the *Parts Magazine* Issue 8 test edition and begin listening.

For easier access on a phone or tablet, download the free Spotify app from Apple's App Store or the Google Play Store. Search for "Spotify," select the official Spotify app and tap "Get" or "Install." Computer users can visit [Spotify.com](https://www.spotify.com) or download the Spotify desktop app.

Once Spotify is open, search for "Parts Magazine Audio Edition" or "Drag Specialties Magazine Audio Edition." Each edition is identified by magazine title and issue number, with its individual stories grouped together for easy listening.
