Howard Carpenter and the Microelectric

Dan Bowman and the Easy Setup

SHOW & TELL...

Howard Carpenter brought in the smallest flying RC micro electric airplane (not a helicopter). It's the Vapor by Horizon hobbies. It's a very gentle flyer that can easily be flown in the house without damage.

Tom Smith keeps coming up with the unusual. He brought in the Long EZ. It's a canard style plane that he bought on the Internet. He powered it with a Supertigre 46. Can't wait to see this baby go.

THE CHRISTMAS RAFFLE...

We will be raffling off some spectacular radios at our Christmas Party this year. There are two Spectrum DX6i full range w/o servos and one Futaba 7C 7-Channel 2.4 Ghz FAST system w/o servos. These are class items, tickets are on sale now, \$1 each or for big spenders 6 for \$5.

FROM THE PIT...

Dan Bowman built a very intriguing table set up for starting your airplane at the field. It allows you to get the plane and everything associated with it ready to fly without having to get down on your hands and knees. It's convenient to use and Dan says you can use it if he's not on it. Very generous.

Caught Herman Reichart flying an electric Great Planes Combat P-40. It is a very nice looking plane and Herman really flies it well.
