

CERTIFICATE OF COMPLIANCE

Date: March 1, 2024

UL certification listing: TGJX.R27046
EDGE SYSTEMS FOR USE WITH LOW SLOPE ROOFING SYSTEMS

Referenced standard: ANSI/SPRI/FM 4435/ES-1

Issued to: PRC Roofing Company, Inc.
3714 Osage St
Houston, TX 77063

This is to certify that: PRC Roofing Company, Inc. is an NRCA-authorized fabricator

Being designated an NRCA-authorized fabricator is subject to an annually-renewable agreement between NRCA and the authorized fabricator, and periodic inspections—referred to as “follow-up service”—of the authorized fabricator’s sheet metal fabrication shop. These periodic follow-up service inspections are conducted by UL and are intended to assure the authorized fabricator’s continuing capability to produce edge metal flashings according to NRCA’s UL certification.

All shop-fabricated edge metal flashings to which NRCA’s UL ANSI/SPRI/FM 4435/ES-1 certification applies shall bear UL classification mark labels. The presence of the UL classification mark label is the only means of designating a specific edge metal flashing as one that complies with NRCA’s UL ANSI/SPRI/FM 4435/ES-1 certification.

To obtain a current list of NRCA-authorized fabricators, visit NRCA’s website, www.nrca.net.
