

Our mission is to Build a better future, one man at a time. In the construction industry, there is an urgency for more builders. We take pride in being an apprenticeship program that provides tool training and onsite experience.

From young men and women fresh out of high school to those fresh out of incarceration can learn a trade that puts them straight into the workforce. We also have a summer program for those who are interested as young as 16 years old to pick up a skill that can last them a lifetime.

We are in association with Pinder Construction and Services LLC who is our main General Contractor which is growing at a rapid pace and in need of staffing. Part of our apprenticeship program mission is providing qualified workers for companies like such.

A small idea can bring about so many opportunities. We want to help make the builders of a better future and teach them to do it the LGET way...

*"Too0000**LGET**to QUIT"*
