COLD STORAGE UNIT

"Keep it cold wherever you go!"

**All temperature ratings are approximate and vary greatly depending on environmental and weather conditions of the area of operation.*

FEATURES

- Quality steel tube mainframe and industrial channel construction.
- A variety of exterior colors and options from .030 aluminum sheets to .080 polymer core/aluminum panels.
- Standard one-piece aluminum roof and enclosed underbelly.
- Optional axle, tire, and wheel configurations.

- 4 inch deep floor, walls, ceiling, and doors allow for full coverage of high efficiency, closed-cell spray foam insulation throughout for optimal R-value rating.
- Interior walls and ceiling are lined with white .030 coated aluminum for better visibility and easier care.
- Flooring is a one piece rubberized coin style covering for easy care and cleaning.

- The heart of this unit is the easy to use Govi arktik 2000US refrigeration unit.
- Simple "Plug-and-Play" operation utilizing a standard 120v power cable that can be plugged into a permanent power supply for long term use or can be plugged into a small generator for mobile, on the go use.
- Easy to use with the on board digital control panel or optional app to use right from your phone.
