Kitchen Recipe Stand

I had a few scraps of the wood coaster when I made the living room chair so I decided to create a recipe stand with them.

Materials Needed:

4 inch Square Welled Pinewood Coasters scrapes (about 1" wide x 1 $\frac{3}{4}$ " tall)

$\frac{3}{4}$ inch wood block

Steps

1. Cut the wood block in half on the diagonal to create two triangles.
2. Use a scrape piece of the welled coaster or cut a welled coaster in half, then cut

Crafting Peg Doll Play Sets

into thirds. One coaster will make 6 pieces about 1" wide x 1 ¾" tall.

3. Glue the triangle (longest side) to the back of the small coaster pieces.

Kitchen Recipes Cards

I made recipe cards quickly by decoupageing some free clip art onto 1-inch square pieces of craft wood. I use power point but you could also use canva or Google Slides! Use the program guides to draw out a one inch square and then size the clip art to fit within the square. I also added Make and Bake to promote reading practice, rhyming words and word families.

Materials Needed:

1" Wood Squares

Decoupage prints

Decoupage supplies: Decoupage medium, brush

Steps

1. Apply a thin layer of decoupage medium to the wood square.
2. Place your print on the wood square where you want it to be.
3. Apply a thin layer of decoupage medium to the top of the print. And gently smooth it in place.

Let the decoupage dry.

Recipe Bin

Materials Needed:

Mayberry Street Miniatures Miniature Wood Cabinet with Drawers

Book Bin Steps

1. Remove drawers from Miniature Wood Cabinet
2. Apply paint to cabinet. Add multiple coats if needed. Let dry fully.
3. Apply clear coat.

Tip: Save the drawers, I used them for other projects in my other books' themes. Be sure to check them out! I totally believe in upcycling.

About the Author

Emily Kellagher has a master's degree in education and has taught preschool, kindergarten, middle school science, and more.

Emily finds beauty, creativity, and fun in her daily life. She spends her time biking, creating, and dreaming up fun activities to enjoy with her grandchildren.

Growing up, Emily made natural dollhouses while camping using rocks, acorns, and sticks. She has shared her love of creative pretend play with her children, countless schoolchildren, and now her grandchildren. Her favorite material remains natural wood, which she uses to craft playscapes for peg dolls, showcasing her ingenuity and creativity.
