

Introducing Eyelash Perm/lift

What is

Eyelash Perm?

Eyelash Perm

When it comes to their eyes, however, most women want longer, thicker and curlier lashes. Long curly lashes make your eyes pop all day without the need of mascara and who doesn't want to look good without makeup!

Just as a perm turns straight hair into curls, an eyelash perm is a semi-permanent beauty treatment that is designed to curl natural lashes upwards. Thanks to the optical illusion of upward lashes, your eyes will look bigger as a result!

The effect can last for about 1-3 months, after which, the lashes will go back to its original shape.

It however does not lengthen or increase the number of lashes you have currently.
