

THE RAINBOW GOSPEL OF THE NINE MASTER ENERGY SIGNATURES

AS WRITTEN BY
AWKWARD SINNER

MICHELLE ELLA POWELL

The story of creation. The story of how we, humanity, came to be. It is a gospel.

THE RAINBOW GOSPEL OF THE 9 MASTER ENERGY SIGNATURES

This is the same story that has been told before. There is no difference...this is the same story Jesus, Mohammad, Buddha...those who saw High Truth, the Saints, the enlightened...this is the story they knew and understood. They are each the Divine – their Highest Self – fully realize, fully awakened, fully aware – **AND BALANCED** – existing in perfect harmony of their innate Divine Light Force Energy and their 3D physical form/body/meat suit of flesh. They shared their message with the world spreading peace, light and love for those who were ready to receive it. Not all are ready to receive and integrate High Truth.

The real truth. The original story.

The High Truth message – that which has never changed – IS THIS: that we are ALL One. We are all unique expressions of INFINITE Divinity existing within FINITE physical form and matter. We are first and foremost, though, spiritual energetic etheric bodies. Think about your nervous system and billions of moving, conscious cells, particles, atoms, quarks.

(Everything breaks down to the periodic table.) The building blocks of life.

We, humanity; consciousness; we are all and everything you see, feel, touch, or taste – we are all equally the same and of the same. We are all of God. We are all Divine. We are simply expressed in different forms and ways. All of this through complex beautifully crafted, expertly designed LIFE. Living. For the purpose of LOVE, ENJOYMENT, ADVENTURE, CREATION and DISCOVERY. Life was born out of focused energy consciously creating. **Consciousness is always changing – either expanding or contracting.** Consciousness, just like the earth, universe, and our very essence – **is ALWAYS EVOLVING.**

This is the base message that has been shared over and over yet due to underdeveloped consciousness and unbalanced energies, this base message gets lost in translation or worse, weaponized for further destruction through illusions of separation. Michelle will be sharing clarification of the base message and the Original Story which has also been lost, manipulated, mistranslated and misunderstood. Though have no doubt, the messengers that have come before have all known the same.

Again! **Consciousness is always changing – either expanding or contracting.** Consciousness, just like the earth, universe, and our very essence – **is ALWAYS EVOLVING.** Stop looking backwards or trying to hold on to the old baggage. Let go of that which no longer serves you. Everything is always in a state of constant evolutionary movement – anything stagnant or still begins to die immediately (still moving). Your old ways have betrayed you. Your leaders have perverted what was once truth and the masses have blindly followed. You cannot call yourself a truth seeker if you refuse to let go of falsehood. You cannot call yourself a truth seeker if you resist questioning and deep, honest self-reflection. EVOLVE or die. Not

you the person – Humanity. We must evolve as a high frequency collective Christ consciousness if we desire to save our planet, species, and move into a truly blissful future.

It takes eons to develop our **Godhead Consciousness** with such dynamic strategy that we can produce a period of True Bliss, Age of Enlightenment, Heaven on Earth. We are at the precipice. **Many will awaken.** Many will spread the message. Though the words and imagery may vary slightly, **it is paramount that you heal your emotions and minds so you can properly attune your discernment first within, then without, so you can see the High Truth message as it emerges** and spreads. Look for common energies, common threads and themes. **Find the facts that never change, the heart of the message.** Find the common. That is High Truth.

Those who are able to quickly evolve their ability to see past words and definitions and perceive full energetic messages in totality with unattachment and without limiting beliefs - they will learn and expand the quickest. You must be willing to open. You must be willing to receive. To be teachable and consider something new or different.

Ultimately, you must be willing -to sacrifice existing personal truth for intense examination willing to face grief, loss, and the death of your mental self (AKA lower self or lower consciousness level - some call this process Ego Death); willing to question self-perception in Faith that High Truth, True Truth, NEVER CHANGES. Therefore, to question High Truth brings no death, no pain, High Truth simply is and cannot be hurt, rebutted, or changed.

So, **IF** you think you already know high truth and all the answers to life and death, the before and the after, and **IF** you think you understand who you are and what your purpose is, **IF** you believe your understanding is correct and reliable, **THEN what harm is there in considering something different or new?**

If you believe you are born of Love and Light, if you believe you are connected to the Divine, then you are perfectly protected by Love. SO, if you do the internal self-reflective journey and question your deepest held beliefs, there is nothing to fear because High Truth never changes.

If you are afraid or unable to honestly question your deepest held beliefs, **you must ask yourself why?** (The answer is often fear – self created fear and doubt in one's ability to trust their inner most self.)

If your understanding of Jesus or any deity or faith head or your understanding of any religion or spirituality that you align your life with is true truth than you will never be able to dismantle it.

Questioning High Truth never affects it – *unless it is polluted through an unhealed vessel* in which case it **ceases to be Real High Truth.** “Knows just enough to be dangerous.” Corrupted truth or illusions of tainted truth. Organized religion.

Can **YOUR** deepest beliefs stand the fire of question and challenge? Can YOUR truths be unraveled?

You must find out for yourself. You must!

No one else can tell you or answer this for you. And as long as you are going by what other people (including Michelle) or other books have said then **you are giving up your right to sovereignty; choosing to follow because it is easier than being someone who paves the way – a leader.**

This is the Second Coming of Christ as many call it. It is the Christ Consciousness awakening in millions and many across the globe in hopes to tell the story once again loud enough so the Whole Earth can move collectively to a new age of Peace. This is what the messengers have been trying to say since the beginning. MANY who THINK they understand Christ Consciousness DO NOT.

High Truth #1 –

YOU DON'T KNOW WHAT YOU DON'T KNOW (YET!).

THOSE WHO CANNOT SEE THE LIGHT DO NOT KNOW THEY CAN NOT SEE IT.

THOSE WHO DO NOT KNOW THE TRUTH DO NOT KNOW THEY DO NOT KNOW IT.

This is why people default to closing off, shutting down, or resistance. It is lack of understanding which creates restriction and fear. The answers to most High Truth are always open, accept, love and light. This is where hope, faith, trust and belief come into play. Learning to find the Light within yourself and not giving up until you find what you're looking for – your true identity. Understanding also that there is a pathway of acceptance and understanding for anything. (Acceptance is not the same as agreement. Nor is understanding.)

High Truth #2 –

KNOW THYSELF

You must ask yourself over and over throughout your life, with raw vulnerability and honest self-reflection:

Who Am I Really? Go within and see for yourself. **You are conscious dynamic light energy expressing itself in physical form governed by 9 dominate energies** (though some may see 3 or 6 or even 12...this is all the same and One – like seeing through a different fractal). **You are Light.** Conscious, self-aware Light. That Light is your Life Force Energy. **You are of Love** (think frequency, energy, not fluctuating emotion).

You are enlightened, in Nirvana, or existing as your Divine, Highest Self or “God” in true god-state when your 9 dominant conscious energies are perfectly balanced. This is the Trinity, this is the perfect union of Body, Mind & Spirit. **This is what we are trying to awaken and achieve in each and as many as we can.**

When you ask yourself, with honest self-reflection, not satisfied to not know “Who Am I?” you must sort out the old/bad/negative – that which you no longer prefer – by facing it, accepting it as unbiased truth with no emotional attachment or expectation to outcome (often must first process if emotion is deeply imbedded – **healing is energy transmutation**). Everyone can do it but there are understandings that must

happen and not all can receive or face their truth. Despite what is written even here, **this answer you must find from within.** The words may vary from person to person. But as you ask this question of your innermost self, chasing Light and Love within, the more healed you get in your body, mind, and emotions. As you heal your emotional wounds and remove mental blocks, you will see much more clearly. As you heal, the better you will understand this High Truth that Jesus, Buddha, and many others have understood. It is ok if your answer changes and grows over time – not all can accept High Truth in totality all at once. **The measure of success lies in your ability to evolve mentally, emotionally, spiritually and in all areas of your being.** Progress over perfection. Honesty. Vulnerability. Willingness to let go of that which no longer serves your highest good balanced with the highest good of humanity. Willingness to see who you are today and who you'd like to be and then little by little day by day “doing the work”. Compare yourself to no one but the you of yesterday.

What is My Purpose? You must go within, self-reflecting again, not stopping until you find the answer. As you evolve spiritually, you may find your answer changes. That is ok! **Do no harm as best as able, with sense and reasonability.** Seek balance in all. Find alignment within by discovery and chasing your highest passions. When you truly get to acceptance of High Truth, many will find, like Michelle, that their greatest purpose is to share these truths once again with the world. The messengers of God. Michelle is a messenger of God.

High Truth #3 – Every time you pass judgement in your heart “no; this is wrong; this isn’t the way its supposed to be”, every time you reject from a place that creates exclusion – a place opposite of Love and acceptance, you miss the mark. **Making a judgement of the heart is different than making a judgement of the mind. You must learn and understand the complex differences between your body and the way it communicates both internally and externally.**

Many out there today are saying “only God judges” when they themselves are daily pointing fingers assigning judgement and blame to all the acts of others without ever going within. They do not realize what they do. **This is so many.** This is the mass majority of those who flock divided segregations of sects of so-called faith-based establishments. Anyone that preaches exclusion, division, or hell as punishment is NOT OF US.

US as the dynamic, complex, True, OMNIPRESENT, INFINITE, GODHEAD OF HIGH TRUTH.

THE ALPHA, THE OMEGA, AND ALL THE OTHER WORDS THAT HAVE ATTEMPTED TO DESCRIBE THAT WHICH CANNOT BE.

Again! Anyone that preaches hell as punishment is not of God, is not of God’s Love.

Honest Self-Reflection is PARAMOUNT in distinguishing truth.

Why do you do and say the things you say and do?

What do you believe and why?

When you realize the problem lies within, you realize you have full power to make corrections.

Humanity, as you know it, is still so vastly under-evolved, **meaning we lack the understanding and communication skills and language to properly explain all of the High Truths. Words do not do justice when attempting to explain the Mind (Essence) of God or Godhead.**

So much is lost in translation. So much. Time and time again. The messengers deliver the message over and over to MANY, spread throughout every generation, but over time the High Truth gets distorted, corrupted, and ultimately lost.

The Original Story of Creation

It is a story of balance and how it fell out.

There was nothing. No void. No space. Just true, absolute Nothing. No God. No devil. No sin. Just true, absolute nothing. (This is the true state of everything – all and nothing as one. Existence and nonexistence simultaneously. There are not words in the English language yet that can communicate this particular truth to full comprehension for most. However, there are those who have seen and felt this truth who can confirm.)

Universal Life Cycle – the cycle of expansion and contraction that all energy experiences and the birth and death of a complete Universe.

In the beginning of this particular Universal Life Cycle, the first steps of Creation were born into existence through an explosion of energy. First, soundless pressure waves followed by Light and sound. In that exact moment, you *could* say God or Divinity (as we understand it) birthed itself from Nothingness into Existence. This is also known as the Big Bang.

There was nothing. No God. No bad guy. True Nothing. THEN.

Soundless pressure waves came first.

These soundless pressure waves carried LOWEST KNOWN SOURCE, lowest consciousness, out and forward to lay the groundwork or framework for what humans are now viewing as the Quantum field. Many civilizations have had different names for this field or space. Human understanding again fails but we try to convey what we can to those who are able to listen.

The first waves that laid the quantum field also put into place the primary natural laws concerning things like magnetism, velocity, and all the laws of mathematics and energy principles. (Mathematics still can't explain it all but soon mathematics, science and spirituality will find their equilibrium and see how they compliment one another not compete.)

White Light - a prism that speaks inclusion – a prism that creates pure White Light only when in total balance where all colors are equally represented. Purification is in true balance and equality – not stripping and restricting and emptying. **White Light is not singular it is plural and dynamic!**

THEN waves came AGAIN which sparked the first Light. Initial Light. This time, intelligent sound waves came carrying the message of Light and Light was created.

When Light was created, it was NEVER white as a singular or solitary color.

Brilliant, dynamic light was born in the formless form of 9 unique energy signatures each with unique frequency and energetic characteristics and identifiers.

When Creation was sparked into existence, sound went out carrying the message of Light. The Light that was spoken into FIRST existence at the point of creation was actually **9 Master Energy Signatures** which are perceived as White Light when balanced and properly represented.

These conscious, intelligent 9 Master Energy Signatures are what we call God, the Godhead or Life Force, Prana or Chi. That which is in our breath. That which fills our lungs and pumps our blood. These intelligent 9 Master Energy Signatures are that which weaved the world as we know it and many worlds before. The way in which they bend, blend, and flow together is like an artist painting a masterpiece. Unless you have seen it in Full, you cannot comprehend. Once you have seen it, you understand. Not all will see it. Not all will understand. **They are us. Our Divine Self. Our Life Force.**

9 went out. Unique, dynamic energies.

Still, there was no devil. No bad guy. No enemy. Each unique energy signature was carried by its own distinguishing characteristics or energetic dynamics. Each is its own frequency. Each with attributes that developed and multiplied over time.

The 9 went out. To carry the message. The message being **“we are Light. We are Creation experiencing itself. Go create and exist and experience.”** This message was carried by the 9 energy signatures who worked and weaved to build our cells, the molecules, the planets and solar system, our earth and every single plant and tree and animal. Each of the 9 Master Energy Signatures is infinite God expressing itself as a unique finite expression of frequency.

To create life (as humanity understands it) we, the 9, had to follow the first principles of energy and the quantum field as laid by the first waves as those were the first building block of the cosmos which led to earth and human existence. This is where we find the original existence of base duality – positive and negative, push and pull. In the first wave that laid the quantum groundwork.

Building from within the quantum structure, the 9 worked to create laws and principles, creating categories and labels to build slowly and with meticulous complex intelligence, the dynamics of all that is seen now. The synergistic principals of energy dynamics – the way things magnetize, polarize, the exponential nature - gave birth to more frame works slowly growing the Earth and all that you know like a seed.

The 9 were in perfect harmony and balance. One and perfect Union, like many think of as the holy trinity.

The Godhead consciousness and complex dynamics continued to grow and expand. Birthing all of the later energies; complex combinations of alternating and repeating energies weaving to create tapestries of new dynamic energies (think elemental table, think deities, think gods of mass religions even).

Everything was perfect and balanced.

There came a point.

Because consciousness evolves and expands, there came a point when one of the 9 Master Energy Signatures became aware of the separation and difference of the others. The first moment the first of the 9 Master Energies realized and awakened to the knowledge “I am different. They are different. We are different.” This is the birth of separation in its toxic form. It was “We are One, We are Same, we are perfect equal flavors of Divinity in perfect Union.” Then it was “We are One...wait, I am unique, I am different...wait, they are NOT me, we are NOT the same...” In that moment the pendulum of universal energy swung out of balance – **separation from God as an idea was born in the energy we now refer to as Fear.** Jealousy, Envy, there are many strains all linked and born of separation.

The vast progress and amount of overall good that had been created – including the planet Earth – was born out of perfect balance of the **unified Godhead of the 9 Master Energy Signatures** and all the flavors of creation.

When the pendulum swung out of balance and Fear (this is not the truest name, but it is the best identifier for this purpose and time). Fear became aware of and focused on the difference, the same quantum principles of the universe still worked – and dark or negative begot dark and negative. As with all things, exponential growth occurred.

In the unseen, beyond human understanding, fear, jealousy and envy focused on separation and attacked what I will call Love (that is not its name but best for identifying for now). It tried to snuff out Love. Balance was broken.

The whole of the universe shifted in that moment and the effects rippled throughout eternity. This is the first and only Great Sin or Offense. **When the Godhead turned on itself.** This is the origin of the original sin ideology.

This is the truth linked to the garden of Eden and revelation of knowledge. The story is vastly misunderstood.

PART 2 - 4/16/25

Garden of Eden

You and I here living today in 2025, we see the world differently than the first conscious humans or even the first conscious beings. **You must be able to understand dynamic perspectives if you are to understand these High Truths.**

We see separated categories, divisions (think materials/plants/shapes even) however IN THE BEGINNING when the first energies that built earth were building, THE 9 MASTER ENERGY SIGNATURES and their descendants or concoctions, they DID NOT KNOW OR THINK in terms of separation LIKE WE HUMANS in 2025 do.

(Have you ever just simply done something automatically, the first time, like you innately knew what you were doing without giving it any thought, attention, or effort? This is that energy of the 9, the first builders.)

So as earth was created, it was simply created – built and cultivated over millennia organically. It was born of natural flow. Much in the same way an artist creates an inspired, unique piece of art for the very first time – without thought or judgement, simply following the energies of “this feels right” until they stand back and look and see a Masterpiece. That is how the earth was created originally. Without thought. Without judgement. At no point did any of the dynamic energies or 9 Master Energies that created earth ever think “we are different, or one is better”. These types of energetic sentiments DID NOT EXIST. AGAIN REMEMBER, the WAY IN WHICH YOU THINK AS A HUMAN IN 2025 DID NOT EXIST at the time of creation. You must see from OUTSIDE your personal human filter and lens.

As humans evolved and as conscious awareness continued to evolve and expand (as it is always doing), there came a point in time (after/during first evolutionary beings existed) where conscious development evolved to understand “there exists separation”.

Prior to this moment in time, the concept or idea of separation DID NOT EXIST. But in this moment, in this instance, there was NO concept of separation AND THEN THERE WAS. As the epiphany of separation as an idea or thought was born in consciousness, the “beings” that existed were first in marvel – awe – appreciation. There was a time of wow, look at the beautiful ways in which we are separate and different. A time of celebration of the recognition of diversity (THAT ALWAYS EXISTED BUT WAS NOT YET KNOWN OR UNDERSTOOD TO human CONSCIOUSNESS).

However. The season of celebration was brief.

It did not take long for the knowledge of separation to turn dark.

ALL HUMANS ALL BEINGS ARE DIVINE EXPRESSIONS OF LIFEFORCE ENERGY DIVINE EXPRESSIONS OF GOD AS LIVING GODS

Once separation came into awareness, DUALITY IN CONSCIOUS AWARENESS WAS BORN. Previously, all was One. All was dynamic and complex and yet still all was One.

It did not take long before the conscious realization of separation began to divide the mind of the first beings. THIS IS THE BIRTH OF WHAT WE CALL EGO OR FLESH. They turned against themselves WITHIN their own minds first. Confusion and frustration were born. They did not exist as concepts or energies before. As the First Beings own mind began to integrate the new conscious concept of separation, as

confusion and frustration were born in mind, so then too came the birth of “Yours vs Mine” and “Good or Bad” and “Better or Worse”. These concepts did not exist before. And they were manifested or birthed through the conscious evolution of the first beings.

IT MUST BE STATED THAT THERE WAS STILL NO BAD GUY. No evil force doing bad things. There was ALL is ONE. There was Light and the first unified energies were sent out. There was Light and Dark (dark is not inherently bad!) There was creation, Lifeforce, inspiration. There was Earth. Then there were the First Beings – living in harmony. **Do not misunderstand harmony for peace; do not think there was not death or sickness – these things are a natural part of universal creation and conscious awakening. Life and death are 2 sides of the same coin – one cannot exist without the other. Neither are good or bad; they simply are.**

Do not think in simple terms of a human’s lifetime...think in terms of the lifetime of a planet or galaxy.

Do not try to filter COSMIC or DIVINE truth through a human lens. If you cannot detach from your temporary, finite human experience and expand your mind, you will not be able to grasp these complex concepts. These complex concepts are meant to help sort human misunderstanding of good/bad/right/wrong. We must heal our collective judgement wounds.

Within the First Beings, these energies/ideas/feelings were born. Confusion. Frustration. Yours, theirs, mine. Good, better, bad, worse. It is imperative that people see these concepts did not exist beforehand and no external evil brought them about. Much in the same way you a human living in 2025 can have an “ah-ha” moment of epiphany, this is how these energies came to be.

Again, in the same way that a first idea always starts somewhere – the first ideas relating to greed, jealousy, and hatred were born. Born into the minds of the First Beings through their own self revelation and conscious awareness.

These things and what humans consider evil – these are not indicators of a devil or external evil entity. These things are simply indicators of a young, unevolved species with beginning levels of conscious awareness and emotional intelligence.

When the first Murder occurred, it was born of impulse. Pre-meditation came later.

Still, no bad guy existed. There was no one to blame.

However, the birth of separation ideology did birth the Ego – which is again not bad but part of organic evolution.

THE SHIFT OUT OF BALANCE

The thoughts and actions that began to happen with the First Beings DID cultivate energies that began to push The All of the All OUT OF BALANCE. As more emotionally immature beings made impulsive and immature choices from those energies of greed and jealousy they shifted the universal balance of all energies into the direction of “selfish, harmful, divisive”.

They were not driven by a devil or evil. IN FACT, they were driven by the same Life force energy of creation itself – driven by the only God energy that exists. But the energy was now filtering through an advanced level of conscious development, through human mind and thought, and through the newly created Ego (simply the sense or awareness that I am separate, or I am separate from you). The All is All or All is One understanding and knowledge faded and was lost to many, pushed out by organic evolutionary forces (light attracts light, dark attracts dark....the less preferable or less desirable energies such as greed and jealous were newly birthed, not well understood, and taking off with enormous force. Synergy works in all the ways.)

The universe has existed many times. There have been many planets, many species...there is nothing new under the sun in the grandest sense of it all.

The development of Ego and self awareness and growth of humanity often takes this turn where separation causes division but yet growth also comes (industrialization as example).

The development of the Ego is not inherently all negative or bad. Fear has kept many safe and extends life.

The development of the CONCEPTS of GOOD AND BAD, YOURS AND MINE, BETTER OR WORSE – those are the concepts that became toxic and have corrupted this Earth, its inhabitants and all the reigning energies.

IF YOU NEED A DEVIL OR BAD GUY TO BLAME – IT IS THE BELIEF IN CONCEPTS LIKE GOOD AND BAD or RIGHT AND WRONG, YOURS AND MINE. Rarely in life are there things that all people would 100% agree on in terms of good or bad, right or wrong. Common sense does not exist and it is foolish to think of sense of self as common. It is anything but. For the sake of this writing, if you need a devil or demon or bad guy – it is these concepts and we shall call them **TOXIC ENERGIES** (toxic thoughts, toxic mindset, toxic as in harmful to humanity and the success of the human race as it exists today).

If you STILL really, really, really need a bad guy to blame – go look in the mirror.

The birth of yours and mine, right and wrong, good and bad, this is like the creation of Satan or Lucifer – basically an idea was born to assign fault and blame. Again, concepts of fault and blame did not exist previously (not in the way we today would think or understand).

All of the stories of the various religions are human attempts to explain or understand what has just been written. The story has never changed. This is the story Jesus understood WELL.

It is our hope that Michelle can articulate this in such a way as to have a significant impact on refocusing spiritual understanding of such things.

I THINK THIS PART IS DONE

- Michelle Ella Powell 2025

NOTES>>>

In the very beginning...

Initial State – The universe began as a singularity. A point of singular, unified, infinite density and temperature, representing potentially unlimited energy.

A small quantum fluctuation triggered the expansion, effectively “igniting” the potential energy in the form of the Big Bang.

The universe rapidly expanded, and the temperature fluctuated and cooled allowing for the formation of elementary particles like quarks and leptons.

As the universe continued to cool, these particles combined to form atoms, primarily hydrogen and helium, the building blocks of the cosmos.

Microscopic fluctuations in the early universe, imprinted in spacetime, grew over time to form the large-scale structures we see today, like galaxies and galaxy clusters.

The Creation of our Universe (as we know and understand) is a powerful manifestation of energy. The questions to ask really are (1) AT WHAT POINT was consciousness developed and by what stages...how to quantify original cultivation of awareness and conscious development.

There is nothing greater or more or beyond “the All of the All” or “the One” or “The Oneness of All”. HUMAN consciousness cannot hold the true All of the All at this stage, so even those with expanded awareness are seeing only in part. That is why when humans become enlightened, a true mark is the depth of understanding how much they don’t understand while feeling assurance deep down that it’s all ok. The other question (2) is AT WHAT EXACT POINT DID DIVISION ENTER?

Further consideration...to help humanity understand. WHAT EXACTLY IS EVIL? FEAR? HATRED?

GO BACK AGAIN MICHELLE – WHAT IS YOUR MESSAGE? WHAT MESSAGE DID YOU BRING WITH YOU TO SHARE WITH THE WORLD THIS TIME?

At this point in 2025 history, I would be foolish to tell people there’s no such thing as evil. But there is a redefining of words that must occur, and people must be able to talk about such things from a detached, unemotional, trauma-free, healed perspective. Every time we filter our thoughts through our individual vessel, we are looking from behind a veil or screen. **The more Love that dominates your thoughts and emotions, the more clearly you can see EVERYTHING.** You cannot think or see from a clear perspective if you are harboring resentment, bitterness, hatred, blame, or any other undesirable

frequencies. And you can't hide them. You can't bury your judgement under nice words or false appearances. **Energy never lies.** But the more you surrender to Love, the more you surrender to things that expand as opposed to restrict, the more you welcome your own evolution – changing with grace and willful acceptance – the more blessings and synchronicities you will see in Life.

The answer to what everyone wants to know – *how to we stop or get rid of all the evil, hate, and division in the world today* – is found in expansion of heart and mind. First, within oneself. Re-evaluating our deeply held beliefs and challenging our definitions with honest reflection. How do you define God? Love? Wrong? Unity? Different? Same? What categories, labels and programming rule your mental space? And do you have the capacity to expand your awareness, face your own fears and doubts, and go within? Are you willing and ready to forgive those who have hurt or wronged you? Are you ready to drop – truly release – other people's thoughts, emotions, and opinions? Other people's baggage and drama? Can you give up the sense of "I was right" or even "but I was badly wronged" and trade it in for something bigger, truer, something Lighter that offers Freedom?

Or do you sometimes hold on to these things, for fear of what it would be like to exist without them? Have you ever honestly considered what would happen if you stopped being the victim? And I don't mean from a protective or angry point of view, I mean from an honest-to-God energetic state of Love and Forgiveness. High Truth. "May we all see things as they are."

We must ask ourselves what part we play in the grand scale of global hatred, dissention and division. We can no longer afford to ignore our faulty governments and societal structures. We can no longer afford to ignore our communities and neighbors. **ALL HUMANS ARE EQUAL IN TERMS OF DESERVING EQUATABLE CHANCE OF HAPPINESS AND LIBERTY.** When we compare ourselves to others we must ask ourselves WHY? There are costs for everything. Including the way, we chose to evolve as individuals and as a collective species.

IF you want to be a part of the solution, if you say you align with True Love, Purest Light (which is dynamic not static) and if you say you are a High Truth seeker then you must stand up and speak out for those persecuted. You must heal your own emotions and triggers first, then work to evolve your mind towards expansion, then give back to those around you. Help be a part of the positive changes that are happening more and more every day. Be someone who says "wait! I didn't realize but now I do and I'm willing to learn, grow and change! I want to be a Light Bringer, and Truth seeker. I want to put out more positivity into this world – I want to leave humanity better off than when I was introduced to it."

These are those who will pave the way for real hope.

THE ABOVE WAS POSTED AS A BLOG POST APRIL 20, 2025

Who wrote this?

Hi 😊 I'm Michelle Ella Powell and I live in Naples, Florida with my 2 high needs little boys. I am currently in the process of conscious uncoupling (AKA attempting to nicely divorce) from their father, Jesse, for whom I am eternally grateful. No matter what, Jesse, I thank God for you and for our family.

I launched myself as a brand this past November doing intuitive psychic and energy healing work. My brand: Awkward Sinner. Awkward, because I've never fit in, Sinner, because I'm sure as shit not perfect. AND YET. God moves.

Long story short, I grew up "super Christian" to the point that church moved into my living room. Very book of Acts style. I literally grew up around miracles, signs, wonders and prophets! I've had experiences of deep mystical initiation all my life, since I was a child. (I talk about some in various podcast interviews I've done recently...check spotify or my website.) In my late 20s, I left the church and spent years as an atheist/agnostic. When I turned 40 just 2 years ago, it was like BAM a light switch went off and everything came back online full power. It's been a wild ride ever since!

I am a gifted second-generation hands-on healer and prophet. I do intuitive coaching, teaching, and I just led my first ever ladies' retreat which exceeded my wildest expectations.

(side note – typing that word "prophet" just gave me major but momentary anxiety. I usually say psychic because it feels safer somehow but realistically they're the same thing and its time I stand confidently in my truth. Afterall, it's my truth and no one else's.)

AND BREATHE.

I believe it is an honor to live boldly and even vulnerably. I love my work. I consider it a privilege to help people find breakthrough for their specific soul's journey. Whether I'm hosting meditation, reading Tarot, doing a Breakthrough Session, or hosting "Higher Self: A Spiritual Puff & Paint Experience" (for my 420 friendly friends), I just love supporting humanity and helping people remember who they truly are. This life has so much bliss to offer each of us!

May we all see things exactly as they are.

May your life be full of Harmony.

And so it is.

Michelle Ella Powell, Awkward Sinner
