We are **Mr.Krystal** by **Dev Group** is a registered company specializing in Manufacturing & Exporting in various natural stone and semi precious stone product. Our company is based in Udaipur, rajasthan, india. We had experience in Importing and trading our product since 2010. Sukabumi green stone is our main and hot selling product. Aside from Sukabumi Greenstone, We also sells Lava Stone, and ziolite powder, etc. If you are interested in being our business partner we will be glad and welcome you to **Mr.Krystal** Family.

Sukabumi Green Stone

Pedra Hijau Verde, also known as Sukabumi Green Stone, is a popular natural stone widely used around the world in locations such as Bali, Hawaii, Phuket, Sanya, Haikou, the Maldives, Rio de Janeiro, and many other tropical destinations. This medium-density stone is particularly suitable for floor and wall applications, especially in swimming pools due to its natural beauty and durability.

The stone can be cut into various sizes, with the maximum dimensions being 300 mm x 600 mm. It is available in different finishes, including natural split face and honed surfaces, to suit diverse design preferences. Additionally, Pedra Hijau Verde is also offered in mosaic format, providing even more flexibility for creative applications.

Lava Stone

Black Lavastone, also known as Batu Candi, is one of the most popular natural stones, especially renowned in Indonesia. It has been widely used in historic sites such as Prambanan, Mendut, and many other temples across the country.

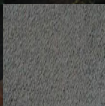

This stone is characterized by its unique black color and small porosity, which adds to its aesthetic appeal and durability. These features make it a preferred choice for various architectural and design applications.

Black Lavastone is suitable for flooring, wall cladding, stepping stones, and even swimming pools. It can be cut into various sizes, with the maximum size being 300 mm x 600 mm.

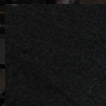

Finishing options include natural split face, sawn cut, honed, and bush hammered surfaces. Additionally, it is also available in mosaic format, allowing for versatile design possibilities.

Bush Hammered

Zeolite Powder

Zeolite is a naturally occurring mineral formed millions of years ago from volcanic activity. During violent eruptions, large amounts of volcanic ash were released from alkaline earth sources. While some of this ash settled on land to form thick beds, much of it fell into seas and lakes. When the chemical composition of the water was just right, a reaction occurred between the volcanic ash and water, leading to the formation of natural zeolite—soft rocks with an ordered internal structure. Our zeolite is composed of 100% pure Clinoptilolite Zeolite Powder, free from any harmful fillers or additives.
