NATURE WALK

Take this sheet with you while you go on a nature walk with family and friends.

Find a fallen leaf on the ground. Match it to one of these leaves to discover what kind of tree it belonged to. If your leaf is not one of the ones below, then draw a picture of it and look it up when you get home.

Look for bugs on the ground, on trees, or under rocks. Draw a picture of them here.

What animals have you seen on your walk?
Draw a picture of them here:

There are many ways you can help the earth.
List some ideas here:

GEM STONES

Decorate the gem stones with Crayola® Crayons or Markers.
Learn about these gemstones as you color them.

AQUAMARINE

An Aquamarine stone can be any shade of blue from pale blue to blue-green. This gem can be found in Brazil, India, South West Africa, Australia, and Russia.

AMBER

Amber is a hardened sap from prehistoric pine trees. If you look closely at a piece of amber you might find some insects from that time period. They became stuck in the sap. Amber is a yellow-brown or gold color. It often washes up on beaches in Canada, Romania, Siberia, Burma, and East Prussia.

RUBY

A Ruby stone is red and was believed to have special powers by the Greeks. It was believed to protect a house from storms. This gem can be found in Thailand, Burma, Tanzania, and Sri Lanka.

QUARTZ

Quartz can be a variety of different colors from pink, green, purple, yellow, or clear. Quartz is one of the most common minerals on earth. Quartz can be found in Germany, England, Brazil, and the US state Arkansas

PEARL

A Pearl is a white gem that is created inside of a mollusk, or oyster. A piece of sand is caught inside the mollusk which builds a silky coat around the sand. This forms the pearl. Pearls can be found in oceans near India, Australia, and Central America.

TURQUOISE

Turquoise is a blue stone with black colored "veins" called matrix. These veins are mixes of brown or gray rock when the turquoise was formed. Found in Iran, Russia, Egypt, England, and southwestern United States.

GOLD! DISCOVERY

Gold is a very popular metal. There are many uses for gold such as, jewelry, electronics, or painting. The Great Gold Rush in the 1800's caused many people to move to California in search for gold and fortune.

Draw gold jewelry on the girl. Design earrings and a necklace.

FOOL'S GOLD

Chalcopyrite, fool's gold, is sometimes mistaken for gold. Chalcopyrite is a type of copper. The color is green yellow. This metal is hard but flakes off.

Draw gold rings and bracelets.

"Gold panning" means searching for gold in rivers. Panning uses a pan to sift through the river banks. The water washes away the dirt and if lucky, leaves gold pieces.

STAND-UP Horse

Directions:

1. Print out this page and color with Crayola crayons or markers. Glue page to a thin piece of cardboard, such as a recycled cereal box or manila folder.
2. After the glue dries, cut out the cardboard shapes, remember where the letters are. Glue the matching shapes together, back to back.
3. Cut a slit on each dotted line. Fit the pieces together by matching the letters and sliding the slots into each other.
