OPEN SOURCE AND INTERNET INVESTIGATOR: INTRODUCTION

COURSE INFORMATION

The internet is an amazing resource and an important tool when it comes to conducting investigations. But knowing how to use it effectively to secure the information and evidence needed for a case is key. More investigations now involve some form of open source or internet investigation.

This training course provides an introductory understanding of how open source and the internet can further investigations and how to lawfully gather evidence.

AUDIENCE

This course is suitable for any investigator, from any organisation, who has little to no knowledge of Open Source and Internet investigation.

COURSE LENGTH AND DELIVERY METHODS

The course is a one-day course. It can also be made into a two-day course by also attending the 'Open Source and Internet Investigator: Practitioner' course which provides more detail and advanced methods of gathering information.

It can be delivered virtually or in-person.

COURSE OBJECTIVES

By the end of this course, participants will be able to:

- Apply basic internet search techniques.
- Discuss the structure of the internet and its services.
- Apply appropriate evidence capture methodologies in internet investigations.
- Demonstrate the investigative value of digital images.
- Demonstrate basic levels of investigation of social media content.
- State legislation and procedural practices which may influence internet investigations.
