

OPEN SOURCE AND INTERNET INVESTIGATOR: PRACTITIONER

COURSE INFORMATION

The internet is an amazing resource and an important tool when it comes to conducting investigations. But knowing how to use it effectively to secure the information and evidence needed for a case is key. More investigations now involve some form of open source or internet investigation.

This training course provides an advanced understanding of how open source and the internet can further investigations and how to lawfully gather evidence.

AUDIENCE

This course is suitable for any investigator, from any organisation, who already conducts Open Source and Internet Investigation in their role and wants to refresh or advance their skills.

Please note that if you do not have experience of Open Source and Internet Investigations, you should complete the 'Open Source and Internet Investigator: Introduction' course prior to attending.

COURSE LENGTH AND DELIVERY METHODS

The course is a one-day course. It can be delivered virtually or in-person.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Apply advanced internet search techniques.
- Demonstrate robust operational security techniques.
- Apply advanced evidence capture methodologies in internet investigations.
- Identify evidential and intelligence opportunities to develop internet investigations.
- Apply appropriate safeguards when operating online to protect tactics including anonymisation.
- Demonstrate the tracing of subjects and commodities through current and historic websites and IP addresses.
- Demonstrate higher levels of investigation of social media content.
- Discuss the process of preparing internet material for court or tribunal presentation.
