Flood Plain/Drainage-Way: Maintenance

The existing creek, stream, river, or drainage channel traversing along or across portions of this addition, will remain unobstructed at all times and will be maintained by the individual lot owners whose lots are traversed by, or adjacent to, the drainage-ways. The City of Cleburne will not be responsible for the maintenance, erosion control, and/or operation of said drainage-ways. Property owners shall keep the adjacent drainageways traversing their property clean and free of debris, silt or other substances which would result in unsanitary conditions, and the City shall have the right, but not the responsibility, to enter the property for the purpose of inspecting the maintenance work by the property owners. The drainageways are occasionally subject to storm water overflow and/or bank erosion that cannot be defined. The City of Cleburne shall not be liable for any damages resulting from the occurrence of those phenomena, nor the failure of any structure(s) within the drainage-ways. The drainage-way crossing each lot is contained within the floodplain easement line as shown on the plat.

Construction Prohibited Over Easements

No permanent buildings or structures shall be constructed over any existing or platted water, sanitary sewer, drainage, gas, electric, cable or other utility easement of any type.

Utility Easements

Any public utility, including the City of Cleburne, shall have the right, but not the responsibility, to move and keep moved all or part of any building, fence, tree, shrub, other growth or improvement which in any way endangers or interferes with the construction, maintenance, or efficiency of its respective systems on any of the easements shown on the plat; and they shall have the right at all times to ingress and egress upon said easements for the purpose of construction, reconstruction, inspection, patrolling, maintaining, and adding to or removing all or part of its respective systems without the necessity at any time of procuring the permission of anyone.

Floodplain Restriction

No construction shall be allowed within the floodplain easement, without the written approval of the Director of Public Works. In order to secure approval, detailed engineering plans and/or studies for the improvements, satisfactory to the Director, shall be prepared and submitted by the party(ies) wishing to construct within the flood-plain. Where construction is permitted, all finished floor elevations & mechanical equipment shall be a minimum of three (3) feet above the base flood elevation (BFE) as determined by the latest FIRM approved by FEMA.

OSSF

Each lot will be serviced by a private septic system. All private sewage facilities (OSSF) must be designed by a professional engineer or registered sanitarian based upon a site analysis performed on the subject lot and all necessary permits obtained before starting construction of a private sewage facility. Proper drainage must be provided throughout the subdivision to eliminate surface water saturation of areas where private sewage facilities are to be used.

Recorded Covenants and Restrictions

This plat does not attempt to amend or remove recorded covenants or restrictions.

Void unless recorded in the plat records of Johnson County within five (5) years of the date of approval of the City of Cleburne.
