Today's DJ Tech

One of the most versatile DJ's around, crafting devastating sets from hip-hop, house, trance, break beat, glitch and drum & bass, with equal precision. Basically growing up working in venues and event production Tech had a consistent interaction with artists and sounds from all around the world, something that is always present in his mixing. Spending much of the time early on in the battle circuits of the west coast provided a competitive environment perfect for developing the turntablist skills that set today's sound apart from the rest. With so much focus on the DJ battles, hip-hop and drum & bass shows everything changed gears once track production came into the scene eventually causing a shift entirely towards producing tracks for live performances. That decision paid off as today's sets are comprised of between 50-100% original tracks produced by Tech himself making his sound consistently fresh and truly exclusive. Performing professionally since 1996 Tech has performed with artists such as Q-Bert, Z-Trip, DJ Swamp, DJ Rectangle, DJ Craze, A-Trak, RAW, Donald Glaude, DJ Funk, Micro, Aphrodite, AK1200 and Diesel Boy to name a few. Shifting focus from battle routines to floor rocking EDM sets was a move that has been well received by audiences from Canada to the Caribbean. Today's performances are an undeniable force set in a class of there own.
