

Presented at the Kill Devil Hills, NC Board of Commissioners Meeting on 4.28.2021 and the Dare County, NC Board of Commissioners Meeting on 6.7.21

We are addressing you today in reference to Dare County Resolution 12-02-05 that was signed by Warren Judge on Feb. 20, 2012. This resolution opposes United Nations Agenda 21, also known as Agenda 2030, the Great Reset and the Fourth Industrial Revolution. It resolved that the BOC recognize the destructive and insidious nature of United Nations Agenda 21...and urge the communities to reject these radical policies and destructive 'sustainable development' strategies..."

When compared to residents of other towns and cities, people here have the great opportunity of owning and supporting small businesses while enjoying a simple life and the freedom of wide, open spaces in nature. That is why we found it deeply disturbing when Justin Trudeau, the prime minister of Canada, announced that "This pandemic has provided an opportunity for a reset." He was referring to the Great Reset, which was also recently heralded on the cover of Time Magazine. It is the exact agenda that Dare County resolved to oppose back in 2012.

How might this possibly affect our lives here on the Outer Banks? Actually, it is already being implemented, and is set to seep into the fibers of every local government. This 'reset' is being covertly pushed into local communities throughout the US by the International Council of Local Environmental Initiatives (ICLEI) in the form of local "sustainable development" policies such as Smart Growth, Wildlands Project, Resilient Cities, Regional Visioning Projects, and other 'green' or "alternative" projects.

In conjunction with this reset, the World Economic Forum, whose members include globalist billionaire leaders, heads of state, big pharma and big tech, made some predictions for the year 2030. They include:

1. "You'll own nothing and you'll be happy."

Do you want your right to own land, a home, or a car eliminated?

2. "You'll eat much less meat. An occasional treat, not a staple, for the good of the environment and our health."

In other words, food, resources and rations will be theirs to choose. Did you know that Bill Gates owns more farmland in the U.S. than any other private farmer, having purchased 242,000 acres in the past few years – including within North Carolina? In Oregon, there is a ballot initiative that would criminalize the practice of animal husbandry, in what proponents describe as an effort to create a 'sanctuary state for animals.' Farmers would no longer be able to raise livestock for food.

3. "Polluters will have to pay to emit carbon dioxide. There will be a global price on carbon dioxide. This will help make fossil fuels history."

The reality is that under the Paris Accord, China pollutes 11 billion tons of carbon, and in 2030, that number is allowed to go up to 20 billion. There is more pollution coming, not less. Do our small business owners really want to pay more taxes?

4. "Western values will have been tested to the breaking point."

Do we want our American constitutional rights taken away?

Who wouldn't want to achieve the goals of a clean, sustainable future, zero poverty and hunger, and a decrease in greenhouse gasses? However, under the guise of humanitarianism, this 'reset', will bit by bit erode many of our rights.

If you doubt that any of this could happen in America, you can ask someone who comes from Cuba, Venezuela or any other country that was conquered by communism. Soviet politician Nikita Khrushchev's prophecy of America's fate is one we are seeing unfold before our eyes. He said:

"You Americans are so gullible. No, you won't accept communism outright, but we'll keep feeding you small doses of socialism until you'll finally wake up and find you already have communism. We won't have to fight you. We'll so weaken your economy until you'll fall like overripe fruit into our hands....We do not have to invade the United States, we will destroy you from within."

Our local businesses are struggling to keep employees because it has proven to be more lucrative to collect unemployment. This is one clear example of our government fostering financial dependency, destruction of small businesses and therefore, America from within. Meanwhile, the Dare County Health and Human Services attempted to run the "Safer Spot" campaign that discriminated against business with fewer vaccinated employees.

The World Economic Forum, the Council on Foreign Relations, the United Nations, and many other well-funded organizations vow they have our best interests at heart. But do they?

We ask that you look very closely at what the Great Reset is really about. Based on the current situation that has been presented with Covid-19 over the past year, we ask that our local government thoroughly revisit the 2012 Resolution to understand why we need to formulate actions and regulations that deflect infringement on the rights and liberties of Dare County residents. We implore you to pressure Governor Roy Cooper to oppose any policies that coincide with Agenda 2030 that are in violation of our rights to private property and bodily sovereignty.

Disguised as conscientious environmental stewardship, the Great Reset is all about control - control of energy, wildlife and resources, surveillance smart grids, education, food production, and people themselves. When you hear the words "the new normal", is this the future that you envision for yourselves and our children?
