Grade Equivalent (GE)

A grade equivalent score (GE) is a number that describes the student's location on an achievement continuum. The GE is expressed as a decimal number that shows performance in terms of a grade level and months of the school year. For example, if Janice, a PreK4 student obtained a GE of a PK.9, she scored at the same level as a n average student at the end of the 9th month of the PreK4 school year. A score of 0.7 represents a students at the end of the 7th month of their kindergarten year. GEs are useful for monitoring year-to-year growth.

National Percentile Rank (NPR)

A percentile rank (NPR) shows a student's standing within a state wide representative group of students in the same grade level who were tested at the same time of year as the student.   A percentile rank of 79 means that the student scored as well or better than 79 percent of the other children in the same grade in the norming sample.
