Deep copper gold with amber lights with good beading. Crème caramel with candied orange. Manuka honey and mango; rock salt, liquorice, maple-cured smoked bacon and extinguished peat kilns.

Blockchain Traceability:

Continuing from last year's world-first, by scanning the QR code on the back label, consumers will be able to trace each aspect of the production from field to the name of the bottler. Each bottle has a unique identifying code and digital certificate attached, which enhances security to both producer and consumer.

In addition, this year's outer bottle wrap will include a label inviting consumers to unwrap the bottle and scan the QR code.
