“K” LINE Marks Successful Debut at Intermodal South America 2025

São Paulo, Brazil — Kawasaki Kisen Kaisha, Ltd. (“K” LINE) proudly announces the successful first-time participation in Intermodal South America 2025, held in São Paulo from April 22 to 24. Intermodal South America 2025 is the largest logistics-related exhibition in South America and attracts more and more attention every year as a place where many companies closely related to our car carrier business, including those in the automobile and construction equipment industries, freight forwarders, and trading companies, gather to exchange information on the latest technologies and trends. This year's event attracted 500 exhibitors and more than 44,000 visitors.

Our exhibition booth experienced a steady flow of visitors, including long-term clients, new partners, and key industry stakeholders. In addition, the event served as an opportunity to connect with freight forwarders and project cargo shippers.

Many visitors expressed admiration for “K” LINE’s innovation, leadership, and enduring commitment to providing sustainable logistics solutions in the region.

Following Intermodal, on April 25, 2025, Americas Agent Meeting was held in São Paulo, bringing together with 10 Latin American countries’ agents and about 50 global executives to exchange information on market condition and business strategies. A highlight of the session was an inspiring presentation by Mr. Lierson Gomes, General Motors South America Logistics and Purchasing Director. His presentation title was “Logistics Digital Transformation”, offered insightful perspectives on the evolving logistics landscape.

These events further make “K” LINE Car Carrier Division’s market presence stronger in Latin America, while reinforcing the company’s global presence and strategic vision for future growth.
